PREFACE.

STATE OF INDIANA,

OFFICE OF SECRETARY OF STATE,

INDIANAPOLIS, May, 1889.

In accordance with the requirements of an act, approved February 3, 1853, (1st G. & H., p. 538), the several administrative officers of the State and the Trustees and Superintendents of the Benevolent, Reformatory and Educational Institutions thereof, have submitted to the Governor, and filed in the Executive Department the reports required of them for the fiscal year ending October 31, 1886, and the calendar year ending December 31, 1886, respectively, which have been entered of record in the order of their reception, and delivered to the Secretary of State for publication under the order of the Board of Commissioners of Public Printing and Binding.

Sixteen hundred copies of reports are now bound and issued to the officers and persons designated by law to receive them. The usual number of copies of each report have also been bound in pamphlet form, and delivered to the responsible officer or Superintendent of each Institution for distribution in such manner as they may deem for the best interests of the State.

TRUSTEES' REPORT.

To ISAAC P. GRAY, *Governor*:

SIR—The Board of Trustees for the Indiana Hospital for the Insane makes the following report for the fiscal year ending October 31, 1888.

Estimated value of real estate.....	\$1,436,150 00
Value of personal property.....	198,858 61
Total.....	<u>\$1,635,008 61</u>

THE REVENUE.

For maintenance as per appropriation.....	\$260,000 00
Expended for maintenance.....	260,000 00

REPAIRS.

For repairs as per appropriation.....	\$15,000 00
Expended for repairs.....	15,000 00

CLOTHING.

For clothing as per appropriation.....	\$12,000 00
Expended for clothing.....	12,000 00

The revenue from sales and donations during the year was \$838.65, which amount was properly turned over to the State treasury.

The daily average number of patients during the year was 1,524.

The per capita expense for maintenance was \$170.

STATISTICAL.

The following shows the per capita expense for the last ten years:

In 1879 per capita expense of maintenance was.....	\$191 31
In 1880 per capita expense of maintenance was.....	184 64
In 1881 per capita expense of maintenance was.....	184 97
In 1882 per capita expense of maintenance was.....	194 00
In 1883 per capita expense of maintenance was.....	194 00
In 1884 per capita expense of maintenance was.....	177 02
In 1885 per capita expense of maintenance was.....	173 43
In 1886 per capita expense of maintenance was.....	160 02
In 1887 per capita expense of maintenance was	169 68
In 1888 per capita expense of maintenance was.....	170 00

The yield of farm and garden products was very satisfactory.

Natural gas was put in the Institution during the month of October, but not in time to effect the expense for fuel during this fiscal year. The management contracted with the Indianapolis Natural Gas Co. for a sufficient supply, for the sum of \$11,000 per annum, to be paid in monthly installments.

It saves for the State annually the sum of \$8,500, and is much more convenient.

The buildings are in a high state of repairs, as well as the grounds and gardens. Many growing trees have been added to the groves, and the park was never so beautiful.

We are happy to say to your excellency that there has been no fires or other accidents of importance during the year. The institution is well guarded against fires in all its departments.

The per cent. of cures has continued high during the entire year, which compares favorably with any other hospital in the country.

The food and care of the patients are first-class, and as good as can be obtained.

We call your special attention to the report of the Superintendent, herewith submitted. It contains in detail the full workings of the management.

The Superintendent and his subordinates have been faithful and efficient in all their duties.

It is the opinion of the Board, in view of the large savings in fuel, and other things necessary to maintenance, that the sum of \$260,000 annually will meet the requirements of the Hospital for the coming biennial term. And that the sum of \$12,000 will meet the annual demands for clothing. Also that the annual appropriation of \$15,000 will keep the buildings and premises in their present state of repairs.

The present laundry for the Department for Women is very poor and insufficient, and must be replaced with a new one. Especial attention is called to the report of the Superintendent on this matter.

Respectfully submitted,

THOS. H. HARRISON, *President.*

BARTON H. BURRELL, *Secretary.*

PHILIP M. GAPEN, *Treasurer.*

SUPERINTENDENT'S REPORT.

To the Board of Trustees of the Indiana Hospital for the Insane :

GENTLEMEN—The Fortieth Annual report of the Indiana Hospital for the Insane, for the fiscal year ending October 31, 1888, is herewith respectfully submitted.

SUMMARY.

The general results, as indicated by the statistical tables, show that at the beginning of the year the number of patients was 1,513; admitted during the year, 682; and discharged, 669. The number discharged as recovered, was 312; as improved, 112; as unimproved, 118; as not insane, 7. Died, 116. The daily average during the year, 1,524; the number of patients at close of the year, 1,526. The per cent. recovered of the total number treated during the year, was 45.75. The per cent. of deaths of the whole number treated, was 5.28. By reference to table No. IV, it will be seen that 16 patients died within one month after admission. It might be stated in explanation, that the majority of these cases were subjects of acute mania, who had been treated at home under many disadvantages several days, and in some instances, weeks, when they should have been brought to the Hospital. The want of proper nourishment, the excessive use of sedatives and narcotic drugs, and the injudicious application of various methods of restraint, was, no doubt, accountable for the exhausted condition of these patients. Several of them died within a few days, and in one case a man died within three hours after reaching the Hospital. Hence, if these practices continue to prevail, to any extent, our death rate will always be an uncertain and variable quantity.

ADMINISTRATION.

An earnest effort has been made during the period embraced by this report, to improve the efficiency of the Hospital service in all its departments. With that end in view some changes have been made, a few of which may be mentioned.

Men and their wives are no longer employed as attendants in the Department for Men. The plan was found by experience to be impracticable, and was, therefore, abandoned. Aside from the common difficulty of finding a man and wife possessing qualifications suitable for the important duties of attendants on the insane, the natural and inevitable tendency to collusion of man and wife in shielding each other from detection in neglect of duty, seemed so great as to absolutely prevent the enforcement of that degree of discipline that is essential to satisfactory management in a hospital of this kind. However, the idea of having the kindly and refining influence of women in the male wards has not been abandoned; the plan has only been changed, Instead of wives as attendants, widow women of suitable age and experience are employed. These are known as female attendants in the Department for Men, each having three wards on the same floor assigned to them. The doors between these wards are left open when practicable.

It is the duty of these women to attend to the decorating and house-keeping of their wards, repair the clothing and see that the patients are properly served at meals, and above all, to see that they are kindly treated by the male attendants. The constant presence of kind-hearted and conscientious women in the male wards, gives additional assurance that no harsh or cruel treatment of patients can occur without detection.

NIGHT WATCH.

The night watch service in the Department for Women has been increased. We now have three night watches in the wards, in addition to a night nurse who has charge of the infirmary ward. By this division of the work each ward is visited about every thirty-five or forty minutes during the night. It is gratifying to state that during the past year 1,189 patients have been treated in this department alone, many of whom were acute melancholic cases, with marked suicidal tendencies, and no accident of any importance has occurred.

STUPEFYING DRUGS.

Without going into detail of the professional work of the hospital, which would be evidently out of place in a report of this kind, I may say that we have not found it necessary to resort to such remedies as the hydrate of chloral and the bromide of potassium with that frequency and liberality that formerly prevailed here. By comparing the drug requisitions for the present year with those of previous years I find that the amount of these drugs used has been reduced fully one-third.

GYNECOLOGY.

In applications for the admission of women to the hospital, uterine disease is frequently assigned as the cause of insanity by the attending physician, and the number of single women admitted, having a history of menstrual irregularities, is sufficiently great to lead to the supposition that derangements of the sexual system in the female plays an important part in the production of the various forms of insanity.

As to the cause of insanity in young and single women admitted to the hospital during the past year, the family histories are not given with sufficient accuracy in all of the cases to enable us to form definite conclusions. But from the records obtained and our own observation, it seems probable that heredity is the chief cause. In young persons faulty organization has laid the ground work in most cases where we find slight shock, bitter disappointment or other adverse agency acting as the disturbing cause to develop insanity.

In married women who have gone through the ordeal of childbirth, a different class of causes may be suspected to be present. Several years ago Dr. Emmet made the statement that about thirty-three per cent. of all the women who had borne children and suffered from any form of uterine disease had laceration of the cervix. Since that time numerous observers, skilled in gynecological practice, have fully verified his conclusions as to the frequency of this injury. While professional opinion of to-day may not entirely sustain the extreme views first entertained of the pathological significance of this lesion, there is a general unanimity of sentiment as to its serious character. When we consider the intimate anatomical relations existing between the uterus and every other

organ of the female organization through the intricate ramifications of the sympathetic nervous system, it is only reasonable to conclude that an injury that destroys to any considerable degree the integrity and symmetry of that central organ, may, by sympathetic and reflex action, pervert and destroy the normal physiological relations that should exist between all the organs of the body to such an extent as to lead to disturbed nutrition and general impairment of the health.

That laceration of the cervix is the initial lesion, the starting point from which emanates many of the ills that make woman's life miserable and unhappy, there can be no doubt. Subinvolution, displacements of various kinds, sterility, and enlarged ovaries, æmia and perverted nervous sensation are only a few of the long list of ailments that might be enumerated as resulting from this injury. The diagnosis of pelvic disease in insane patients is attended with more or less difficulty. The perverted action of the nervous system, the irregular manifestations of the reflex phenomena causes the subjective symptoms to be so varied as to be of little value in estimating physical conditions.

The operation for laceration of the cervix has been performed eleven times in the hospital during the past year, and no unfavorable result has followed the procedure in any instance. The general health of the patients operated on has uniformly improved. The improvement, of course, was more marked in recent cases. In a few of the cases the operation was followed by such a marked change for the better in the patient's mental condition as to lead to the inference that in these cases the lacerated cervix was a prominent etiological factor in the production of insanity. However, the number of cases operated on are, as yet, too few, and the time they have been under observation not sufficiently prolonged to warrant us in more than suggesting the possibility of such relation.

OVARIAN TUMOR.

Ovariectomy was done in one case as a last resource. The presence of a large accumulation of acetic liquid somewhat obscured the diagnosis, but laparotomy revealed a malignant tumor of considerable size, of the right ovary, which was removed. The patient rallied from the operation fairly well, but succumbed to peritonitis two days later.

VISITORS.

It is a matter of observation that visitors to the hospital are gradually increasing from year to year. The number of visitors during the past year is probably unprecedented in the history of the Hospital. This can be accounted for to some extent by the fact that several months of that period Indianapolis had a presidential candidate, and was the center of attraction for the numerous visiting delegations from the various counties of Indiana, as well as from cities and towns of neighboring States. In order to accommodate these visitors we did not hold strictly to the hours that are usually allotted to that purpose, but allowed them access to the wards during the morning as well as the afternoon.

We have been especially particular to give visitors free access to the Hospital, and have gone to some pains to explain the system of management to those who seemed interested in such matters. As a rule, visitors seemed well pleased with the condition in which they found the wards of the Hospital. However, persons would occasionally appear possessed of a morbid curiosity to see patients in cells bound with chains, or other implements of torture, and when told that they had already seen the most disturbed patients, that we had no cells, in fact, no patients under restraints, they would look incredulous and disappointed.

It has been our custom to permit relatives of patients to visit them on Sundays, but I am of the opinion that this privilege should be extended to those only, who for some particular reason, can not make their visits on other days of the week. The patients appreciate the systematic observance of Sunday, and the officers, together with the other employes, should be allowed some of the blessings of rest and quiet on that day, in common with other people.

In view of the fact that the Hospital grounds are being overrun on Sundays by visitors and sight-seers, who, by their persistent encroachments, are rapidly converting the beautiful lawns and avenues, which were designed exclusively for the benefit of the patients, into the purposes of a public park, I would suggest that the public be excluded from the grounds on Sundays, and that the Street Car Company be required to stop their cars at the outside gate on that day, or, if that is not practicable, ask them to remove their tracks entirely from the Hospital grounds.

SALARIES.

The salaries paid male attendants is entirely too low. It has been a matter of surprise to me that we could obtain as good a class of young men for attendants as we do for the small sum of \$20 per month. The wages of attendants should be graded in accordance with their general usefulness and the duties required of them. It seems to me that \$30 per month would only be fair compensation for the services of a first-class attendant. If the wages were advanced to this amount, young men would seek the position, and, once employed, contentment would follow, and they would be more likely to remain longer in the service of the hospital than they usually do. Forbearance, kindness and exhaustless patience are essential qualifications in an attendant on the insane. These qualifications are not acquired; they must be inherited. Then by continuous service, a degree of tact and skill in the control of patients, is attained that makes their services invaluable.

The salary allowed the Superintendent is not at all adequate to the duties and responsibilities pertaining to that position. When the statutes were enacted, several years ago, limiting the Superintendent's salary to \$2,000 per annum, the Hospital had a capacity for about four or five hundred patients. Since that time the institution has been greatly enlarged, a new building, the Department for Women, has been added having a capacity for 850, giving the Hospital an aggregate capacity for 1,500 patients. Of course, the duties of the Superintendent have been correspondingly increased, and yet his salary remains unchanged.

However, I have no doubt that the same generous liberality, which prompted our people to build such magnificent structures as our present Hospital buildings for the care and treatment of our unfortunate insane, will in due time inspire them to make the necessary provision for paying the Superintendent a reasonable salary, an amount at any rate commensurate with his duties and responsibilities. If the salaries paid at similar institutions, of less magnitude, be taken as a criterion in this matter the salary of the Superintendent of this Hospital ought to be \$3,500 per annum.

SUBSISTENCE.

All articles of food supplied to the Hospital are first delivered at the store-house, where they are carefully examined by the Steward and Storekeeper. On the delivery of meats and poultry the butcher is required to assist in the inspection. These officers are instructed not to accept any articles of food that fall below the standard, in quality, as specified in our purchasing contracts. Our refrigerators, for the preservation of meat, butter and other articles that are liable to deteriorate, seem about as perfect as they could be made. Our chief cooks are instructed to examine closely all food supplies delivered to them, and to reject every article that is of inferior grade, or about which they have any suspicion of impurity.

When the food reaches the tables, ready to be served to the patients, it is again inspected by the dining-room stewards, physicians or supervisors. Therefore, it does not seem reasonable that all these officers could be deceived about the quality of the food served to the patients. Their testimony, as to the satisfactory quality and quantity of the food, is a matter of record in the Hospital from day to day. The dietary list is varied from time to time, to accord with the season, and to avoid monotony. The list given below was followed with slight variation during September.

BILL OF FARE.

[General diet for patients.]

SUNDAY.

Breakfast—Oatmeal mush, milk, potatoes, bread, butter, coffee.

Dinner—Corn beef, bread, boiled cabbage, tomatoes, pickles.

Supper—Bread, butter, cake, peaches, tea.

BILL OF FARE.

[General diet for patients.]

MONDAY.

Breakfast—Fried bread, oat meal, coffee, bread, butter.

Dinner—Roast beef, gravy, bread, potatoes, hot slaw, bread pudding, buttermilk.

Supper—Hot biscuits, apple sauce, tea, bread, butter.

BILL OF FARE.

[General diet for patients.]

TUESDAY.

Breakfast—Fried ham, milk gravy, corn cakes, coffee, bread, butter, molasses.

Dinner—Mutton, stewed tomatoes, corn, potatoes, bread, apples.

Supper—Boiled rice, milk, peaches, tea, bread, butter.

BILL OF FARE.

[General diet for patients.]

WEDNESDAY.

Breakfast—Beef steak, gravy, potatoes in jackets, coffee, bread, butter.

Dinner—Beans, bacon, boiled cabbage, corn bread, pickles, apple pie, buttermilk.

Supper—Hot rolls, baked apples, tea, bread, butter.

BILL OF FARE.

[General diet for patients.]

THURSDAY.

Breakfast—Beef stew, oat meal, coffee, bread, butter.

Dinner—Boiled ham, potatoes, turnips, apple dumplings, bread.

Supper—Boiled rice, milk, sugar, bread, butter, tea, grapes.

BILL OF FARE.

[General diet for patients.]

FRIDAY.

Breakfast—Boiled eggs, fried potatoes, coffee, bread, butter.

Dinner—Fried fish, mashed potatoes, hot slaw, buttermilk, bread, butter.

Supper—Crackers, cheese, apple sauce, tea, bread, butter.

BILL OF FARE.

[General diet for patients.]

SATURDAY.

Breakfast—Fried bacon, gravy, potatoes in jackets, coffee, bread, butter.

Dinner—Roast beef, gravy, stewed tomatoes, fried onions, potatoes, bread.

Supper—Bread and milk, hominy, tea, bread, butter.

EXTRA SPECIAL DIET.

Selections from the following articles of food are made in addition to the general bill of fare, for special cases, by the physicians, when they have reason to believe that a change of fare is needed, and where unusual quantities of any particular kind of food seems to be indicated.

Apples, baked, stewed or roasted; bananas, oranges, beef tea, beef extract, ceraline, in various styles; chocolate, cocoa, chicken, boiled, stewed, roasted or served in soup; eggs, boiled, fried or poached on toast; various kinds of jellies, maccaroni, milk and lime water, various fruits and berries in their season, oysters, stewed or fried.

A NEW BUILDING NEEDED.

The building in which the laundry at the Department for Women is located is a very imperfect structure. It is in such bad repair that it is with some misgivings we undertake to occupy it as a laundry for another winter. It is not at all adapted to that purpose; in fact it was originally built for a coal shed, and the laundry was moved into it temporarily to provide for the emergency occasioned by the destruction of the laundry building in the disastrous fire four years ago.

The wash-house at this department is also in bad repair. The flooring is old and in many places decayed. This wash-house is situated under dormitories which are occupied by employes, and it should be removed for evident sanitary reasons.

We need a new brick building 50x75 feet, three stories high. For convenience it should be joined to the building formerly

used as a boiler house. With an additional building of this size we would have ample room for our laundry and wash-house.

The two small engines which furnish the power for the washers and mangle in this laundry are of insufficient capacity, and are already well worn. They should be replaced by a new engine of suitable capacity.

A NEW GREEN-HOUSE NEEDED.

The green-house, upon which we depend for bedding plants, which help to keep the lawn beautiful and attractive, and which furnishes the flowers and shrubs to ornament the hospital wards, is rapidly falling to decay. A new green-house of a more modern pattern than the present one is urgently needed.

WARD FURNITURE.

Additional furniture in the wards would greatly add to the comfort and convenience of the patients. We need at least one hundred and fifty lounges and two hundred rocking chairs.

The day rooms in many of the wards are without carpets and are destitute of decorations. A considerable sum is required for the purpose of properly furnishing these rooms.

TUNNEL FOR STEAM PIPE.

The steam pipe extending from the boiler-house to the Department for Women should be protected by an arched brick tunnel. The necessity of this tunnel is so apparent on inspection that simply calling attention to it should be sufficient.

ELECTRIC LIGHT NEEDED.

The wards of the Hospital are not sufficiently lighted. The gas jets are too few, and the supply of gas is occasionally so limited as to cause serious inconvenience.

Electric light is no longer an experiment; it is already in use in many hospitals and gives the greatest satisfaction. It is a light absolutely safe. It gives the wards a bright and cheerful appearance, and is far cheaper than gas. I therefore recommend that the Legislature be asked for an appropriation sufficient to establish an electric light plant for the Hospital.

FINANCIAL EXHIBIT.

The per capita expense, based on the daily average number of patients belonging to the Hospital, is \$170, about the same as it was last year, notwithstanding the higher price, the greater part of the year, of many of the food staples.

The per capita based on the daily average number of patients actually in the house, exclusive of those absent on furlough, is \$180.14.

Such a favorable showing could not have been made except by the practice of the strictest economy in every department of the Hospital. The dietary schedule has not been restricted, but has in many respects been increased. The pay-roll has been kept at the lowest possible limit by reductions of the force of employes, where it could be done without serious detriment to the service.

APPROPRIATIONS REQUIRED.

The amounts heretofore appropriated to the clothing and repair funds will probably be sufficient, but the amount for the maintenance fund must be increased if provision is made for the payment of higher salaries to certain employes, the necessity of which I have already called your attention. The usual allowance of \$260,000 should be increased to \$275,000.

No accurate estimate has, as yet, been made for the amounts that would be required for the erection of the buildings for the laundry and green-house. I think, however, that including the laundry and green-house, the tunnel for steam pipe, the electric light plant, and additional furniture in the wards, an appropriation of \$50,000 would be required.

SUMMARY OF FINANCIAL EXHIBIT.

Following will be found the statistical tables, the consolidated statement of revenues and disbursements, the recapitulation of expenditures from the different funds by vouchers, the report of money received from the sale of discarded property, the schedule of accounts with various counties for clothing and undertaking, the statement of the value of Hospital products, the annual inventory of Hospital property, and the statement of detailed and itemized expenditures from the different funds, and the report of the sewing department; also a copy of the pay-roll for October. These contain information in detail concerning the movement of patients, the business transactions, and the present condition of the Hospital.

ACKNOWLEDGMENTS.

Thanks are due the attendants and other employes of the Hospital for their efforts to entertain the patients by amateur theatricals.

I desire to thank the Model Clothing Company, of Indianapolis, for a very interesting stereoptic exhibition, which was greatly enjoyed by the patients.

I also desire to thank the Indiana Agricultural Association for the liberal arrangements by which a large number of the patients were permitted to enjoy the many attractions of the Annual Fair.

The officers and employes have my sincere thanks for the faithful and efficient manner in which they have discharged their several duties during the past year.

I am under a deep sense of obligation to the Board of Trustees for their aid and support in the discharge of my duties as Superintendent of the Hospital.

We are profoundly thankful to the Great Ruler, who by His beneficence and wise providence has shielded the Hospital from calamity in the past, and we earnestly invoke a continuance of protective care and guidance.

T. S. GALBRAITH, M. D.,
Superintendent.

TABLE NO. I.

Movement of Population—Fiscal Year 1887-8.

GENERAL RESULTS.	MEN.	WOMEN.	TOTAL.	AVERAGE.
Remaining at beginning of year.	649	864	1,513	
Admitted during the year	357	325	682

THE INDIANA INSTITUTION

FOR THE

EDUCATION OF THE DEAF AND DUMB.

The Forty-Fifth Annual Report

OF THE

BOARD OF MANAGEMENT AND SUPERINTENDENT

FOR THE

FISCAL YEAR ENDING OCTOBER 31, 1888.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. E. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1889

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT January 12, 1889. }

Received. Examined by the Governor and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, Jan. 12, 1889. }

The financial part of the within report, so far as it relates to money drawn and paid into the State Treasury, has been examined and found correct. The difference of \$3.04 in the receipts for clothing is caused by account of 1887 lapsing into the present fiscal year.

BRUCE CARR,
Auditor of State.

Returned by the Auditor of State with above certificate, and transmitted to the Secretary of State for publication upon the order of the Board of Commissioners of Public Printing and Binding.

PIERRE GRAY,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana January 12, 1889.

CHARLES F. GRIFFIN.
Secretary of State

THE INDIANA INSTITUTION FOR THE
EDUCATION OF THE DEAF AND DUMB,
INDIANAPOLIS, January 12, 1888. }

To Isaac P. Gray, Governor of the State of Indiana :

In compliance with law, and by direction of the Board of Trustees, I have the honor to lay before you the annual report of the Board and of the Superintendent of the Indiana Institution for the Education of the Deaf and Dumb for the fiscal year ending October 31, 1888.

Respectfully submitted,

JOHN B. GREENE,
Secretary.

TRUSTEES' REPORT.

To the Honorable

ISAAC P. GRAY,

Governor of the State of Indiana:

SIR—The Board of Trustees of the Indiana Institution for the Education of the Deaf and Dumb has the honor to submit the following report for the fiscal year ending October 31, 1888.

The health of the entire school has been excellent during the year, there being absolute freedom from epidemic or endemic form of disease. Satisfactory progress has been made in the school, the teachers and pupils alike closely applying themselves. The examinations at the end of the scholastic year in June were thorough and complete and the papers returned by the pupils were unusually correct, and were indicative of hard study during the year.

Several changes have occurred in the list of teachers and officers, also a change in the Industrial Department, fully set forth in the Superintendent's report, to which your attention is called, as it contains all the facts and figures, both financial and otherwise, required by law, together with his recommendations for the future.

Aught that this Board can say would be but a repetition in part of his report—a surplusage not necessary, not needed.

We do, however, desire to impress upon you the absolute necessity for enlarged accommodations, and hope that in your message to the General Assembly mention will be made of, with recommendations for this improvement, as, in our judgment, the best interests of the State demand it. The Superintendent treats fully of this matter, and thinks the whole improvement can be made for \$50,000. This, we believe, is a fair estimate.

We also desire to call your attention to the necessity for new boilers in the engine house and a power press in the printing

office, both of which are strongly recommended by the Superintendent. Special appropriations should be made for these—for the former, \$2,500; for the latter, \$1,500.

The best interests of the pupils require that a change should be made in the manner of operating the shops, and the plan to be adopted, we think, is the one recommended by the Superintendent, viz: That the shops should not be leased, but that the Institution should employ an instructor in each shop, paying him so much per month for his services, and that all proceeds from the sale of articles manufactured should revert to the Institution itself, instead of to the General Fund of the State Treasury; or, if not, then a special appropriation should be made of \$5,000 per year, to be known as the Shop Fund, out of which is to be paid the salaries of instructors, cost of material, etc.—unexpended balance, of course, to be covered back into the General Fund each year. Once started, we believe the system would prove nearly self-sustaining.

Based upon a representation of 300 pupils, as at present, we believe the appropriations of former years will answer for the coming two years—\$55,000 per year for Maintenance, \$3,000 per year for Repairs.

The value of the property of the Institution, its liabilities October 31, the products of Farm and Garden, the amount of earnings paid Treasurer of State, and of clothing furnished indigent pupils, the receipts and expenditures, and a statement of the per capita expense, with all other necessary information, will be found in the report of the Superintendent herewith annexed and hereof made a part.

Respectfully submitted,

THOMAS H. HARRISON, Pres.,
JOHN B. GREENE, Sec.,
D. W. CHAMBERS, Treas.

SUPERINTENDENT'S REPORT.

To the Board of Trustees :

GENTLEMEN—I have the honor to submit the following statement of the progress of the Institution during the fiscal year ending October 31, 1888.

THE OFFICERS AND EMPLOYES

have faithfully discharged their various duties in a manner that deserves commendation, and I take great pleasure in testifying to their worth and ability, which has at all times been accompanied with an unselfish earnestness.

THE INSTRUCTORS

have been faithful in the trusts confided to their charge, and both in the school room and out have been tireless in their efforts to lead the pupils to a higher ground, mentally and morally.

CHANGES.

During the year several changes have occurred in the corps of instructors and staff of officers. At the end of the scholastic year, in June, Emma B. Lowe, May Williams and Harriett Goode, teachers, resigned; the first because of marriage, the second to accept a position in the Western Pennsylvania Institution, and the third because of ill health. I have appointed in their places in the order named, Orson Archibald, A. B., a former pupil and teacher in this Institution; Albert Berg, A. B., also a former pupil here, and Miss Olivia Bruning, of Columbus, Ohio. The two former are graduates of the National Deaf-Mute College, at Washington, and the latter comes very

highly recommended as a teacher of articulation, Miss Goode, whose place she fills, having had charge of that branch of instruction.

In June, Mr. and Mrs. Geyer, Steward and Matron respectively, resigned. In the place of the former I have appointed no one, the work of that position being divided among several. In the place of the latter I have appointed Mrs. Sarah C. Peters, of Wayne County. Several changes have taken place from time to time among the subordinate employes, not necessary to especially mention here.

THE PUPILS

have generally applied themselves to their studies and have made pleasing progress during the year. Their deportment in and out of school has been excellent, and they have shown at all times a perfect willingness to faithfully abide by the rules governing the Institution.

THE HEALTH

of the entire school has been good, and, considering the number, nearly four hundred, including the officers and teachers, the sick rate has been most remarkably small. This of itself will indicate the great attention given to ventilation, cleanliness and all sanitary measures in general. For a specific report concerning the health, etc., your attention is called to a report of the physicians of the Institution in a subsequent part of this report.

THE ATTENDANCE

during the fiscal year, which includes parts of two school years, will be shown by the following statement:

	BOYS.	GIRLS.	TOTAL.
Number admitted	193	153	346
Number dismissed.....	19	9	28
Number remaining on roll.....	174	144	318
Number in actual attendance at end of year	168	130	298
Leaving enrolled and not in attendance....	6	14	20

THE NEW PUPILS

received during the year were as follows :

Boys	20
Girls.....	13
Total.....	33

THE CAUSES OF DISMISSION

during the year were as follows:

Graduated from Academic Department	5
Graduated from Primary Department.....	3
Expiration of time	6
Non-Progression.....	3
Bad health.....	1
Moved from State.....	3
At own request.....	1
Married.....	1
Death	2
Post graduates	3

Making the whole number of pupils who have ended their connection with the Institution during the year, 28, of whom 19 were boys and 9 girls.

RESIDENCE OF PUPILS.

Your attention is called to a tabulated statement in a subsequent part of this report showing the number of pupils received from various counties of the State, the number dismissed from each, and the number remaining and entitled to the benefits of the Institution. This statement, of course, refers only to those who have been in attendance at some time during the year. Hence the number entitled to the benefits of the Institution is always larger than the number reported at the end of any one year. From this statement it will be seen that pupils have been admitted from 86 of the 92 counties, those counties not represented being Benton, Jasper, Knox, Scott, Starke and Warrick. The counties having ten or more representatives, are: Laporte, 11; Marion, 27; Montgomery, 12; White, 11. The average of the representation for the 86 counties has been 4.02.

Your attention is also called to the accompanying catalogue containing the names of the pupils received into the Institution during the year, and the counties and towns where they reside.

ARTICULATION.

Forty-eight pupils have received instruction in this method during the year. The progress has been marked, and the results obtained have been most pleasing and leads me to think that our efforts in this direction should be greatly increased. I beg leave to here repeat what I said concerning this branch in my last annual report.

"The progress made and the results shown are wonderful. I am of opinion that many more could receive profitable instruction than are now receiving it, but so long as there is but one teacher of articulation, as at present, it will be impossible to increase the number. I therefore recommend that some steps be taken whereby it will become feasible to employ an additional teacher of Articulation. Although cramped for the want of school room, it may be possible to make arrangements whereby with an additional teacher in this branch, classes can be taught both morning and afternoon."

PAINTING AND DRAWING.

In this department the effort has been strong and the pupils have given close attention, the result being a most satisfactory progress. The work of the pupils adorns the walls of the Drawing Academy and invariably calls forth great praise from visitors. The number under instruction during the year has been 41.

INDUSTRIAL DEPARTMENT.

I desire here to again call your attention to a needed change in the manner of operating the shops connected with the Institution, and repeat what I have said in former reports:

The system under which the shops are now operated is entirely wrong. The lease system should be abolished and a system adopted whereby a teacher for each particular trade taught here should be employed by the Institution, and paid so much per month for his services, the teacher to be known as the master of the shop. The laws governing the Institution may have

to be amended in some parts to admit of this change, so that the earnings of the Institution may revert to the Institution for its own use, instead of the General Fund, as now, whereby the Institution loses the use of same. If this change be not made in the law, then it will be necessary to increase the amount of the annual appropriation, say a separate appropriation of \$5,000 per year for workshops, which amount will cover the expense of instruction and material. After the system is once started, I believe it will prove to be nearly self-sustaining, and the unexpended balance of the appropriation would, of course, be covered back into the General Fund. Your attention is called to the matter in the hope that such steps will be taken as may be necessary to bring about this needed reform.

THE CABINET SHOP

was leased during the past year to Reuben Girard, a former pupil of the Institution, and a skillful mechanic. The shop has been thoroughly overhauled and is now in better condition than for years past. About forty boys have received instruction during the past year in cabinet making. Their progress generally has been as thorough and complete as the present system allows.

THE SHOE SHOP

has had employed therein during the year fifteen boys, all of whom have applied themselves and made fair progress.

CHAIR CANING

has afforded employment to sixty-five of the smaller boys, and has served to inculcate habits of industry.

THE PRINTING OFFICE

has more than met the expectation of our hopes, and the reasons assigned for its establishment have been verified. Instruction in the art preservative has been imparted to ten boys and ten girls during the year. One or two of the first-year pupils have obtained positions in printing offices, and report of their work is most cheering. One of them, a girl who received instruction for but eight months, now receives \$10 per week as a compositor in the office of a weekly paper. I re-

gard a deaf-mute especially well adapted to this kind of work, and feel glad that the trade has been added, for it opens up a new channel, and a paying one, through which a livelihood may be gained.

THE INDIANA DEAF-MUTE JOURNAL

which was started a little over a year ago, as a semi-monthly, has now become a weekly, and is published during the scholastic year. The cost of subscription has been raised from fifty to seventy-five cents, and is generally taken by all the parents and friends of the pupils. The paper still continues a five-column folio, and is issued regularly every Wednesday. Besides being sent to subscribers exchanges are made with various papers of other institutions. The total ordinary expense charged to the printing office last year was \$134.99, while the receipts for subscriptions to and advertising in the Journal amounted to \$159.85, or \$25.86 more than the total ordinary expenses of the office. However, during the year a Nonpareil job press and job type, costing \$238.86, were purchased, and is not included in the above ordinary expenses. The figures here given, though, will show that the receipts will be equal to, if not more than the ordinary general expenses. Then there must be taken into account the saving effected by the work of the Institution done on its own press. All receipts for advertising and subscriptions are covered into the general fund as earnings, as by law required.

MISCELLANEOUS WORK.

Other employment is furnished to some of the boys, as follows: Bake shop, 2; kitchen, 4; greenhouse, 2; carpenter shop, 2.

IMPROVEMENTS MADE.

The most important of these is the introduction of natural gas as a fuel. During the past summer a contract was made with the Consumers' Gas Trust Company whereby they agreed to furnish gas to the Institution for \$2,000 per year, which is about 60 per cent. of the usual cost of fuel. The cost of piping the grounds and buildings for using the gas will nearly use up the remaining 40 per cent. This, however, will figure only for

the first year. After that the use of gas will effect a saving of 40 to 50 per cent. on the former cost of fuel. It is used in the engine house, in the shops and throughout the buildings—in fact no fuel of any other kind is used.

During the vacation the walls and ceiling of the chapel were painted, and now present a clean, fresh appearance.

New floors have been laid in the bath rooms, in the halls south of the chapel, and in the boys' study hall. Numerous side walls, ceilings and a large amount of woodwork over the building generally have been whitewashed and painted.

New carpet has been laid in the reception room and in several of the bed-rooms.

Besides placing new flooring in the boys' study hall, the old tables have been removed and new single school desks of the Excelsior pattern placed therein, at a cost of \$637.

In the wash house a new brass-lined rotary steam washer has been placed, at a cost of \$375.

A new carpenter shop has taken the place of the old one, larger and more convenient.

The old woodshed, long an eye-sore, has been torn down, there being no further need for it since the advent of natural gas.

Several out-buildings have been repaired and made more presentable.

The plumbing in parts of the building is being overhauled at the present time and a new system of water-closets is being placed in position.

Ordinary improvements have been made during the year from time to time, needless to mention specifically here.

IMPROVEMENTS NEEDED.

Chief among these, and most important, is the necessity for an addition to the building in order that all the deaf-mutes of the State may have the proper opportunity for receiving an education. The present accommodations are ample for not more than 300, if for that many. Because of this fact certain rules have been adopted that prevent mutes under ten years of age from entering the Institution, and after they do once enter make it obligatory upon them to finish their education within nine years, or leave without finishing. These rules

have been born of necessity, in order that a greater number may share in the fruits of an education. From the standpoint of present circumstances, these rules are right; but from the standpoint of justice they are wrong, and I feel that 'tis your duty to do something that will alter the circumstances. I call your attention to this matter, hoping that the necessary steps will be taken to lay the matter before the next General Assembly. In this connection I repeat what I said in my annual report two years ago:

"It is but justice to this class that the great State of Indiana—great in her wealth, great in her intelligence and in her school facilities—should extend every privilege possible to them and should provide adequate means for furthering their education and thus perfecting good citizenship. Shut out from the common schools, of which every citizen of Indiana is so justly proud, this Institution remains the place, and the only place in the State, where deaf mutes may receive their education, and it does seem that a grievous wrong is being done them in limiting their opportunity, their salvation almost, to the period named.

"The very fact that a pupil has failed to pass the different grades in the time allotted is strong and sufficient reason, in my estimation, why they should not be dismissed, but continued longer in the school. A speaking and hearing child can learn at all times, in school or out, by reason of being able to talk and hear, and consequently mingling with the world. But not so with the deaf-mute. After leaving his Alma Mater he can not, by reason of his misfortune, mingle with the world at large as does his more fortunate brother, and this source of receiving knowledge is denied him.

"The cause of this limitation you know well—'tis because of lack of accommodation for the number seeking admission, and hence, the time has been limited in order to give all an equal chance. For this same reason, the ages at which pupils shall be received has been fixed at 10 to 21 years, thus adding another wrong to the limitation of time, though probably it is a necessary outgrowth of the former and the whole wrong is perpetrated because of want of room that would be necessitated by taking them in at an earlier age, and extending the limit of time allowed, consequently extending the scope of studies.

"I am of opinion that deaf-mutes should commence receiving their education at six or seven years of age, in a Kindergarten, to be established in this Institution, and that the time allowed them in which to receive their education should be equal to that allowed speaking and hearing children, and I recommend that you take such steps to bring this about as you deem most wise and expedient. I feel that there is a wrong done in this matter, and that this wrong should be righted, and that speedily. Is it justice for the State to say that a more fortunate class shall receive greater benefits than a less fortunate one?"

For the reasons above, and for other reasons mentioned below, there is an imperative demand for additional buildings. As stated in this report elsewhere, there are at the present time on the roll entitled to admission 318 boys and girls, and you must bear in mind that all of these are over ten years of age as all admitted to the privileges of the Institution during the past few years have been governed by the rules and regulations above referred to. True, only 298 of this number have returned this scholastic year, but this fact does not signify they will not wish to return some time this or next year. If all had desired to return this year they could not have been received, because the limit of accommodation is little, if any, greater than the present number here; thus, 20 pupils are really denied school privileges. And in this connection it must be borne in mind that the number absent, entitled to return, is always greater than is given, for the calculation is made upon the relation of one year with another, those being absent two years being dropped out of sight altogether—in other words it is not a continuing number. In the past year or two at times more than 300 have been crowded into the buildings, but such crowding is not conducive to health. As a matter of fact, the State Board of Health visited the Institution during October, and in their report published subsequently complained of the "crowded" condition of the sleeping and living rooms, and were strongly of opinion that sanitary reasons demanded more room. Now, if the age of admission should be lowered, as justice demands, the increased demand for admission would amount to 100 more at least. This would show lack of accommodation for 120 deaf-mutes seeking an education. It must not be forgotten, either, in this connection, that as the general

population increases so does also the deaf-mute population, and in Indiana in a greater ratio. Now, if the term of years allotted for their education be lengthened as it should be, the number present at school each year would be much greater than in the past. A study of deaf-mute statistics in Indiana, the number of applications for admission, and the correspondence in this office, and the plain reasons for making the changes in regard to age of admission and time allotted for education, but too painfully show the great need of more room—room for at least 100 of each sex, if not 150. Several years ago plans and specifications were drawn by Edwin May, architect, now deceased, contemplating additions to the present buildings capable of accommodating 100 of each sex. The estimated cost at that time, September, 1878, was \$56,367.69, and contemplated an extension to the dining room, and also an extension to the north and south wings of the school house, and new wings north and south, for the boys and girls respectively. I feel, however, that the plans as then made are not just what is needed and would recommend that a new building to be known as

THE SCHOOL BUILDING

should be erected opposite the southwest corner of the main front building, containing on the first and second floors twenty-five school-rooms with a capacity for twenty pupils each, or in all for 500 pupils, while on the third floor should be located the Drawing and Painting Academy, a large reading-room and several rooms to be used in the future as school-rooms when the number of pupils shall exceed 500, as it certainly will.

GYMNASIUM AND SLEEPING APARTMENTS.

This being built, the old school building should be remodeled so as to provide a large gymnasium, as well as play and lounging rooms for boys and girls on the lower floor. As it is at present, the only place under cover for them, in cold or wet weather, is the study halls. No elaborate argument is needed to prove that this is as it should not be. Our sister States have provided their institutions with these necessary accommodations. Indiana stands alone without them. On the upper floors the old school-rooms should be transformed into sleeping apartments to accommodate the increased number.

DINING HALL.

With this improvement it would also be necessary to increase the capacity of the dining hall, which could be easily done by building an extension to the east of the present hall.

THE COST

of these improvements referred to above, I believe, will not exceed \$50,000, and the result would be a large, handsome and convenient group of buildings with all necessary conveniences, and adequate for receiving and taking care of all mutes who should and will apply for admission within the next twenty-five years. I therefore recommend that your honorable body take the necessary steps for securing an appropriation of \$50,000 from the next General Assembly for the purpose named. I desire to also call your attention to the fact that possessing these improvements we will have only what other States have already provided for their unfortunates. Knowing the absolute necessity therefor I do not believe the generous people of Indiana who have done so much for her unfortunates in the past, and especially for the care of the insane, will refuse aid at this time to so worthy a cause.

In this connection your attention is called to the following resolution, adopted at a reunion of the graduates and old pupils of the Institution :

Resolved, That we, members of the Association of Graduates and Former Pupils of the Indiana Institution for the Deaf, petition the Governor to recommend to the Legislature to make appropriation for the erection of suitable buildings to accommodate all the deaf children of the State, who are entitled to its benefits, and that a sufficient appropriation be made to enable the Superintendent to employ the best talent as instructors as the needs of the Institution may appear."

BOILERS.

There are at present in our engine house three boilers, one old and two new ones. The old one has been in use eighteen years, and is not as sound and safe as it should be. It is used in heating the green house, kitchen, wash house, and in running the machinery in the cabinet shop. The two new ones are used in heating the buildings, but are barely sufficient for

the purpose. I would recommend that two new boilers be purchased, one to take the place of the old one for the purposes named, and one to be joined with the two now used for heating the buildings.

For this a special appropriation of \$2,500 will be necessary, as the regular appropriation is entirely too small to be used in this way.

POWER PRESS.

I think it proper to also recommend that a power press be placed in our printing office. The one now in use is a second-hand Washington hand-press, not at all adequate for the needs of the office.

For this a special appropriation of \$1,500 would be necessary.

FOR MAINTENANCE AND REPAIRS,

during the fiscal years commencing November 1, 1889 and 1890, the amounts appropriated in past years will be sufficient—\$55,000 for maintenance and \$3,000 for repairs—this based upon an attendance of 300 pupils.

ATTACKS UPON THE INSTITUTION.

In conclusion I desire to say that the only attacks made upon the management of this Institution during the past year have emanated from and been instigated by three or four evil-minded persons, devoid of truth, honor or honesty, who have sought by slanderous methods to revenge themselves for their failure to be employed in this Institution. Their cries are the cries of disappointed place seekers—that and nothing more. With 346 pupils here during the past year, in not one single case has there been a complaint from parent, guardian or friend. On the contrary, many have been the words of commendation received, for all of which I feel thankful. Persons who are willing for corrupt and selfish ends to influence others by falsehood and fraud do not deserve to rank among men. Neither do those who lend their aid.

FINANCIAL AND BUSINESS TRANSACTIONS.

I deem it unnecessary to submit more than a brief summary of the financial and business transactions of the year, and refer you to the very complete and full exhibit in the succeeding part of this report as prepared by the Secretary for such further information as you may desire.

PROPERTY.

The value of real estate and personal property belonging to this Institution October 31, 1888.....	\$501,884 77
--	--------------

LIABILITIES.

Outstanding debts.....	\$728 99

Balance.....	
	\$52,824 24

Average number of pupils in attendance..	300
Net per capita expense.....	\$176 08

The last General Assembly failed to make the usual appropriations. During the past year the Institution has been operating under Sec. 2758, R. S., which provides that the Institution shall have the benefit of an amount equal to the last appropriation made. This has been allowed from time to time by the Governor, Secretary and Treasurer of State.

All the foregoing, and the tabulated statements, catalogue of pupils, and various exhibits hereinafter set out and hereof made a part, I respectfully submit as my annual report for the year ending October 31, 1888.

ELI P. BAKER,
Superintendent.

PUPILS BY COUNTIES.

The following table shows by counties the number of pupils admitted from each, the number dismissed during the year, and the number enrolled and entitled to the privileges of the Institution on the 31st day of October, 1888.

COUNTIES FROM WHICH ADMITTED.	Number Admitted.	Number Dismissed.	Number Remaining.	COUNTIES FROM WHICH ADMITTED.	Number Admitted.	Number Dismissed.	Number Remaining.

RULES AND REGULATIONS FOR THE ADMISSION OF PUPILS.

I. The Institution is opened to all the deaf and dumb of the State, of suitable age and capacity for receiving instructions, free of charge. For the present, and until additional accommodations shall be provided, pupils can be admitted only between the ages of ten and twenty-one.

II. Pupils will be admitted on the following conditions: 1. The pupils, well provided with clothes, are to be brought to the Institution punctually at the commencement of each season, unless detained at home by sickness. 2. The pupil is to remain in school until the third Wednesday in June in each year. 3. No parent or guardian shall be allowed to take a pupil out of the school during the session without assigning satisfactory reason.

III. The annual session of the school commences on the first Wednesday after the 15th day of September, and closes on the third Wednesday of June. Every pupil is to come promptly on or before the day of the session, and must remain until the last day of the same. The only exceptions allowed are cases of sickness.

IV. The Institution will provide for each State pupil, regularly admitted, boarding, lodging, washing, superintendence of conduct, manners and medical attendance, instruction, school

books, slates, and all other incidental expenses of the school-room, without charge, but will not pay the traveling expenses of pupils in coming to or returning from the Institution, nor supply them with clothing.

V. Those who are unable to pay for the necessary clothing, or whose parents neglect to supply them, it is made the duty of the Superintendent to furnish, in accordance with legislative enactments, as follows: "That when the pupils of the Institution for the Deaf and Dumb are not otherwise supplied with clothing, they shall be furnished by the Superintendent, who shall make out account therefor in each case against the respective counties from which said pupils were sent, in an amount not exceeding forty dollars per annum for every such pupil, which account will be signed by the Superintendent and attested by the seal of the Institution for the Deaf and Dumb, and the Treasurer of State shall charge the account thus certified to the county from which the pupil was sent, and collect the amount due from such county at each settlement with the Treasurer thereof, and such moneys shall be covered into the general fund of the State Treasury."

"When such account shall be received by the Treasurer of the proper county (to whom it shall be immediately sent upon its reception by the Treasurer of State from the Superintendent), such County Treasurer shall cause the same to be paid out of the county treasury to the Treasurer of State; and such County Treasurer shall collect the amount of such account from the estate of such pupil, if he have any, by suit, if necessary, in the name of the county."

VI. Each applicant for admission should come well supplied with clothing, and on all articles on which it is possible to mark the name of the pupil, it should be written with indelible ink. In all cases, except those clothed by the county, besides the ordinary supply of clothing, the applicant should deposit with the Superintendent a sum not less than five dollars, to defray incidental expenses, repairs on shoes, etc., any part of which remaining unexpended at the close of the session, will be returned. Each pupil should be supplied with a trunk.

VII. The Institution is not an asylum, but a school of learning; hence, no one can be admitted or retained as a pupil who, from sickness or from any other cause, is unable to pursue his or her studies successfully.

VIII. Nine years' time is allowed each pupil in which to receive an education, seven years being allowed for the Primary Department, and two years for the Academic Department. The course of study in the Primary Department embraces spelling, reading, writing, arithmetic, geography and grammar, while the Academic Department embraces a study of the sciences.

IX. It is the intention of the Trustees to render the pupils self-supporting, so far as practicable, so that every pupil, on leaving the Institution, shall be proficient in some useful occupation or trade, so as to be able to procure a livelihood without reliance on the charities of others. In accordance with this design, all the scholars will be required to labor a portion of each day—the girls performing the lighter kinds of housework and various kinds of needlework, as plain sewing or ornamental work, and dressmaking; and the boys at various trades, the necessary work about the Institution, and in the cultivation of the farm and garden.

X. All business letters or letters of inquiry in regard to pupils in the Institution, or those whom it may be designed to place there, should be addressed to Eli P. Baker, Superintendent Institution for the Deaf and Dumb, Indianapolis, Indiana.

XI. Those persons bringing pupils to, or taking them away, can not be furnished with board and lodging at the Institution.

XII. No pupil, unless under extraordinary circumstances, can be received at any time other than at the commencement of the session.

XIII. The Superintendent has the power to at any time discharge a pupil from the Institution for inability to receive an education, for failure to make the necessary progress, or for violation of the rules of the Institution.

XIV. The pupils will be sent home to spend the vacation, which extends from the third Wednesday in June to the first Wednesday after the 15th of September.

PHYSICIANS' REPORT.

Hon. Eli P. Baker :

SIR—As physicians in charge of the Medical Department of the Indiana Institution for the Education of the Deaf and Dumb, we herewith transmit a brief report for the year ending October 31, 1888.

It is our duty to give medical attention to the students who are so unfortunate as to be afflicted with disease, and give advice in sanitary matters.

We have the pleasure to report that the health of the pupils for the past year has been phenomenally good, and especially so when it is taken into consideration that the unfortunate condition of a large number of these children has been brought about by disease, which has to a considerable extent undermined their constitutions and in a measure rendered their systems more susceptible to disease, and less capable of resisting its ravages.

While in the Institution at least ninety per cent. of the pupils pass through a critical period of human life, during which time the body is weak and sensitive to external influences.

Within the year there has not been an epidemic of any kind. Scarlatina, measles, whooping cough, and other diseases common to childhood, did not make their appearance, and there was no serious illness nor deaths. A few years ago such contagious and infectious diseases as erysipelas, diphtheria, scarlatina and typhoid fever were nearly always present, but since the ventilation, plumbing and house-drainage has received particular attention, and the comforts and hygienic surroundings of the children has been carefully looked after, diseases of an infectious character, which were formerly so prevalent, now

rarely make their appearance within the walls of the Institution, all of which shows that the internal and external sanitary arrangements of the premises must be first class in every respect. If the high sanitary standard of the Institution which has been maintained for the past few years is continued, we have no hesitancy in predicting that the good health of the pupils will be continued. Respectfully submitted,

CHAS N. METCALF, M. D.,

Secretary State Board of Health.

JOHN E. LOCKRIDGE, M. D.

A Classified, Detailed and Itemized Statement
OF THE
RECEIPTS AND EXPENDITURES
AND OF THE
BUSINESS TRANSACTIONS
FOR THE
FISCAL YEAR ENDING OCT, 31, 1888.

To the Superintendent :

The following classified exhibits of the financial and business transactions of the year have been prepared by me from the books, bills and vouchers on file in this office, and are full and correct in detail, and will be found to contain all the facts and information upon these subjects, as required by law.

RICHARD O. JOHNSON,
Secretary and Book-keeper.

To the Board of Trustees :

GENTLEMEN—I submit the foregoing exhibits, Nos. 11 and 12, as an itemized statement and inventory of all the resources and liabilities of the Indiana Institution for the Education of the Deaf and Dumb on October 31, 1888.

ELI P. BAKER,
Superintendent.

STATE OF INDIANA, }
MARION COUNTY. } ss.

Personally appeared before me, a notary public in and for the said State and county aforesaid, Eli P. Baker, Superintendent of the Indiana Institution for the Education of the Deaf and Dumb, who, being duly sworn, upon his oath says that the foregoing exhibits 11 and 12 is a complete inventory of all the property, real and personal, belonging to the said institution, or belonging to the State of Indiana and connected therewith, or in use in and about the same, on the 31st day of October, 1888; and further says that the liabilities are as set forth in said exhibits.

Subscribed and sworn to before me this 15th day of November, 1888.

R. O. JOHNSON,
Notary Public.

1884 total expenses including all repairs.....	24,919 22
1885 total expenses including all repairs.....	26,617 44
1886 total expenses including all repairs.....	25,888 67
1887 total expenses including all repairs.....	28,142 90
1888 total expenses including all repairs.....	24,114 61

We call your special attention to the report of the Superintendent, herewith attached, which sets forth in detail the work of the Institution for the year.

We have since our last report put natural gas under the boilers and in all other places about the institution where fires were used. We find it very satisfactory and much cheaper than any other fuel. The saving in one year far exceeds the expense of piping and fixtures.

We again call the attention of the General Assembly to the fact that the boilers have now been in use about twenty years, and will hardly last through this winter. A special appropriation, sufficient to put in two new boilers, is absolutely necessary. The present building is not sufficient to accommodate all the pupils that should be provided for, and quite a number can not obtain the advantages of the institution.

Under the present economic system the annual appropriation of \$27,000 will meet the necessities for maintaining the institution. Also, the sum of \$2,000 will keep the buildings and premises in repair.

The health of the pupils has been quite good, and no accidents or disasters have visited the institution.

The Superintendent and his subordinates have been faithful and efficient in the discharge of their many duties, and we assure you that the mental and moral training of the pupils have been excellent.

Yours respectfully,

THOS. H. HARRISON, *President.*

CALVIN STOGDILL, *Secretary.*

HOWARD BRIGGS, *Treasurer.*

SUPERINTENDENT'S REPORT.

INSTITUTION FOR THE BLIND,
INDIANAPOLIS, IND., Oct. 31, 1888. }

To the Board of Trustees :

GENTLEMEN—I have the honor to submit herewith my *sixth*, and the *forty-second* annual report of this Institution, being for the fiscal year ending on this date, and containing a summary of such items of information as are required by law.

As I have regularly communicated to you during the past year information relative to the operations and progress of the several departments of the Institution, this report can not possibly contain much that will seem new to you, but, must of necessity, be mostly a recapitulation of such statements of facts as have already been submitted, in one form or another, and with which you are familiar.

THE INSTITUTION.

It is gratifying to be able to state that during the period covered by this report this Institution enjoyed a season of unusual prosperity. The health of the household has been good; the utmost harmony and kind fellowship have prevailed among the officers and teachers, and the pupils, with but few exceptions, have made commendable progress in acquiring a knowledge of the various branches of study and of the several trades in which they have been instructed.

The domestic department has been well and judiciously managed. The building throughout has been kept clean and in excellent order. The dormitories have always been well ventilated and dusted. The beds are clean and comfortable, and well provided with suitable covering. An abundance of good,

wholesome food has been supplied. It has been well prepared and varied in a manner conducive to good health. Every precaution of cleanliness and diet has been taken to secure safety from disease.

The ordinary annual repairs have been made, and the buildings and premises put in the best possible sanitary condition.

The appropriations for the support of the Institution have been judiciously and economically managed, and applied exclusively to their proper use as required by law.

Reviewing the work of the year, and taking everything into consideration, we feel justified in saying that during no equal period in the history of this Institution has it been in a better or more progressive condition, and certainly at no time has the instruction been more practical or beneficial to the pupils. But, notwithstanding the results of the year's work have been, in many respects, highly satisfactory, we have not accomplished all we desired to accomplish or that, under more favorable circumstances, we feel we could have accomplished. Our earnest aim and conscientious desire have been to raise this school to the highest possible plane of usefulness, and to have it occupy a creditable position among the other public institutions of learning in the State. But we have been greatly embarrassed in our efforts in this direction, by our limited accommodations and facilities for doing the work we desire to do, and that ought to be done in a school of this kind.

A system of instruction in a school for the blind, as in a school for the seeing, is a thing of gradual development and growth. As time passes on, the number of pupils in attendance gradually increases, new and varied interests are presented, and we discover that those whom we are instructing, are capable of advancing to higher degrees of attainment in their studies and other lines of training; all of which lead to the making of necessary changes and improvements in our methods of teaching, and to a demand for additional and better accommodations. We have modified and amplified our system of instruction in numerous ways to keep pace with the improvements gradually making in educational work, and we are now able to produce results hardly deemed possible ten or fifteen years ago; but in buildings and improved furniture and apparatus, we are sadly deficient. This has been the greatest hindrance to our progress and the successful management of

this school, with which we have had to contend. The buildings of the Institution are by no means sufficient to properly accommodate all the blind of the State, who are justly entitled to its advantages, and to enable us to properly and successfully conduct the work of the several departments of the school.

The main building of this Institution was erected nearly forty years ago, and was designed to accommodate a school of about eighty pupils. Now, notwithstanding the population of the State has more than doubled in the last four decades, little or no additional provision has been made for the benefit of the increased number of blind children, and practically nothing has been done by the State, to aid us in our school work, to keep abreast with the improved and modern methods of instruction in institutions of this character. While we boast and are justly proud of the ample provisions that our State has made for the comfort and amelioration of the condition of most of our unfortunate and deficient classes, it can hardly be said that even justice has been done to the blind.

If we hope to maintain our high position among the best institutions of this kind in the land—and it is most certainly desirable to do so—some additions and improvements must be made to the buildings of this Institution, so that we may be able to admit more pupils and have the means by which to prosecute more successfully the work of instruction.

It is most earnestly hoped that the coming Legislature will give this matter due and careful consideration.

THE PURPOSE OF THE INSTITUTION.

Although an effort has been made repeatedly to give the public information relative to the aims and purposes of this Institution, the people generally do not seem to have a proper idea of its true character. It is not, as many suppose, an asylum for blind people of all ages, nor a hospital for the especial treatment of diseases of the eyes, and ought not, in any sense, to be so regarded; but it is strictly educational in all its interests. It is, indeed, a branch of our system of public education, and, as such, is entitled to as much consideration and care as our State University, State Normal School, or any other State institution of learning.

It is the policy of this State to educate all her children capable of receiving instruction, to the end that they may become good citizens and be able to properly discharge the ordinary duties of social life. *All* are equal in the eyes of the law, and *all* are entitled to the same educational advantages. But here is a very unfortunate class of children, who, because of their affliction, can not receive the full measure of benefit to which they are entitled, and which their more favored brothers and sisters enjoy, in the schools provided for the seeing. What, now, in justice, is to be done for them? Why, the State, true to the principle of even justice to all, has come to their aid and has established this school for them, wherein special privileges are accorded and special means employed in the work of instruction, so that the difficulties these defective children encounter in their efforts to obtain an education, may, in a measure at least, be overcome. This, then, is the purpose and object of this Institution. It is truly a noble benevolent enterprise, and deserves the recognition and support of all benevolent people in the State.

I am led to remark in this connection, that it must be apparent to any considerate person that the per capita expense for conducting successfully an institution of this kind must be greater than the cost per capita to maintain any other institution of an equal number of inmates. The very nature of the organization makes it so. The division of the work of instruction into three departments, literary, musical and industrial, each of which is really a school of itself; the special means employed in the work of teaching, together with the peculiar nature of the work to be done, and the individual attention the pupils require, make it necessary for us to employ a larger force of teachers and other employes than would be required to do the work of a school composed of the same number of seeing pupils, and hence, the cost per capita to maintain this Institution is necessarily greater than it would be, if the organization were less complex, or if the pupils were less dependent. It is very unfair to make a comparison between the working force and the expenses per capita of this Institution and those of any other, and he who does so only exhibits a narrow conception of the character and importance of this work.

THE LOCATION OF THE INSTITUTION.

This Institution is most advantageously situated. It would, indeed, be difficult to find, in or about the city of Indianapolis, grounds more suitable for the site of the Institution than those upon which it is located. These grounds, comprising an area of about eight acres, were purchased in 1847 for the sum of five thousand dollars. Time has served to demonstrate the consummate wisdom and foresight of the first Board of Trustees, Messrs. George W. Mears, Seton W. Norris and James M. Ray, in purchasing this tract of land at that time for the site of the Institution. When the purchase was made, this piece of ground was just outside of the limits of the city of Indianapolis. North Street, the southern boundary of the Institution grounds, was then the northern corporation limit. But Indianapolis has rapidly spread-out northward, so that the Institution is now nearly in the center of the city, and the grounds form two full squares in the most healthful and desirable part of it. These grounds have greatly enhanced in value, and to-day, are worth upwards of *two hundred and fifty thousand dollars*.

The Institution is surrounded by many of the best private residences of Indianapolis, and in the neighborhood can be found churches (some of which are the largest in the city), of ten or more different denominations. Its location, therefore, affords our pupils superior advantages for attending church, lectures and entertainments, both literary and musical, all of which are highly beneficial to them and highly appreciated. It also gives them superior opportunities for mingling with seeing people, whereby they become acquainted with some of the customs of polite society, and are thus led to correct, in a degree at least, some of the idiosyncrasies which many young blind people exhibit in their conduct.

These are advantages the value of which can be fully understood and appreciated by those only who are engaged in the work of training this class of children, and who come into daily contact with them. They should not for a moment be disregarded by the members of the coming or any succeeding Legislature in any attempt that may be made by designing and selfish parties, to induce them to remove this institution beyond the limits of this city. Already there are strong indications that an effort will be made, sooner or later, to compass such

legislation; but such an act would be a cruel injustice to the blind children of the State, and would deserve the condemnation of all benevolent people. True, these grounds have become valuable, but the advantages referred to are invaluable to a class of unfortunate children, who especially deserve our support and commiseration. Therefore, it is earnestly hoped that every attempt to induce the Legislature to remove this institution to a location whereby the pupils will be deprived of any of the privileges which they now enjoy, will be promptly repelled.

THE CONNECTION WITH OTHER INSTITUTIONS.

To associate this institution with others whose purposes and interests are entirely different, under the head of "Benevolent Institutions," seems to be a very strange classification. As has been suggested elsewhere in this report, this is purely an educational establishment, and rightfully belongs to the State Department of Education; and to associate it in any way with a hospital whose sole purpose is the treatment of insane people of all ages and conditions, is nearly as ridiculous as it would be to list it with the penitentiaries under the head of "Penal Institutions." It is not the other institutions themselves to which we object, but the fact of this one being classed with others of entirely different aims and interests.

This classification, we are quite sure, is the principal cause for the misconception in the minds of the people relative to the real character of this school. This ought to be corrected by disassociating it from all others, and placing it before the public in its true character.

Furthermore, this relation has been a source of considerable embarrassment to us. It has placed this Institution in such position as to make the management unwillingly bear a part of the criticism and condemnation which have been passed, justly or unjustly, upon the management of other benevolent institutions over which we have not had the least control. This is an injustice against which, we feel, we have a right to earnestly protest. Every institution in the State ought to be made to stand before the public on its own merits. Where there is proper management let the fact be known and due credit accorded, as an encouragement for conscientious discharge of duty; but, on the other hand, where the management is faulty,

let the condemnation be direct and severe, and continued until a change is effected. The management of our institutions is a matter of so serious import as to elicit the attention and serious consideration of honest people throughout the State.

THE SCHOOL TERM.

The rules of the Institution require that the annual term of the school shall commence each year on the second Wednesday of September, and continue through a period of forty consecutive weeks. But, owing to the fact that the second Wednesday of September occurred late in month (on the 14th) last year, it was deemed advisable to open the school one week earlier than the date specified by the rules, and thus avoid continuing the term into the latter part of the month of June this year. The change was fully appreciated by all connected with the school, at the close of the term.

The last session, therefore, commenced September 7, 1887, and closed on Tuesday evening, June 12, 1888. The whole number of pupils enrolled during that period was 128—sixty-eight males and sixty females.

	<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
Number of pupils enrolled who were in attendance the previous session ...	59	52	111
Number of new pupils admitted.....	9	8	17

There is no limit fixed by law to the number of pupils that may be admitted to this Institution from any one county in the State. It is intended for the education of *all* the blind children in the State, of proper age, and capable of receiving instruction.

CONDENSED STATISTICS.

Although it is intended by this report to give only an account of the condition and operations of this Institution for the past year, I beg leave to present again, with some slight changes, the following condensed statistics which appeared in my report of October 31, 1886; for, those who are especially interested in the afflicted and dependent classes, and seek information relative to the number, ages, condition and improvement of the blind, will naturally expect to find it in these public documents:

According to the tenth census, there were 48,928 blind people, of all ages and conditions in the United States in 1880, less than 1,000 for every one million of population. Of these, 26,748 were males, and 22,180 females. The total number enumerated in Indiana was 2,238—1,226 males and 1,012 females.

The whole number has been divided into six classes, or divisions, according to age, as follows:

Number under 1 year old.....	108
Number 1 year old and under 6	1,103
Number 6 years old and under 16.....	4,820
Number 16 years old and under 21	2,948
Number 21 years old and under 60.....	19,651
Number 60 years old and over	20,298
Total	48,928

It will be seen by these figures, that 39,949, or 82 per cent. of the whole number of blind in this country in 1880, were adults, and that but 8,979, or about 18 per cent., were under 21 years of age.

We also learn from the census of 1880, that there were in the United States, 7,173 blind children between the ages of 8 and 21 years, or about 145 to every one million of population. These are the minimum and maximum ages at which pupils are usually admitted to institutions for the blind. During the same year there were enrolled in the twenty-nine institutions then in the several States, according to the reports of the Superintendents, 2,245 pupils, or 31 per cent. of the whole number of school age. In 1887 the number of pupils enrolled in all the institutions in this country was 2,773, which, allowing for a reasonable increase of the number of school age, could not have been more than $33\frac{1}{3}$ per cent. of the whole number between 8 and 21 years of age.

Upon the basis of the ratio of 145 to every one million of inhabitants, there are in Indiana to-day about 280 blind children of school age, of all states and conditions. We enrolled during the last fiscal year, 144 pupils, or $51\frac{1}{2}$ (nearly) per cent. of the whole number. It will thus be seen that the per cent. of attendance at this institution is much larger than the average per cent. of attendance at the several institutions for the blind in the United States, and that it compares favorably with the attendance of the more densely populated States.

INSTRUCTION.

The matter of deepest concern under the head of instruction in a school of this kind is to arrange a course of study and training that shall be adapted to the mental and physical condition of the pupils, and result in the culture of all the varied faculties of the human mind.

In order that the objects of education here may be fully attained, it is of the greatest importance that the course of instruction should be judiciously arranged with regard to several points: (1) The subjects must be attractive; (2) they must be selected to meet the widely varied capacities and conditions of the students under our care; (3) they must be selected with a view to fitting the pupils individually for some useful employment when they leave the school.

The first of these considerations is of the utmost importance during the first two or three years of the pupil's school life. Many of our pupils upon entering school, on account of their affliction, have seasons of deep sadness and despondency. Especially is this true with regard to those who once possessed good sight, but lost it by accident or disease. Little can be done for such pupils in the work of education while they are in that condition. They must be lifted out of it before they can make much progress, and this can be done best by attractive subjects of study and by a pleasing and entertaining manner of teaching. In time, and as they progress, they are led to feel that they are able to accomplish more than they at first supposed, and consequently the periods of despondency become less frequent. By the second consideration, the pupils are expected to be engaged in such studies and lines of effort, as are best suited to their individual tastes, bent of mind and physical condition, and in which they can make the most rapid progress and achieve the best results. The third, of course, pertains to the practical, the bread winning side of education. It is our earnest endeavor to give these pupils such instruction and training, as shall fit them to assist, at least, to earn their own living when they go forth into the world.

No material change was made during the year in the division of the work of the school; but, as heretofore reported, instruction was given in three distinct departments, namely, *Literary*, *Musical* and *Industrial*.

LITERARY DEPARTMENT.

Every opportunity has been employed to add interest and value to the work of this department.

The primary object is to give the pupils, if possible, a good English education. But it is apparent to any one possessing experience in the development and training of the faculties of the human mind, that the education of a class of students deprived of the principal sense by which information is obtained, is necessarily slow and attended with many difficulties, and requires close thought and keen observation on the part of the instructor, when considering and choosing methods for accomplishing the results desired.

Here, as in any system of training, we regard intellectual culture as the foundation of all educational work, and as furnishing the most valuable aid to success in every important effort in life. It is a potent agency in opening to our pupils avenues of usefulness and social equality.

There are six grades in this department in charge of five faithful and competent teachers, Mr. D. W. Nelson, Miss O. H. J. Harris, Miss Blanche Croxall, Miss Lizzie Hopkins and Miss Jennie Schofield. They have been patient and considerate in their work of instruction, and have employed various means to inspire their pupils to earnest effort in prosecuting their studies.

The course of study comprises reading line-type and point-print, writing script and New York point, orthography, memorizing, declamation, object lessons, arithmetic, algebra, geometry, geography, history, English grammar, physiology and hygiene, physical geography, natural philosophy, rhetoric, chemistry, mental philosophy and civil government.

The several classes were regularly examined during the term by the Superintendent. On every occasion the pupils, with but few exceptions, gave evidence of making good progress in their studies, and showed a degree of knowledge of the subject matter of the branches taught them, that was creditable alike to themselves and their teachers.

MUSICAL DEPARTMENT.

It is a pleasure to report that the high standard of efficiency of this department has been well maintained.

The instruction in the several branches of music has been conducted in the same line of steady and consistent progress and improvement as heretofore, and some of our pupils have attained the ability to render, both vocal and instrumental music, in a manner that has elicited the highest commendation from professionalists and others, who have had the pleasure of listening to their performances.

As the moral effects and practical bearings of music upon a system of education are of such vast importance, all our pupils are permitted to take some part in it. Of course, the same differences of talent are exhibited in the study of music, as in any other department of education, and, possibly, only a few

of our students may ever attain distinction in the art, yet all may make some progress in it, and certainly, all are greatly benefited by the exercise.

No one, who has had experience among the blind, doubts that the culture in music we give our pupils tends to make them more tractable and more companionable, and aids to bring them into better social relation with the world.

For general instruction in vocal music the school is divided into two classes, called, on account of the ages of the pupils, the senior and junior choirs. Three hours each week are devoted to the former for practice, and two to the latter. Thirteen pupils received instruction on the cabinet and pipe organs, forty six on the pianoforte, fourteen on brass band instruments, and twenty-four received private lessons in voice culture.

During the year the normal teaching exercises, in which some of our older and more advanced pupils in music participated, were given the usual amount of attention and care. By these exercises, we aim to give those pupils who expect to engage in the work of teaching music as a means of earning a living when they leave school, such instruction in methods and such practice in the art of teaching as shall fit them to pursue successfully their avocation. This is comparatively a new interest in this school. Its importance is apparent, but we are forced to record that, owing to our limited facilities, we have not accomplished all in this line that we desired, or that its importance demands.

We have availed ourselves of every opportunity to inspire additional interest in the instruction in the use of the cabinet and pipe organs. The experience of another year has confirmed the conviction expressed in my last annual report, that there is probably no part of our system of training in music, that can be turned to better account by many of our pupils, in an effort to earn a living, than instruction in the use of these instruments. Especially is this true with regard to instruction in the use of the cabinet organ to those pupils whose homes are in the country or in small towns, where there are no pipe organs and but few pianofortes, and where, if they expect to give instruction at all in instrumental music, it must be done on a cabinet organ.

Another eminently practical and useful branch of this department, is the training of students in the art of tuning and

repairing pianos. This is an occupation in which blind persons often excel, and in which those, who have acquired the ability and skill to do the work well, have been able to earn a fair living. The contract for tuning and keeping in good repair the pianofortes used in the public schools of Boston, Mass., has been awarded for a number of years consecutively, to the tuners of the Perkins' Institution for the Blind, at South Boston. I refer to this fact briefly, to show the practical value of this branch of instruction in music, and the possibility of blind persons becoming proficient in it. Although some of our pupils have made commendable progress in this trade, we are sadly deficient in the facilities necessary to enable us to give the instruction in it in a systematic and thorough manner, and hence, we have not been able during the year, to secure the best results in this particular line of training.

The teachers of music have discharged their duties with diligence and care, and have evinced a deep interest in the welfare and progress of their pupils. During the latter part of last November, Miss Addie Carman, one of the teachers in this department, tendered her resignation which was accepted. She was a good teacher and rendered satisfactory service in the Institution. The vacancy was filled by the appointment of Miss Blanche A. Donnohue, of Greencastle, Ind., who continued the work with ability and without any apparent interruption.

INDUSTRIAL DEPARTMENT.

The Industrial Department constitutes an important part of our system of training, and no means at our disposal have been spared to add to its efficiency and make the instruction herein thorough and more practical. While we do not undervalue, in the least degree, the many benefits to be derived from intellectual and musical culture, yet, we feel, that in a school for the blind too much attention can not be given to industrial education; for we recognize the fact that the mental stamina and natural inclination of many blind youths are such, that, if they are fitted at all by training, to earn their own living, it must be done by teaching them some useful trade. Furthermore, to be occupied in some congenial handicraft and be able to manipulate the different parts of simple machinery and different kinds

of material, are not only sources of great pleasure to the blind, but they furnish means by which habits of industry, perseverance and activity are cultivated. They also serve to divert the thoughts of this unfortunate class from a gloomy contemplation of their deprivations, and thus they are made more cheerful, happy and contented. Especially is this true when the employment is remunerative, and they are able to earn an independent livelihood, and are not dependent on sympathy for support. Therefore, no scheme for the education and training of the blind, that does not provide for a well-equipped and well-regulated Industrial Department, is complete. Different light trades or other useful employment should be taught all the pupils, with but very few exceptions.

Industrial instruction in this school is given in two distinct sections, namely, the Work-Room for the Girls, and the Work-Shops for the Boys.

THE WORK-ROOM FOR THE GIRLS.

The instruction in the work-room has been conducted during the year with care and fidelity. This room, most of the time, is a scene of cheerful activity and earnestness. Much of the interest manifested here and the satisfactory progress made by the pupils in the work assigned them, are due to the energy and judgment of Miss Livonia A. Mason, the teacher in charge of this room.

All the girls in the school are instructed in some handiwork. They are taught sewing by hand and machine, knitting, crocheting and cane-seating, and to make a variety of articles of fancy work, which, on account of their utility, are always salable, and hence, afford a source of profitable and pleasant employment.

We have practically demonstrated here, that seating chairs with cane is a pleasant occupation in which females can engage with success. Notwithstanding our space is limited, several years ago we placed a few forms for cane-seating in the work-room, and commenced giving instruction in that trade to a number of our larger girls. The work has grown in interest and most of the pupils engaged in it have made excellent progress. It has opened to them a new avenue for employment and the means for earning fair wages.

We believe that the training of young girls in domestic pursuits would be a valuable addition to our industrial education, but our present limited facilities will not admit of our commencing such work now.

The following is a list of articles made in the work-room by the pupils during the past year :

Napkins, pupils.....	183
Napkins, officers.....	24
Pillow cases, pupils.....	107
Pillow cases, officers.	44
Sheets, pupils.....	32
Sheets, officers.....	17
Towels, pupils.....	24
Towels, roller, pupils.....	8
Wash-cloths, hemmed	19
Table covers, pupils.....	14
Pillow shams, pairs.....	2
Drawers, pairs.....	14
Night dresses	8
Skirts.....	5
Aprons.....	4
Dresses	3
Corset covers.....	5
Pieces of bead-work.....	644
Pieces of worsted-work.....	38
Patterns in worsted	117
Chairs, cane-bottomed.....	317

The following account shows the receipts and expenditures in favor of the work-room for the girls during the year :

Cr.

By amount received for manufactured articles sold during the year.....	\$125 56
By value of manufactured articles on hand, October 31, 1888.....	81 87
By value of material on hand, October 31, 1888.....	97 59
Total	\$305 02

Dr.

To value of manufactured articles on hand at close of last year	\$68 90	
To value of material on hand at close of last year	126 88	
To amount paid for material during the year ending October 31, 1888.....	8 56	
To cash paid girls (pupils) for voluntary over-work	37 45	
To balance in favor of department.....	63 23	
Total		\$305 02

THE WORKSHOPS FOR THE BOYS.

The training in this branch of industrial education has been conducted during the past year, we are pleased to say, with unremitting energy and zeal, and with a reasonable measure of success.

We have not been prepared to introduce any new trades into the shops, but most of our older pupils, and a number of the younger ones, have been carefully and skillfully drilled in the several steps of broom-making and cane-seating chairs. These trades seem to be more profitable and offer greater assurances of success than any other in which blind young men can engage in this State. They are certainly simpler, require less machinery, less outlay of money for materials, and less assistance from seeing persons than any other, and, besides, the products can be readily disposed of. All these things should be carefully considered in selecting trades for the blind. The question with us is not, What trades can blind people learn?—for it is difficult, indeed, to tell what they can not learn, by time and effort—but, What are the most profitable for them when learned? What the most easily managed? and What requires the least assistance from others?

The managers of the shops, Mr. J. M. Richard, teacher of broom-making, and Mr. A. J. Cochran, teacher of cane-seating, have been industrious and faithful in the discharge of their respective duties, and the pupils in their care have made commendable progress in their work.

MORAL INSTRUCTION.

We regard the moral and social training of our pupils as a matter of the utmost importance. Without a careful development of their moral nature our instruction would, indeed, be incomplete. That the education of the blind should be a moral and religious one is so well established in the minds of those engaged in their education, that there seems to be an entire absence of controversy upon the subject among them. All, in this matter, are willing to put aside their religious differences, and to be intent only upon doing the best they can for these afflicted members of society.

The Bible is our code of moral instruction. It is read every morning as a part of our regular chapel exercises, but nothing is permitted to be said or done at any time to give a sectarian bias to the mind of any one, or that a sensible person of any denomination would object to.

When the weather is favorable, and the health of the pupils will permit it, they are required to attend public worship at least once every Sunday, at such place or church as their parents may select. Many of them also attend Sunday-school and other services held at the several churches in the neighborhood of the Institution.

HEALTH.

We are glad and profoundly thankful, to be able to say that the general health of the school during the past year has been good. Of course, in an institution of this kind there are always present some children, who are suffering with chronic diseases, and others who have inherited weak constitutions and are physically frail. Yet most of our pupils were blessed during the year with good health.

Within two months after the opening of the last school term, and during a period when typhoid fever was quite prevalent in Indianapolis, and almost epidemic in some neighboring towns, two of our pupils, one boy and one girl, were simultaneously taken ill with this disease. They were promptly given the most skillful medical attention, and watchful care and nursing, and, in due time, both fully recovered and resumed their work in the school. They evidently had contracted the disease at their homes during the summer vacation.

During the latter part of last March measles broke out in the Institution, and twenty-four of our younger pupils and two of the help were attacked by the disease. Happily, by prompt and judicious treatment and good nursing, they all soon recovered, and no serious results followed. No other contagious disease invaded the school.

But one death occurred among the pupils during the year, and that occurred outside of the Institution. Jerry Lyons was one of the brightest and most-promising students in the literary departments of the school. He was persevering and excelled in all his efforts. But during the spring of 1885 he began to show symptoms of lung weakness, which soon developed into confirmed phthisis. He had a strong will and heroically contested the progress of the disease, and remained with his class as long as it was possible for him to do so, even against the advice of his teachers and the wishes of his friends. Finally, however, after a contest of nearly two years, he was forced to yield. He returned to his home in Anderson, Indiana, in December last, where he died January 19, 1888. Jerry was beloved and respected by his teachers and classmates, and his loss was deplored by all.

I take this opportunity to express my hearty appreciation of the faithful and intelligent service rendered the Institution by the attending physician, Dr. B. French Stone. He responded cheerfully and promptly to every call made upon him, and otherwise discharged his duties in a manner creditable to his high professional standing.

For further particulars regarding the health of the Institution, and the causes of blindness, I respectfully refer you to the Physician's Report herewith appended.

IN MEMORIAM.

It becomes our painful duty to chronicle in this report the death of one of our officers—Mrs. Eliza J. Tarlton, which sad event occurred suddenly on the evening of the 27th of last December. Mrs. Tarlton was with us on Christmas, and, as was her wont, she entered heartily into the enjoyment of the festivities of the day. Two days later, December 27, she, in apparently good health, accompanied by her adopted daughter, left the Institution in the evening about seven o'clock, to attend a

Christmas entertainment at the Fourth Presbyterian Church of which she was a member. She seemed to heartily enjoy the exercises of the occasion, and at the close of the last number of the programme, to which special attention had been called, it is said she exclaimed, "O, how beautiful!" and without a moment's warning or an opportunity to say last words to loved ones, expired.

Mrs. Tarlton had been connected with this Institution in the capacity of housekeeper for a period of nearly two and a half years. She entered cheerfully upon her duties, and took an interest in the welfare of the school. To the pupils she was a kind and sympathetic friend; whatever interested them she became interested in, and her influence over them was most salutary. Being of a self-sacrificing and generous disposition, and possessing fine social qualities, and exemplifying everywhere the principles of a genuine Christian character, she was highly esteemed by all who knew her, and held a warm place in the affections of those with whom she was immediately associated. Her death was a blow we all felt.

Upon the request of the officers and teachers the funeral services were held in the Chapel of the Institution. Her pastor, Rev. Geo. L. McNutt, officiated, assisted by Rev. Dr. S. M. Keen, pastor of Roberts Park M. E. Church. The music for the occasion was furnished by the pupils of the Institution, and was very touching and impressive. May we not say, "After life's fitful dream she sleeps well."

It is a fact worthy of note in this connection, that this is the first death that has occurred among the officers and teachers of this Institution, while officially connected with it, during a period of twenty-six years.

FINANCES.

The report of the Treasurer herewith submitted, shows that the finances of the Institution are in a satisfactory condition, and that the moneys appropriated for its support have been carefully and judiciously managed.

Frugality and strict economy, in connection with care and thoughtful discretion in providing everything needful for the Institution, have been our practice. Notwithstanding every want of the school with its present facilities, has been judiciously met, an abundance of the best and freshest articles of

food supplied, and the necessary repairs of the buildings and premises carefully considered and made, a large portion of the appropriations still remains unexpended.

The financial statement shows that the total amount expended during the fiscal year was \$24,014.61—\$22,444.69 for maintenance and \$1,569.92 for repairs, leaving a balance of the appropriations (\$29,000) of \$4,985.39; adding to this \$253.91, the earnings of the Institution, and \$177.90, the amount collected by the Treasurer of State on account of clothing, etc., furnished the pupils, the aggregate amount of the resources of this Institution covered into the General Fund of the State Treasury during the fiscal year just closed, was \$5,417.20. This amount added to the unexpended balances of the appropriations for the four years preceding the last one, makes a total of \$18,528.96 of the resources of this Institution covered into the State Treasury during the last five years.

If these annual balances could have been placed to the credit of this Institution, to be drawn upon at some future time, as we suggested in a former report they should be, we would now have accumulated a fund equal to at least one-half of the amount required to make the necessary additions to the buildings, and for which we are now forced to ask the Legislature to make a special appropriation.

INDIGENT GRADUATES' FUND.

An account of the origin of this fund, and the purposes for which it is to be expended, has been given at length several times in former annual reports, and hence, it need not be repeated in this one. Briefly, therefore, this fund is a bequest from Mrs. Nancy Fitzpatrick, of Muncie, Indiana, who died on the 15th day of March, 1871. It was left in trust to the Superintendent of this Institution, to be expended by him for the benefit of needy graduates of the school, in such manner as may seem most judicious to him.

The following is an exhibit of the condition of the fund at this date :

Cash on hand November 1, 1887, and placed at interest for one year.....	\$476 85
Interest on same for one year at 6 per cent., due November 1, 1888.....	28 61

Total amount available.....	\$505 46
Amount due the fund from Beckner & Sayce, blind young men manufacturing brooms at Arlington, Indiana.....	\$22 15
Value of one set of broom irons on hand.....	8 00

Total balance in favor of fund..... \$535 61

No demands were made for aid from this fund during the past year.

IMPROVEMENTS AND REPAIRS.

During the summer vacation the buildings and premises were systematically and thoroughly cleaned, and the necessary annual repairs made. Our aim has always been to protect the property from the ravages of decay, and secure the best possible sanitary condition.

Most of the pupils' dormitories in the main building, the dormitories and halls on the third floor of the shops, the hospitals and bath-rooms, the pupils' wash-rooms, several ceilings on the first floor, and the ceilings of the halls on the fifth floor of the building, were calcimined or whitewashed, and otherwise put in good repair.

The ceiling of the Girls' Work-room was repaired and painted, and the walls re-papered. The walls of the halls of the fifth story and the ceilings of several rooms were also painted with oil and lead paint, and the walls of two private rooms were newly papered, and for two, new ingrain carpets were purchased. A new body-brussels carpet was purchased for the larger of the suite of rooms occupied by the Girls' Governoress, and the ceiling and walls papered with gilt paper of good quality and handsome pattern.

The large lead-lined tank which was located on the fourth floor of the west wing of the main building, and which, for a number of years had caused a great deal of trouble by leakage, was removed, and two iron tanks put in its place. These tanks

are cylindric in shape, and have together a capacity of about sixty barrels. They are so located and connected that one can be shut off while the other may be in constant use, and thus avoid an undue weight on the joice and walls of the building.

The steam and water pipes extending from the main tunnel in the yard to the work-shops, were found to be in a very bad condition, and were replaced with new ones. The plank trough in which these pipes were laid was also removed, and one put down with sides and bottom made of brick.

The sides of the steps of the front entrance to the building and the iron fence around the front yard, were painted with two coats of oil and lead paint. The board and picket fences about the premises were repaired, and some of them painted.

The grounds about the buildings have been well kept and always present an attractive appearance. Much of the beauty and attractiveness of the yards is due to the energy, taste and skill of our gardener, Mr. George Graham. The condition in which they are always kept is a credit to the State and highly appreciated by the citizens of Indianapolis.

NATURAL GAS AS FUEL.

During the month of September last a contract was made with the Consumers' Gas Trust Company, of Indianapolis, to furnish the Institution with natural gas for fuel for a period of one year; said gas to be used under the three boilers in the engine house, in the laundry stove, in the bakery, in the kitchen and to heat the green-house. In compliance with the contract, the company laid a four-inch gas pipe connected with their mains, to a point in front of our engine house. From this point and from one other connection on the line of the four-inch pipe referred to, the pipes were extended to the several places mentioned, and the necessary attachments made at our expense. We have been using the gas for some time, and are pleased to say that it is giving general satisfaction. If the gas holds out, this will prove quite a saving to the State. The cost for gas for one year added to the total cost for piping, will not exceed \$1,150, which is about \$500 less than the total amount paid for fuel for this Institution last year. Hereafter the saving will be about one thousand dollars each year.

RECOMMENDATIONS.

Although we have improved every opportunity to advance all the interests of this school and make the work of every department more thorough and practical, and to have it occupy an honorable place among the thirty schools of its kind in America, yet it is apparent to any one who has taken time to look into the matter, that we have been greatly retarded in our progress on account of our lack of facilities.

While it would seem, as has been suggested in substance elsewhere in this document, that the State has made ample and bountiful provision for the benefit of the helpless and unfortunate classes within her borders, it is nevertheless a fact that for many years little or nothing has been done by the Legislature to increase the capacity or add to the efficiency of this Institution; and, in the meantime, the school in numbers, and in character and importance of work, has outgrown the buildings. It is earnestly hoped, therefore, that the attention of the coming Legislature will be called to the pressing needs of this Institution, and that an earnest and persistent effort be made to induce it to make such appropriations for its relief, as the exigencies of the school demand. To this end, I respectfully recommend that the Legislature be asked to make, besides the usual appropriations for maintenance and ordinary repairs, appropriations for the following specific purposes:

First. Five thousand dollars for the purpose of furnishing a plant of new boilers for heating the buildings of the Institution. This is an imperative necessity. The two large boilers now in use were made and put in place in the spring or summer of 1869—over nineteen years ago—and they are about worn-out. That is a long time, as every one of experience knows, for a nest of steam boilers to be in use. They have been examined by an expert boiler-maker, and he has reported that, while with care and judicious management we may get through the coming winter with them, it will be extremely dangerous and very injudicious to undertake to use them through another winter. I would suggest, in this connection, that, if new boilers are provided, some change be made in the position in which they are placed, so that more room may be given to the engine and pumps, and that the engineer may be enabled to go about the machinery with greater alacrity, and less fear of being injured.

Secondly. Forty thousand dollars for enlarging the buildings, for the following cogent reasons :

1. That larger, better arranged, better ventilated, and better lighted school-rooms may be provided.

2. That the dormitories may be increased in number and better arranged, and thereby enable us to admit a class of worthy adult blind people who have hitherto been denied the benefits of the Institution. Some of them will soon be beyond the age when they can be benefited by instruction, and will then, most likely, become a charge upon the State for the rest of their lives.

3. That a library may be provided, in which to keep properly classified the pupils' embossed books. At present they are stored, in an unclassified manner, in the corners of the school-rooms, where they are not only unsightly, but are constantly in danger of being damaged. Also, that comfortable rooms may be furnished the pupils, in which to sit and quietly pursue their studies.

4. That additional room and increased facilities may be furnished the musical department of the school, especially for giving instruction in the art of repairing and tuning pianos.

5. That we may have better accommodations for conducting the training of the girls in industrial work, and be able to organize a kindergarten department in connection with the work-rooms.

6. That the apartments used for kitchen, dining-rooms, bath-rooms and hospitals may all be enlarged and improved.

These improvements can all be made, we think, by extending the east and west wings of the main building about forty feet northward, and constructing a passage from one to the other across the court, and ought not, by judicious management, to cost more than the forty thousand dollars asked for.

With these additions this Institution would enter upon a new era. We have as able a staff of instructors, and as bright and active a class of pupils, as can be found in any institution, and with these increased facilities, and the superior advantages of the location, this school would soon occupy a place second to none of its kind in the land.

THE CURRENT SESSION.

The current session of the school commenced auspiciously on Wednesday morning, September 12. A large percentage of the pupils in attendance last year and several new ones were present on the first day. A number of each have since been admitted. The total number of pupils enrolled to date is 122. Of these 65 are boys and 57 girls.

During the summer vacation the buildings were put in excellent sanitary condition, and it affords me pleasure to state that the health of the pupils to this time, this term, has been good. The several departments of the school are well organized, and the work of instruction is progressing satisfactorily. All, officers, teachers and pupils, seem willing to labor to promote the interests of the institution and make this a successful term.

Shortly after the close of the last school term, Miss Marie Robellaz, one of the teachers in the literary department, informed me that she did not desire a reappointment. This step was taken in filial obedience to the wish of her aged parents, who insisted upon her remaining at home with them. Miss Robellaz was a successful teacher, and we very much regretted to lose her services. She soon became acquainted with the special features of our work, and, during the four years she was with us, she was always unassuming, efficient and conscientious in the discharge of every duty. She was not only devoted to her work and solicitous for the welfare of the pupils under her immediate charge (all of whom highly esteemed her), but she took a warm and lively interest in the success of the whole school.

Miss Blanche Croxall, of New Albany, Indiana, was chosen to fill the vacancy. Miss Croxall is a lady of good attainments. She is quiet in demeanor, persevering and industrious, and spares no labor to secure the advancement of her pupils.

CONCLUSION.

Before concluding this report, which has been extended beyond the usual lengths of such documents, and may be regarded as unnecessarily minute in detail, I beg leave to assure you that it has been my constant aim and study to carefully guard

every interest of this Institution. I have always regarded my position as Superintendent as a serious and difficult trust, and have endeavored to administer the affairs of the school in a judicious and conscientious manner.

Sincerely thanking you, gentlemen, for the deep interest you have always manifested in this work, for your words of encouragement, and for the generous coöperation and support you have extended to me, this report is respectfully submitted.

I hereby affirm that to the best of my knowledge and belief, the inventory and accounts herewith presented, under appropriate headings, are correct.

H. B. JACOBS,
Superintendent.

Affirmed and subscribed to before me, a notary public in and for the County of Marion, State of Indiana.

Witness my hand and seal this 31st day of December, 1888.

JAMES M. KING,
Notary Public.

ACKNOWLEDGMENTS.

We would express our sincere thanks to Miss Charity Dye and Rev. O. C. McCulloch for twenty-five season tickets of admission, furnished the pupils to the third series of ten "Historical Lectures for Young People," given in Plymouth Church, Indianapolis, on Friday afternoons.

To Mr. Emil Wulschner for thirty-two complimentary tickets of admission furnished the teachers and pupils of the Institution, to piano concert by Louis Mass, at Plymouth Church, Wednesday evening, February 15, 1888.

To ladies of the Central Christian Church for tickets of admission furnished pupils to "Literary and Musical Entertainment," given at their church on Friday evening, May 18, 1888.

To Mrs. E. J. Price, of Indianapolis, who, upon invitation, gave an interesting talk to the officers, teachers and pupils of the school on her travels in Europe and America.

To Judge Lewis Jordan for an interesting and instructive address on "The History of Indiana," delivered to the school.

To Mr. E. D. Eames, of Delphos, Kansas, who visited the Institution June 12, and gave the pupils an interesting talk on

“Whale Fishing,” the methods employed, etc. He also exhibited some of the implements used to capture the great fish.

To the proprietors of the following periodicals and weekly newspapers sent to the Institution, gratuitously, during the past year, and we earnestly solicit the continuance of their kind favor:

Weekly Courier, Madison, Indiana.

The Plymouth Democrat, Plymouth, Indiana.

The Democrat, Franklin, Indiana.

The Putnam Democrat, Greencastle, Indiana.

Le Valentin Haüy, Paris, France.

The Goodson Gazette, Staunton, Virginia.

The Tablet, Romney, West Virginia.

PHYSICIAN'S REPORT.

To the Board of Trustees of the Institute for the Blind:

GENTLEMEN—The following report concerning the health of the pupils, causes of their blindness, sanitary condition of the Institute, and other facts of public interest relating to the past school term, is in compliance with the request of the Superintendent, respectfully submitted.

The causes of blindness are usually presented in pathological groups, of which, according to the records of the Institute, congenital anomalies constitute the largest percentage, the antenatal factors of which are supposed to be consanguineous marriages, hereditary tendency towards defects of the eye, or the result of constitutional diseases of parents. It may be conceded that in such intermarriages where parents are imperfectly developed that there is liability to want of development of the nerves of special sense, and not only a double tendency to transmit these physical defects, but other constitutional diseases in case they should exist, and that all such matrimonial alliances should be prevented by legislative enactment. If, however, such parents are perfectly healthy, the tendency in this direction is probably no greater than if in no wise related by consanguineous ties. A careful search of all records relating to the family history of the pupils admitted during the past session warrants the conclusion that very few cases of blindness are to be traced to this cause. Neither do we find hereditary blindness frequent. Of the 43 cases of so-called congenital blindness among the 128 pupils enrolled, only four cases are found which would appear to be due to this cause; in three cases one of the parents was blind; in the other both parents were blind. Several, however, were reported as having near relatives blind, thus showing a constitutional tendency to loss of vision. It would appear from the records, however, that

many who are reported as *born blind*, really become blind soon after birth either from scrofula or other hereditary diseases, or from acute inflammation, and that *ophthalmia neonatorum* would furnish a large percentage of the blind, in fact, a larger proportion than any other single cause, which in itself invests this affection with grave importance, and this is greatly enhanced when it is considered, that loss of vision from this cause means an entire life of blindness, and that this might be prevented by intelligent physicians, in the prompt adoption of proper prophylactic measures and treatment.

Some of the pupils have become blind from special diseases, as granular conjunctivitis, purulent ophthalmia, inflammation of the cornea, and of the iris, cataract, or opacity of the crystalline lens, and amaurosis, or obscure conditions of the nervous apparatus. Of these diseases *trachoma*, or that first mentioned, is to be reckoned as the most important. This disease occurs chiefly in the lower walks of life, where, from necessity or indifference, there is overcrowding, bad ventilation, lack of cleanliness, and a general disregard of the laws of hygiene.

Among the pupils of the Institute the alleged causes of many cases of blindness are the consequence of measles, scarlatina, small-pox, erysipelas, and other zymotic fevers, which might be prevented by correction of sanitary conditions, or by the control of the spread of such maladies.

A few of the class have been deprived of vision from burns, blows, wounds and probably from improper treatment, but the more important causes are computed as follows: Congenital, 33 per cent.; inflammation, 25 per cent.; scrofula, 13 per cent.; accidents, 8 per cent., and cerebro spinal fever, 7 per cent. The remaining 14 per cent. represents the result of other general diseases, or inflammatory fevers whose sequelæ have attacked different parts of the eye. In this connection it should be stated that of the 68 boys and 60 girls in attendance, 51 are totally blind, and 77 are partly blind. The number partly blind comprises those pupils who possess some power of vision, but not sufficient to enable them to distinguish clearly the form of objects. It also includes those who are only and barely able to distinguish light from darkness.

In a former report it was stated that statistics, general observation and experience confirmed the opinion that the blind as a class have less vitality than those who have sight, and that

as a factor a lack of vitality was associated with blindness, both in cause and effect. It is for this reason that many who are not born blind are yet born to become blind, and that while a lack of vitality is one predisposing cause of blindness, it is equally evident that a want of vitality is in consequence of being blind which leads to a more sedentary life than is usual with those who are not deprived of vision. In this Institute the more anæmic pupils, and others whose natural resistive powers were below the average, were more or less affected by slight changes of temperature, easily contracting colds and suffered to some extent from bronchial and neuralgic affections. As usual, at the beginning of the session, several pupils were entered already suffering from malarial disorders, contracted while home during vacation, but soon recovered with ordinary treatment. Two cases of typhoid fever and one of pneumonia occurred in November, constituting the only serious sickness during the term. No deaths among the pupils within the Institute during the year have occurred from any cause. Our comparative exemption from zymotic disease is to be attributed to the superior condition of plumbing and drainage recently established; these sanitary advantages may now be said to be fully equal to the requirements of modern science.

For many pupils, tonics, alteratives and other remedial agents have been prescribed to build up or maintain their general health according to the exigencies of individual cases. To assist in these results, and to improve their physical development, such hygienic measures as bathing, the influence of sun-light and open-air or gymnastic exercises, have been systematically resorted to, and persistently, but judiciously enforced. A marked improvement is to be noticed in the physical as well as mental condition of the pupils in consequence of this management. In securing the most excellent result in the general management of the Institute, we can not accord too much praise to the Superintendent for the superior judgment, untiring industry, uniform kindness, as well as unceasing care and vigilance that he has constantly exercised.

R. F. STONE,
Physician.

GENERAL INFORMATION.

The Indiana Institute for the Education of the Blind is located at Indianapolis, the capital of the State, occupying a beautiful and healthful site in the northern part of the city.

It is strictly an educational establishment, a branch of the noble public educational system of Indiana, and has for its object the moral, intellectual and physical development and training of the blind children of suitable school age, of both sexes, residing in the State.

Pupils from this State are admitted to the privileges of the Institution free of charge. They are provided with tuition, boarding, washing, medical attendance and everything necessary, except clothing and traveling expenses.

The school term commences each year on the second Wednesday of September, and continues forty weeks. It is highly important that pupils should be present at the opening of the term, and remain, if possible, to the close.

All pupils are required to come provided with an adequate supply of good, comfortable clothing, embracing suitable articles for both summer and winter wear, in such quantities as to admit of the necessary changes for washing and repairing.

Each article of clothing should be distinctly marked with the owner's name, in order to prevent confusion or loss, and must be sent in good condition, not only upon the first entrance of the pupil, but also at each subsequent return from home after the vacation.

It is positively required that every pupil shall be removed from the Institution at the close of the term each year, as well as at any other time when such removal may be deemed necessary by the proper officers; and, in case of the failure of the friends of any pupil to comply with this requisition, provision is made by the law for the sending of such pupil to the Trustee of the township in which he or she resides, to be by him provided for at the expense of the county.

As a rule, applicants who are under nine or over twenty-one years of age are not admitted; but exceptions are sometimes made in favor of those who are over age, at the discretion of the Board of Trustees. The term of instruction is not limited to any definite number of years, but is determined by the attainments of the pupil and his fitness to graduate.

No person of imbecile or unsound mind, or of confirmed immoral habits, will be knowingly received into the Institute; and in case any pupil shall, after a fair trial, prove incompetent to receive useful instruction, or disobedient to the regulations of the Institute, such pupil will be thereupon dismissed.

By a recent action of the Board of Trustees, the use of tobacco in every form, in or about the building, is prohibited. Parents should be especially careful to prevent their boys from forming the habit of using it while at home during vacations. Its injurious influence on all who begin to use it in childhood is not questioned, but it is especially harmful to the blind; therefore, one can not do them a greater kindness than to guard them against its use.

Letters are written once a month, or oftener, if necessary, for those who can not write for themselves. If a pupil is taken seriously sick, the friends are immediately notified of the fact.

All letters and packages sent to the pupils should have, besides the name of the pupil addressed, these words: "Institute for the Blind, Indianapolis, Ind.," to insure prompt delivery.

The Institute is open to visitors on every day, except Sundays, between the hours of 10 A. M. and 3 P. M.

Persons bringing pupils to the Institute, or visiting them while here, can not be accommodated with boarding and lodging during their stay in the city.

Persons desiring to procure the admission of a pupil should apply, by letter or otherwise, to the Superintendent of the Institution for instructions as to the manner of procedure, and no pupil should be sent to the Institution until such instructions shall have been received and fully complied with.

FORM OF APPLICATION.

To the Superintendent of the Indiana Institute

for the Education of the Blind :

The undersigned, desiring to procure the admission of a pupil for Education in the Institution under your charge, would submit for your consideration the following particulars, in answer to the several interrogatories herein propounded, and will stand pledged for the correctness of the same, as well as for the proper fulfillment of the requirements set forth in the circular prefixed hereto:

1. What is the *real* and full name of the applicant?
 Answer
2. In what State or country was he or she born?
 Answer
3. What is the date of his or her birth?
 Answer
4. At what age did the blindness occur?
 Answer
5. What is the supposed cause of blindness?
 Answer
6. Is the blindness total?
 Answer
7. If it is not total, is it sufficient to prevent the acquirement of an education in a school for the seeing?
 Answer
8. Is the applicant of sound mind, and susceptible of intellectual culture?
 Answer
9. Has he or she any bodily deformity, or infirmity; and if so, what?
 Answer

10. What is his or her general state of health?

Answer

11. Is he or she free from epilepsy and all infectious diseases?

Answer

12. Has the applicant ever been a pupil in any other school for the blind, and if so, what one and how long?

Answer

13. Is he or she free from all immoral habits?

Answer

14. What are the full names of the *own* parents of the applicant?

Answer

15. Were such parents related before marriage, and if so, how?

Answer

16. Are there other cases of blindness in the family, and if so, how are they related to the applicant?

Answer

17. If the father of the applicant is not living, or has, for any reason, ceased to provide for the same, who is his or her present guardian?

Answer

18. What is the postoffice address of the father or guardian, as the case may be, of the applicant?

Answer

19. What are the names of the township, county and State, in which the applicant has legal residence?

Answer

20. If in the State of Indiana, what is the name of the present Trustee of such township?

Answer

Signed this . . . day of A. D. 18

STATE OF INDIANA, }
 County. } ss.

I, the undersigned Justice of the Peace, in and for said county, hereby certify that the above-named applicant for admission as a pupil of the Indiana Institute for the Education of the Blind, is a legal resident of the township and county herein set forth, as the residence of said applicant.

Witness my hand this . . . day of A. D. 18

{ L. S. }

Information relative to the character and purposes of the Institute, and the value of the work done, will be cheerfully given, and all inquiries concerning the admission of pupils or the management of the School, will be promptly answered, by addressing the Superintendent.

H. B. JACOBS,
Superintendent.

CLASSIFIED AND ITEMIZED STATEMENT

OF THE

RECEIPTS AND EXPENDITURES,

And of all business transactions, as shown by the books and papers belonging to the Institution. The same is correct and full in detail, as made out and arranged by the Book-Keeper for the fiscal year ending October 31, 1888.

Appropriation for maintenance for 1888.	\$27,000 00	
Appropriation for repairs of buildings for 1888	2,000 00

TRUSTEES' REPORT.

RICHMOND, IND., October 31, 1888.

To the HON. ISAAC P. GRAY,

Governor of Indiana:

In submitting to you the tenth annual statement concerning the Indiana School for Feeble-Minded Youth, we have to report a year of unusual increase in population.

When in May, 1887, we procured through you the Eastern Indiana Hospital for Insane as temporary quarters for the institution, we intended to make no increase in the number of inmates until we would be permanently located at Fort Wayne. Since the organization of the school in 1879 until May, 1887, its capacity had been so limited that applicants for admission had been refused by the score, and when it became known throughout the State that the school had been separated from the Soldiers' Orphans' Home, and was located in quarters affording ample room for an increased number of inmates, old applicants renewed their requests for admission and new applicants sent in their papers setting forth a condition of affairs, demanding immediate relief. It was known by these applicants that the act creating the school does not limit the number of inmates, and that an appropriation of ten dollars a month was made for each additional inmate. Their knowledge of these facts lent force to their pressure for admission. We had to have light, heat and other accommodations for sixty children, and we knew it would cost but little more to extend these necessities to others equally deserving, hence we resolved to increase our number to two hundred and fifty, this being the capacity of the buildings now occupied by us. To furnish these buildings for the accommodation of the number above mentioned, we drew on the fund given us by the last Legislature for furnishing and equipping the new building. These

purchases consist of beds, bedding and other furnishings that will be used in fitting up the building at Fort Wayne. The amount thus expended is \$7,487.63, which is charged to New Building and Furnishing Fund, as will be seen in the financial statement.

APPROPRIATION FOR MAINTENANCE.

A comparison of our appropriation for maintenance with that of any State institution in Indiana, or with that of any institution of its character in the United States, will show that our allowance per capita is very much less than that of any other institution, and to the fact that it is unreasonably small, we attribute our inability to meet all demands made upon our maintenance fund for the fiscal year just closed. At this date we have on file unpaid bills to the amount of \$3,692.79, the same being for groceries, provisions, clothing and fuel. The existence of these obligations is due to an insufficient appropriation, and we trust you will recommend for us an increased per capita so that we may be able to meet the living expenses of the institution with promptness.

THE NEW BUILDING.

During the last session of the Legislature there was appropriated the sum of \$50,000 for the establishment of the Indiana School for Feeble Minded Youth. This amount was to include the purchase of land, the erection of a building, and the furnishing and equipping of the same.

At the time this appropriation was made, the institution had been in existence about eight years, and its records showed that at no one time did its inmates number one hundred. From this it was presumed there was no demand for extensive buildings for this defective class, but when we remember that the institution never afforded accommodations for more than ninety children, it is not to be wondered at that its records showed so small a population. Besides, the law governing the institution from its organization until 1886 closed its doors against the epileptic, the paralytic, and the lower grades of intellect, and admitted only those susceptible to school training. The law now governing the institution very wisely includes the idiotic.

the epileptic and the paralytic, but provides they shall be kept separate from the better grades. The census of 1880 shows eighteen hundred feeble-minded persons in this State. Applications for admission come in every day. The work has grown to great proportions in other States. These facts led us to think it best to build not for the sixty who were in the institution at the time the appropriation was made, but for the others also who are entitled to admission, and whose helplessness should make them objects of the State's care. Instead of planning a building for the accommodation of sixty, we have planned one whose capacity is about four hundred. After visiting several institutions in other States designed for the care of this class of children, we engaged the services of Wing & Mahurin, architects of Fort Wayne, Indiana, and directed them to prepare plans for such a building as we desired to erect. Having paid out in May, 1887, \$10,000 for land, and during the year \$7,487.63 for furnishings, we had but \$32,512.37 to put into the building. With this amount we concluded to put up the main building, and directed Wing & Mahurin to prepare specifications for so much of the work, and, upon advertising for bids, we received the following:

Jacob Baltes.....	\$38,072 00
A. E. Barrett.....	38,475 00
Muller & Sohle.....	43,303 00
Wm. Moellering	37,027 05

Mr. Moellering being the lowest bidder was awarded the contract, and he agreed to wait for payment on his estimates until such time as the State's finances would permit payment of them. Up to this time Mr. Moellering has received no money, but he is pushing the work rapidly, and will soon have the building inclosed.

Wing & Mahurin's plans having been formally accepted by this Board, payment was made to them in the sum of \$740.54, this being two per cent. of the estimated cost of the main building, and paid them on the completion of their plans and specifications, as agreed in our contract with them. This amount was charged to The New Building and Furnishing Fund, thus making a deficit in that fund, as will be seen by the following:

EXPENDITURES.

Land	\$10,000 00
Furnishings.....	7,487 63
Architects.....	740 54
Building.....	37,027 05
Total.....	55,255 22
Appropriation.....	\$50,000 00
Deficit.....	\$5,255 22

Upon the Legislature will devolve the duty of making up this deficit and of completing the building. We ask your recommendation for the necessary appropriations, and we feel that a State that provides so liberally for its insane and its other defective classes will approve your action, and willingly devote a part of its resources in assigning to the Indiana School for Feeble Minded Youth the place among its great charities that its importance deserves.

The following appropriations are needed to complete the work begun :

Completion of main building.....	\$20,000 00
East and west additions	55,000 00
Furnishing	10,000 00
Hospital building and furnishing	10,000 00
Boiler house.....	4,500 00
Steam boilers.....	10,000 00
Steam heating apparatus and pipe covering.....	11,400 00
Pumps and fans.....	6,500 00
Electric light plant.....	6,000 00
Steam engines—electric light and laundry	1,500 00
Laundry building.....	5,000 00
Laundry machinery.....	3,000 00
Plumbing	12,000 00
Sewerage.....	10,000 00
Cisterns.....	700 00
Tunnels.....	1,200 00
Fire apparatus.....	5,000 00
Fire escapes.....	2,000 00
Water supply.....	2,000 00

Barn.....	\$3,000 00
Bakery	3,000 00
Cold storage room	1,500 00
Grading, fencing, sodding and setting trees, etc.....	10,000 00
Total.....	\$193,300 00

Having thus set forth the needs of the Institution, to insure its future usefulness, we respectfully refer you to the reports of the Superintendent and the physician which are made a part of this report, and which show the present condition of the school and contain information concerning its internal management.

Respectfully,

E. A. K. HACKETT,
MARY T. WILSON,
A. H. SHAFFER,

Trustees.

SUPERINTENDENT'S REPORT.

RICHMOND, October 31, 1888.

To the Board of Trustees:

In conformity to the section of the law defining my duties, I herewith submit, my first annual report as Superintendent of the Indiana School for Feeble-Minded Youth.

My election to the Superintendency of this School, bears the date of November 1, 1887, but previous business engagements prevented my permanent removal to the Institution until the following January. During the two months intervening, with your consent, I delegated my authority to Miss Mary T. Wilson, who had been acting as Superintendent of the school from May 1, 1887, the date of the removal of the Institution from Knightstown. Her efficiency needs no comment from me, and yet I can not refrain from congratulating the Institution upon the selection of Miss Wilson who personally superintended the removal of the children from their former home, overcame the most discouraging difficulties, furnished the Institution throughout, organized the various departments, schools, etc., and, in short, brought the Institution to a condition of excellence that deserves the highest commendation.

At the date of my election, one year ago, there were 105 children in the Institution, while at the end of the present fiscal year we find 239 names enrolled as inmates of our school. This large increase is attributable principally to two causes. First, the scope of the present law governing the school being very much greater than that of the former statute; many applicants are now admitted, who under the old regime were excluded; and, second, the separation of the school from the Soldiers' Orphans' Home at Knightstown (a union which was

never wise), and establishing it on its own foundation. This fortunate change has brought it into greater prominence throughout our State. Materially increasing the facilities for properly caring for this unfortunate class of children, and bringing its offered benefits and training to the attention of those having relatives, friends or wards entitled to admission. Published statistics inform us that within the borders of Indiana there are more than eighteen hundred feeble-minded, helpless persons, entitled, under the law, to the comforts and care of our Institution, and in view of this fact, you can readily see that, although our growth during the last year has been very rapid, yet it is but a beginning, and that in the near future the Indiana School for Feeble-Minded Youth, in importance, numbers and, we believe, in usefulness, will march toward the front in the institutional procession of our State's most noble charities.

HEALTH.

While with regretful pen we star the names of eleven of our children, who have died during the past year, yet I believe I am justified in the assertion that the general health of the children has been unquestionably good. We have mercifully escaped those epidemical diseases, which during the last summer, in the forms of scarlet and typhoid fevers, diphtheria and flux, invaded, with dread results, many of the homes of Richmond's citizens, as well as the orphanage and county infirmary in the vicinity of our school. It must be remembered that by far the greater number of our children are enfeebled and diseased physically as well as mentally; indeed, those possessing sound, healthy bodies are the rare exception, and while the rate of mortality seems high, yet I am satisfied that it is as low as any similar institution in the land. For a more complete statement in this regard, I would respectfully refer you to the accompanying report of our attendant physician, Dr. James F. Hibberd, of Richmond, who has always responded promptly, both night and day, to calls for his professional services, and whose acknowledged ability, skill, experience and high standing in his profession are the best guarantees I can offer for the proper medical care of the children.

THE SCHOOLS.

In this department of the institution is placed that class of children, susceptible to the ordinary methods of school training and who are capable of receiving instruction in the lighter forms of industrial pursuits. It also embraces certain evening classes, which are made up of the older boys and girls, who, during regular school hours, are employed about in other departments.

The children in the school department are graded in six classes. Those in the highest, reading in the second, third and fourth readers. They write quite well, both from copy and from dictation. They do accurate work in addition, subtraction, multiplication and division. A class in Language is making fair progress, as is shown by the very creditable letters that go out monthly to parents and friends, and by the well written compositions that are produced each week. In the other classes, such instruction is given as is best adapted to the mental condition of the children there placed. The younger children are enjoying the advantages of the Kindergarten system of training. Under its influence they are developing habits of self-control and industry. They have furnished some very beautiful specimens of their handiwork, and are quite proud of their achievements in this direction. From the higher classes have come many specimens of clay modeling that are quite creditable alike to the skill of the children and to the patient efforts of the teachers. Vocal music receives the attention its importance demands, and consequently the singing class is quite an attractive feature of the school.

Gymnastic drills are made a part of the daily exercises in each school, not more for physical culture than for a means of fixing the attention and for assisting and strengthening the memory.

On Tuesday and Friday evenings of each week, the children assemble in the Hall and indulge, under the direction of the teachers, in various amusements and games. These occasions give the children great pleasure, and Tuesdays and Fridays have come to be regarded by them as red-letter days.

On Sunday mornings all assemble in the Hall at 11 o'clock, and one hour is then given to devotional exercises. At 2 P. M.

all again meet in the Hall for Sunday-school work, and the attention given by the children on these occasions compares favorably with that given by bright children in the various Sunday-schools throughout the State.

Aside from the children who are assigned to the grades above mentioned, and who participate in all the daily exercises of their school, there is another class, independent of these, in which is placed the lower grades of intellect, children so weak, mentally and physically, as to be incapable of attending to their most simple wants. The cultivation of habits of cleanliness and self-help is the end to be attained in this custodial department, and all the exercises and drills given are such as tend to bring about these results.

A review of the year's work in both departments of the school reflects great credit upon the teachers, and proves conclusively that patient and unceasing effort will raise this class of defectives to that state of self-help and usefulness that was contemplated by those who first undertook the training and education of feeble-minded children.

INDUSTRIAL FEATURES.

Under capable attendants many of the inmates are thoroughly instructed in all the duties pertaining to general housework, such as making beds, sweeping and mopping the floors of dormitories, division rooms and hallways, cleanliness being one of the essentials to health and comfort. Some assist in the care of, and prove to be excellent waiters in, the various dining-rooms, while others render valuable aid in kitchens, bakery, laundry and in the barn, caring for the stock, etc., and all other general outside work that demands attention from the garden or farm.

A few months ago, a complete outfit and materials were purchased for a shoe shop, and Mr. Henry Bass, a competent shoemaker, placed in charge. Six boys were selected for this department, and the result has proven satisfactory. In little more than thirteen weeks they have mended more than seven hundred pairs of shoes, and made one hundred and sixty pairs of new shoes, the latter comparing favorably in appearance with

a good grade of factory work, and greatly exceeding it in quality and wear. We are in position from now on to supply the children of the Institution with "home-grown" shoes.

In the sewing room, the girls still continue to do excellent work, and with their swift needles succeed in meeting the heavy demands made on this department. The appearance and excellence of the wear of the garments made by the girls, attest their faithfulness. A tailoring department has been organized and a number of boys assigned to duty there. Already our boys are being supplied quite rapidly with admirably made suits, and I am sure that the day for the purchase of "ready-made clothing" is almost past, and that hereafter all clothing needed in this line will be made from the piece by the willing hands of our own tailorshop boys.

The following named articles have been made in the tailor shop and in the girls' sewing room, during the past year:

TAILOR SHOP.

When, some years ago, the law was passed creating three additional hospitals for the care of the insane, the Legislature appropriated a sum of money which at that time was thought sufficient for the completion of the same, and the gentlemen composing the Hospital Board made contracts for almost the entire work. As the work progressed, it was found the sum appropriated was not sufficient, and in consequence of this fact, building both at Evansville and Richmond ceased. It was in this condition of incompleteness that we found the buildings at Richmond, when our institution was moved from Knightstown. As our numbers increased, it became daily more apparent that the wash-board, tub and flat-iron (our only laundry facilities), were entirely inadequate to meet our rapidly increasing necessities. It was while in this dilemma, that an effort was made to induce A. M. Dolph & Co., of Cincinnati, (whose contract for complete steam laundry outfit had already been accepted by the Hospital Board,) to complete the same and to trust to the liberality of the coming Legislature to reimburse them. With what result, the splendid new steam laundry, complete with all modern improvements, give ample proof of its success, and we shall ever hold Dolph & Co. in grateful remembrance for their willingness to relieve us in our great distress. The Madison Machine Company, of Madison, Ind., who furnished the laundry engine; Price & Barnes, of Logansport, who built the ovens in the bakery; Laakman & Sherer, cement contractors, of Indianapolis, who laid floors in the bakery, the kitchen, the laundry buildings and storage rooms, and also the outside walks around the institution. All these firms, who, on the same

terms as Dolph & Co., so willingly came to the rescue in our dire necessities by placing these much-needed improvements in the Richmond Hospital, will ever be remembered as our friends indeed, for they were our friends in need.

MAINTENANCE.

The fiscal year closes with a large balance on the wrong side of the ledger of the Maintenance Fund account. A deficit it is, and yet it is a deficit caused only by the inexorable law of necessity. The problem of fixing the amount of the per capita expense for maintaining feeble-minded children has been solved by every State in the Union which supports a similar institution, and the solution has proven conclusively that ten dollars a month (our present appropriation) is *absolutely insufficient* to properly maintain a child whose body and mind are alike enfeebled and diseased. Hence, a majority of the States appropriate fifteen dollars a month for the support of each child, while many other institutions receive a monthly sum largely in excess of this. Feeble-minded children need more nutritious food, warmer clothing and more careful and constant attention than any other class who are the recipients of our State's splendid charity. Our necessities demand an increase of our present monthly allowance to a sum not less than fifteen dollars per capita, and any amount less than this will only prove its insufficiency by compelling a deficit at the end of each fiscal year. It certainly costs no less in Indiana to maintain a child of this class than in Illinois, Iowa, Pennsylvania, Kansas, New York, etc., and yet these States have found by careful experiment that fifteen dollars a month is the *minimum amount* upon which to base the proper care of feeble-minded children. Every dollar of the unpaid bills on our file are for provisions, clothing, fuel and other needed supplies, which the management would have subjected themselves to just and severe criticism had they dared withheld from the helpless little ones placed in our care. I offer no apology for this deficit, for I conscientiously believe and know that every penny expended beyond the amount of our appropriation has been honestly and wisely used for the best interests of our children.

THANKS.

I am grateful to every member of your Board for the considerate and hearty support you have given me during the year that has just closed, for your kind words of commendation, for your timely advice and helpful encouragement, and I sincerely trust in the days to come I may be more deserving and faithful.

Our thanks are due Nicholson & Bro. for several liberal and acceptable donations of magazines, books, pictures, games, etc., for the children.

To the kind-hearted citizens of Richmond for the gift of a magnificent flag, which shall always, I hope, rustle its beautiful folds over what our law intended it should be, viz: "An absolutely *non partisan* institution."

To the ladies of the flower mission, who have come among us dispensing flowers, cards and words of cheer.

To the members of the Richmond Daily and Weekly Press for the many kind words of encouragement and commendation they have spoken, and may it be our earnest endeavor to merit them, every one.

To Miss Mary T. Wilson, my sincerest thanks are tendered for the invaluable assistance, always willingly rendered by her, in every department, and to express my grateful appreciation of her marked faithfulness. Endowed with rare natural qualifications, she has added years of experience in this special line of work, which renders her singularly efficient and helpful.

To our worthy Matron, Mrs. Mary Avels, for the untiring energy, earnest attention and unselfish devotion she has always exhibited in her constant care of the children.

To the teachers, for their faithful work in the school-rooms and their patient efforts to lift the children to a higher plane of mental and moral life.

To the attendants, on whom more than any others, devolves the daily care of the physical comfort of the inmates, and the neat, cleanly and uniformly happy appearance of the children attests more strongly than words their faithfulness and watchful care.

To the employes in every department, one and all, my hearty thanks are due, for the willing and successful manner which they have met the obligations of their work, no matter how

difficult and trying, and this willingness on their part has done much to further the best interests of the Institution, and will certainly cause them to enjoy that keen pleasure and satisfaction that always follows the faithful performance of duty.

Shall we not all, as we enter upon the labors of another year, looking unto the Divine One for guidance, grace and strength, meet each responsibility bravely, perform all duty patiently and well, and ennoble our work as well as ourselves by lifting it above the plane of daily drudgery and toil into the higher atmosphere of a sacred trust, and laboring in His name, possess the spirit of true charity and love in all things, always remembering the comforting words of the blessed Master: "Inasmuch as ye have done it to one of the least of these my little ones, ye have done it unto me."

Respectfully submitted.

JOHN G. BLAKE,
Superintendent.

PHYSICIAN'S REPORT.

RICHMOND, IND., October 31, 1888.

To the Board of Trustees:

The year, now closing, opened with a large number of the inmates of the School suffering from measles, the continuance of an outbreak of the disease which began in the Institution on the 17th of September, 1887. The disorder continued until about the last of November, and then ceased apparently because susceptible inmates had become exhausted. The whole number of cases during this outbreak was 47. Early in March, after many fresh inmates had been admitted, another outbreak of measles began, and continued through the month, attacking 37 of the pupils, making a total of 84 cases of measles from September, 1887, to April, 1888. No deaths occurred from measles, nor did it leave any of the unpleasant sequels that sometimes follow this distemper. Other than measles there has been no prevailing disease in the School during the year, but beginning with February there has been a large increase of promiscuous illness among the inmates, reaching its acme in May, when one hundred and sixty-four prescriptions were made, then gradually decreasing until August, when seventy-seven prescriptions were needed, but again ascended rapidly in September, when one hundred and seven prescriptions were required, and in October fell back to seventy-three. Eleven deaths have taken place during the year, seven girls and four boys. One in November, two in March, one in April, four in May, and three in September. One death was from inanition, one from consumption, two from general scrofula, one from gastritis, one from anæmia of the brain, one from cerebral hemorrhage, one from purpura hemorrhagica, one from entitis, one from eucephalitis and one from bronchitis. These deaths all occurred among inmates of feeble physical organization as well as feeble minds, due to various cachexia, chiefly strumous, and their cases presented nothing otherwise peculiar.

Both the morbidity and the mortality are above the average for equal ages in the general community, and are clearly due to the deficient vital stamina that pertains to a portion of the youth brought to the institution for maintenance and training. Indeed, while the number of prescriptions for other than measles reached eight hundred and fifty-five, the number of persons prescribed for has probably not exceeded forty, indicating that many of the ailing were chronic cases for each of whom numerous prescriptions were required. Doubtless we may correctly ascribe the increased mortality during the year to the imperfect physiques of many of the newly admitted pupils, and it is a condition likely to have an important influence on the morbidity of the inmates of the school for the future. Under these circumstances it becomes an affair of prime importance that suitable hospital accommodations be provided for the unfortunates needing such advantages. The value of hospital regulations and appliances to any one laboring under either acute or chronic disease need be but suggested to be realized, and where a number of such cases have to be treated simultaneously and continuously, economy makes a hospital indispensable if the patients are to have the benefit of the best management. And, furthermore, proper hospital accommodations are almost as important for the convalescent as for the ill, and this is especially true of those under your administration who are not fully competent to care for themselves when at their best. And there is a third class in your institution that could be more satisfactorily provided for in quarters in the nature of an annex to a hospital than in any other attainable manner. This class is composed of those who are malformed or crippled, or the victims of hopelessly incurable disease, requiring only the occasional attention or oversight of the medical attendant but the constant care of a competent nurse. For these considerations I beg leave to call your serious attention to the subject of a hospital with all approved modern conveniences and appliances as an essential part of the accommodations of the Indiana School for Feeble-minded youth.

Respectfully submitted,

JAS. F. HIBBERD, M. D.

SEVENTEENTH ANNUAL REPORT

OF THE

MANAGERS

OF THE

INDIANA REFORMATORY

INSTITUTION

FOR

Women and Girls

For the Year Ending October
31, 1888.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.
1888

THE STATE OF INDIANA, }
EXECUTIVE DEPARTMENT. }

November 30, 1888: Received and examined by the Governor.

December 1, 1888: Referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE, }
INDIANAPOLIS, December 7, 1888. }

The financial part of the within report, so far as it relates to moneys drawn and paid into the Treasury, is correct.

BRUCE CARR,
Auditor of State.

December 7, 1888: Returned by the Auditor of State, with above certificate, and transmitted to the Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

PIERRE GRAY,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, December 7, 1888.

CHARLES F. GRIFFIN,
Secretary of State.

BOARD OF MANAGERS.

ELIZA C. HENDRICKS, President, Indianapolis.
CLAIRE A. WALKER, Indianapolis.

ROBERT GRAY Engineer.
THOMAS BARNETT Night Watchman.
ROBERT PETRIE. Day Watch and Laundry Collector.

MANAGER'S REPORT.

INDIANAPOLIS, November 1, 1888.

To His Excellency, ISAAC P. GRAY,
Governor of the State:

We respectfully herewith submit to your favorable consideration the seventeenth annual report of the condition and management of the Reformatory Institution for Women and Girls for the fiscal year ending October 31, 1888, together with the reports of the Superintendent, the Secretary and the physician, to which we refer you for more detailed and specific information.

The stated meetings of the Board have been held at the Institution each month, and special meetings when occasion required. The monthly reports of the Superintendent, Assistant Superintendent and the subordinate officers, and the personal inspection and visits of the members of the Board, from time to time throughout the year, have kept us fully acquainted with the workings of the Institution, and we heartily reiterate the statement made before, that we know the management to be humane, judicious and economical in all its details on the part of the officers. The condition of the Institution is highly satisfactory, and shows unmistakable improvement.

Dr. Mary Smith, physician of the Institution, on March 8 succeeded Dr. Marie Haslep, who left this post for one in China. Dr. Smith is an excellent officer in her profession. The health of the inmates has been exceptionally good; no deaths have occurred during the past year, and none on the Reformatory side for almost three years.

Some few changes have been made among the officers during the past year, to which the Superintendent refers in her report.

PENAL DEPARTMENT.

There are in this department fifty-five convicts and two infants. Eleven of these convicts are sentenced for life. During the year, twenty-seven have been received and twenty-two have been discharged upon the expiration of their sentences. One was pardoned, one was granted ticket of leave to be removed to the City Hospital for treatment which could not be given here, and one was granted ticket of leave to be removed to her home.

In our last report we spoke of the mistaken sense of justice, in our opinion, made "on the part of the Judges pronouncing sentences, in sending criminals to a *reformatory* prison for a short term, as the possibility of reformation in one or two years, after twenty or thirty of iniquitous living or association, is almost hopeless. It requires time, with healthful surroundings, to eradicate the effects of acquired or associated evil." Of the twenty-seven prisoners received eleven were sentenced to one year's imprisonment, nine to two years, and three to three years. These prisoners were convicted of petit larceny, grand larceny, concealing stolen goods, perjury, burglary, felony, and murder, and it is safe to presume that these crimes were not all committed as a first offense, nor upon the impulse of the momentary surroundings; and hence it would require a longer period of time than a few months to effect any material change in their evil dispositions and tempers.

REFORMATORY DEPARTMENT.

In this department there are one hundred and thirty-three girls. During the year we have received forty-four on new commitments, and ten were returned to us from their tickets of leave. Thirty have been discharged as being of age, and eighteen are out on ticket of leave. The fact that none have died in this department for almost three years, speaks volumes for the sanitary condition of the building, and the care bestowed on these, who come largely from the diseased classes and people of evil habits.

The school in this department was kept up from October to July. Each girl is required to attend school one-half of every school day. The branches taught are Arithmetic, Geography, Reading, Writing and Spelling, with oral lessons in Physiology,

History, and Language. During the summer months the school was closed and the girls were sent to the caning and sewing rooms, to the laundry, or to any place requiring service. None are idle, as all the work of the Institution is performed by the inmates.

We would respectfully urge upon your special attention the desirability of changing the law in regard to the age of the girls committed to this institution, and the time of their detention here. Sections 6180 and 6181 of the Revised Statutes read: * * * "It shall be lawful for said Board of Managers to receive into their care and management in the said reformatory department, girls under the age of fifteen years, who may be committed to their custody." * * *

"And all commitments to the reformatory department until they respectively attain the age of eighteen years, unless sooner discharged from either department by authority of the Board of Managers, or otherwise, as elsewhere provided in this act." The Board of Managers, after careful observation and due consideration of the subject, are of the opinion that a change should be made in the law, and that girls should be committed from the age of eight years, and upward to fifteen years, and retained here until they attain the age of twenty-one years, unless sooner discharged by authority of the Board of Managers, or otherwise.

NAME.

In the opinion of the Board, it would be well for the Legislature to change the *name* of this Institution. As it stands at present, the worst criminals are sent to the "Female Reformatory," the same as young girls who are innocent of any crime, but are sent for protection from evil. In the minds of the general public the same stain is cast upon a girl committed to the Reformatory Department, as upon a vile woman, or one who has committed murder, and goes to the Penal Department. This is gross injustice, and the law should remove the stigma of the prison from the Reformatory Department. The prison for the women should be considered a prison, and be so named, but still be reformatory in its character.

To remove this wrong and prejudice we would suggest that the name be changed from the "Indiana Reformatory Institution for Women and Girls," to *The Reformatory for Girls, and Woman's Prison.*

INDUSTRIES.

We have received during the year from the work of the inmates in the laundry, sewing, caning and overall departments, and from all other sources, \$3,827.50, which sum has been turned in quarterly to the State Treasury, over and against the sum of \$2,579.57 paid into the State Treasury in 1886-87, and which sum gives us an excess of credit this year over the last of \$1,247.93. This is accounted for partly by the following, taken from our report of 1886-87, viz.: "Previous to May 1, 1887, the expenditures had always been deducted from the receipts of the 'Working Fund.' Subsequent to that date *all* expenses, of whatever nature, have been paid from the General Appropriation Fund, and all receipts, earnings, profits, etc., have been turned into the State Treasury, according to the acts of the General Assembly approved April 11, 1885, and which reads as follows:

* * * "And receipts and earnings of said Institution from any and every source, including the hire of convicts, amounts paid by the United States for care of prisoners, paid by convicts on clothing or other accounts, earnings or profits of shops, and all receipts from any source whatever, shall be covered into the State Treasury."

In the opinion of the Board of Managers this law is unfair to the Institution management. By the deduction of the amount of expenditures necessary to carry on the work of these different departments from the Appropriation Fund, that sum is materially reduced, and thereby it seriously cripples the carrying on of needed improvements and other necessities of the Institution. The laundry expenses, which includes soap, starch, baskets, irons, wash-boards, ironing boards, repairing laundry stoves, laundry wagons, etc., etc., aggregated \$550. Now, with this sum take the water tax, \$600, and one-fourth the amount expended for fuel, for the summer months, \$778.42, and we have \$1,928.42 as the expenditures of the Working Fund. Deduct this amount from \$30,000, and it leaves us \$28,071.58 to cover our whole expenses for the year, instead of the \$30,000 appropriated by the General Assembly for that purpose, and which is absolutely necessary for the carrying on of an institution of this size and character.

In consideration, therefore, of the foregoing, we respectfully urge upon the attention of Your Excellency the necessity of changing the reading of the law in this regard, to the end that we be authorized to meet the expenditures from the receipts of the "Working Fund," as has been done heretofore.

EXPENDITURES.

The expenditures, which include salaries, repairs, improvements, and discharge gratuities, amounted to \$30,000, the amount of the Appropriation Fund.

Total amount drawn from State Treasury	\$30,000 00
Deduct amount expended for permanent improvements and repairs.....	1,758 56
Leaving cost of support, salaries, etc	\$28,241 44
Deduct from this amount—	
Paid into State Treasury	\$4,041 90
Due from counties and reported to State Treasurer.....	17,927 31
Total.....	21,969 21
Leaving the total actual charges of the Institution on the State Treasury, for salaries, clothing, support, and care of the inmates for the year.	\$6,272 23

You will be pleased to note that this has been an almost self-supporting institution the past year. It has not been the aim of the management to make it such, but we believe that employment, whether physical or mental, is necessary to the health and happiness of all conditions of mankind, and is *essential* to the health, happiness and reformation of the inmates of an institution of the character of this. We have always endeavored to carry on those industries here which are fitted to the strength and ability of the inmates, and at the same time make them as useful and productive as possible, but never at the expense of the health or strength of the women or girls.

For a full and complete itemized statement of the receipts, expenditures, etc., we refer you to the report of the Secretary.

NEEDS.

The Board of Managers made an appeal to the last Legislature for money to build a hospital. The need for one is *imperative*, and we urge our claim again as a necessity. The amount needed for a hospital is \$10,000.

A high brick wall on the east side of the grounds is also a necessity. The property adjoining this on the east is being improved and rapidly built up, making it vexatious and annoying in the extreme by people interfering with our prisoners, particularly in the summer, during garden-making time. We would, therefore, ask that the sum of \$6,000 be appropriated for the building of this wall for a protection.

The manifest advantage and importance of this building and this wall will, we hope, enlist your serious consideration, and meet with your approval and furtherance, as well, also, as of all who are or should be interested in the welfare and care of these wayward women and girls.

Respectfully submitted,

ELIZA C. HENDRICKS,
CLAIRE A. WALKER,
MARTHA M. JAMES.

SUPERINTENDENT'S REPORT.

INDIANA REFORMATORY INSTITUTION
FOR WOMEN AND GIRLS,
SUPERINTENDENT'S OFFICE, Oct. 31, 1888. }

Mesdames Eliza C. Hendricks, Claire A. Walker,

Martha M. James, Managers:

It affords me great pleasure to submit to you this, the Seventeenth Annual Report of the Indiana Reformatory Institution for Women and Girls, for the fiscal year ending October 31, 1888.

You are so well acquainted with the minutia of our daily doings here as to make this report unnecessary for your own information; therefore, I submit it to you as an annual record, carefully noting the various changes and improvements that have been made during the year, and offering such recommendations as, in your judgment, will be conducive to the interests and future welfare of the inmates of this Institution.

Although our receipts in some departments of work have not been so large, yet I think the report, on the whole, will compare favorably with other years.

I would respectfully refer you to the different exhibits, statements and tables showing the financial condition of the Institution, as well as the receipts and disbursements for the year.

The report of the Physician will give you the sanitary condition of the building. The general health of the inmates has been carefully watched and administered to.

No deaths have occurred, and we have had no disease of a very malignant type to contend with. With our lack of hospital facilities, this has been a matter of great thankfulness to us.

From the summary of accounts you will see that no money has been expended for returning inmates who have attempted to escape from either department of the Institution, although

the freedom of the grounds has been granted them as freely, and, perhaps, more so, than in other years. We regret to report you that one committed to the Penal Department, who was granted ticket of leave that she might be sent to the City Hospital for special surgical treatment, upon the eve of her recovery escaped the vigilance of the hospital authorities and left without leave, being gone some weeks before her recapture and return to the Institution.

I would call your attention to the fact that becomes more and more apparent every day, of the ignorance of the general public as to the nature of, and distinction between, the Reformatory and Penal Department of this Institution.

This is perhaps owing to the name by which it was christened in its infancy, and I sincerely hope the name may be so changed that the reformatory work we hope to accomplish here may become clearer to the understanding of the community.

A woman convicted of crime, it may be murder, is sent to the Reformatory. A young, wayward girl, committing, perhaps, her first offense, is also sent to the Reformatory. The public mind can see no difference in these two commitments. The young girl and the criminal must be living side by side, although in reality they are far apart, no intercourse whatever being allowed.

The Girls' Reformatory and Woman's Prison might obviate this difficulty in the minds of others, and thus remove much ignorance, as well as prejudice, from the public thought.

THE REFORMATORY DEPARTMENT FOR GIRLS.

This department was established to take charge of girls under fifteen years of age, who would be sent to it by parents, guardians or courts, needing the restraints, discipline, guardianship and education of such a school.

This department is not a prison, but a place of detention and reform. Our girls are not criminals, nor the associates of criminals, but rather victims of unfortunate surroundings, unhappy and unhealthy associations and often very bad examples.

Some of our girls are of respectable parentage, and do not come charged with any serious misdemeanor; are perhaps somewhat beyond either home or school control. Others set at

defiance all home discipline, while others are wholly incorrigible, truants from home and friends, and if left to their own inclinations would speedily develop into habits of sensuality and crime.

The period of detention is from one to three years, and within this period it is the aim to effect such a change in the girls' habits and thoughts as to give her at least a start in correct moral and spiritual principles as well as into habits of industry.

Seven hundred and twenty-seven girls have been received since this department was established. To say all have been reformed might not be true, but after careful investigation we find that about seventy-five per cent. of these are doing well. Since my connection with the Institution—almost three years—you have granted "ticket-of-leave" (including those who became of age) to ninety-four girls. Of this number sixty-nine are positively known to be doing well. Nineteen are bad, some very bad, and six are doubtful, no positive knowledge having been found concerning them.

As far as possible no girl is allowed to leave the Institution (unless she be of age) until she has attained a good grade of conduct. By this means each girl holds her future in her own hands.

The reformation we seek to accomplish is both a physical, intellectual, industrial, moral and spiritual one.

The education of the girls, both in industries and in school, is systematically carried on under competent teachers, who devote their every thought to the elevation of their minds and morals, to training them into habits of industry, as well as cleanliness, both in person and surroundings.

Daily outdoor exercise is granted them whenever the weather will permit, and ample time is given each day for indoor games and sports, reading and quiet conversation. During the summer months every evening is spent in the yard, with swings, jumping ropes and romps upon the lawn.

INDUSTRIES.

From the foundation of this department it has been the aim to train each girl in some form of industrial employment.

Changes in work are still made the first of every month, but no girl is changed from any department of work until she has

attained some degree of proficiency therein, and any girl with ordinary capacity has here the opportunity of becoming a thorough housekeeper, seamstress or laundress, and thus fitted to make an honest living in the world.

The principal industries carried on are cane-seating, painting, whitewashing, baking, both plain and fancy cooking, laundry work, sewing, including patching, darning, cutting, fitting, and draping. Special attention is paid to sewing with the needle as well as on the machine.

In scrubbing, our girls are even proficient. The milking they always do. To harness and drive a horse is even their delight; in fact, they do all the work under wise and patient teachers.

CHANCES IN LIFE.

No girl is ever sent out without a home; neither is there any scarcity of good homes for good girls. Many of the best families express a preference for girls who have been drilled here to girls either from the city or country.

Through your liberality they are always furnished with a good outfit when leaving the Institution.

Their wraps and hats, while quiet and modest in taste, are modern in appearance. Their dresses are made as other people wear them, and thus they go out into the world again without any necessity of the general public even knowing that they have been in a school of reform.

LITERARY DEPARTMENT.

The school work this year has been highly satisfactory.

Special attention has been paid to reading, writing and spelling.

Geography, both primary and advanced, has been taught.

Map drawing, with colored crayon, is often very carefully done.

Physiology and grammar have also received some attention, while both elementary and advanced arithmetic completes the curriculum of study. Much useful and important knowledge is taught by gathering up important facts and committing them

to memory; such incidents and general information as they ought to be in possession of, to be informed in matters of general interest.

A faithful record of both work, study and conduct is kept by each officer, and girls are daily marked by merits or demerits, as the case may be. Many girls work hard for a clean record.

DISCIPLINE.

Discipline in its broadest sense means to train, to develop, to chasten, to educate, and it is the regular enforcing of wholesome rules that makes good discipline.

Order can not be maintained in any other way. Obedience is God's first law and to its mandate all must bow.

We always give a girl a chance to tell her own story, and to defend her own case when reported for any misdemeanor, always urging her to truthfulness of statement, although she may be greatly at fault. Thus by gentleness and justice, united with firmness, we seek to win her confidence and to receive her willing and cheerful obedience.

Our punishment consists in depriving of privilege to a great extent. If a girl misbehaves in the school-room she is not allowed to enter again until she makes proper acknowledgment of her wrong-doing and promises better conduct in the future. Neither is she allowed to do any kind of work during school hours, but must remain standing idly in the hall.

If her conduct is bad in the general collection room or in passing down to her meals she is deprived of the privilege of the dining-room for a while, eating her food alone in the hall above.

Misbehavior in Sunday-school or church deprives her of those services until she thinks she can act differently. A girl who persists in quarreling or fighting, or in making disturbance of any kind throughout the house, is removed from the family to her dormitory for a while, where she remains alone during the day, with work for working hours and books for recreation. Sometimes, as in many private families, her clothes are locked up and she must stay in bed. When these remedies all fail, then to a solitary room she must go, with no privilege save that of her own bad companionship.

The switch or small round strap is sometimes used when necessity requires, especially with the children and younger girls. The spirit and tone of the house is better even than a year ago. Fewer punishments, and these of shorter duration, are needed, while with very many girls only a word of reproof is necessary.

Forty-four girls have been received during the year; thirty have been discharged, being of age; eighteen are now out on ticket of leave, giving ordinary satisfaction; ten have been returned for various reasons, some doing wrong that they might come back.

While our hearts are often pained by the abandonment of some of our girls to lives of licentiousness and vice, others are doing so well as to inspire within us a song of thankfulness that we have been permitted to take them by the hand and lift them out of wrong-doing into better paths.

THE REFORMATORY PRISON.

We have received during the year twenty-seven, and have discharged upon expiration of sentence twenty-two; have received from the Governor one pardon and also one parole, and have remaining fifty-five. With the exception of a few incorrigibles who come in on short sentences from time to time, the general conduct of the prison is excellent.

The system of a month's probation for new prisoners introduced during the year, and the separation from the family, into rooms alone, of all disorderlies, has done much to promote quiet and orderly conduct and to raise the tone and spirit of prison discipline.

To be deprived of the privilege of the family by having to remain in one's own room, is now a sufficient punishment for most of our inmates, although an abundance of food and work is furnished them.

INDUSTRIES.

Imprisonment alone, without employment, as a reformatory measure, is inadequate, hence the necessity of such methods of employment as will create habits of industry, and thus fit each prisoner to live an honest and industrious life when released.

Labor is also necessary for the physical and moral well-being of one in confinement.

It is nothing uncommon to hear these women talking together of the different kinds of work they have learned to do here, and none are more miserable than when not able to work.

We have excelled in our laundry work during the year. Out of 37,453 pieces laundried in the Prison Department, for city customers, only four pieces have been reported lost, injured or destroyed, giving an outlay of \$3.50 to replace them. But few complaints have been made of work improperly done. The women have worked willingly, and tried to excel.

Our Sewing Department is not below the laundry in quality of work done.

Owing to the dullness of the campaign year and an overstocked market, besides a most destructive fire in the overall establishment of C. B. Cones, Son & Co., we have been without work in our Overall Department for at least three months out of the twelve.

During this time one hundred and nine cotton mattresses were made for the Reformatory Department.

Family sewing of all kinds has been in excess this year. The dress-making department has also greatly improved.

The knitting department, consisting of socks, mittens, laces, lace caps for babies, tidies, etc., has also done well.

The laundry department for the house has been systematized, and greater care has been manifested by the prisoners in the care of their own clothing. Very little destruction of their own clothing or household furniture has been indulged in; in fact, in comparison with other years, the change in this respect has been wonderful.

There seems to be a higher sense of honor among them, and a greater desire to do right.

The work of the prison is all done by the inmates, many of them requiring a great deal of patient teaching before they acquire any degree of proficiency.

The food furnished the entire household is always fresh, wholesome and well prepared, the bill of fare being carefully written down for each meal.

A garden, supplying vegetables, perhaps in greater abundance than ever before, to the entire household, was made, planted and gathered in by two prisoners. For quantity, see table No. 8.

Every effort in our power has been directed to the physical, moral and spiritual improvement of those sent to our keeping. With the disorderlies and vagrants who come in with short sentences we do not hope to do much, but with those of longer sentences our efforts have not been without some fruit.

Prompt and unquestioned obedience is always required of the prisoners, while unvarying kindness, with no exhibition of temper or impatience, is expected of officers in charge of them.

RELIGIOUS SERVICES.

We have no chaplain here. Daily devotional exercises are held. Wednesday evening prayer-meetings, song services, Sunday-school and band meetings, are all conducted by Superintendent and Assistant Superintendent and officers in charge.

Our Union Chapel service, at 3 o'clock Sunday afternoon, has been held by various ministers and laymen of the city.

The first Sunday in the month is in charge of Rev. J. A. Rondthaler; the second is filled or supplied by Mr. Wilson Morrow, who for many years had entire charge of these services; the third Sunday is held by the Friends' Church, and has been supplied by Messrs. Adams and Sherman, Mrs. Mills and many others; the fourth Sunday is in charge of the Superintendent, who generally supplies from city pulpits.

Week-night services have been held by Messrs. Roll, Wheeler, Sullivan and wife, Ruth, Mrs. Austin and Bunting, Rev. Mr. Lamport and wife, and many others, who have come from time to time to help us in spiritual matters.

Father Allerdine has administered the sacrament and given special council to the Catholics in our midst. Although we have no creeds nor church lines here, but from all denominations we come, gathering together at the feet of Jesus, acknowledging Him "King of Kings and Lord of All."

Two infants have been born in the prison during the year, and two women were received with young babies.

According to your direction, homes have been secured for two of these children as soon as they were old enough to be separated from the mother without injury to their health. One went out with the mother in May, and one is still here.

HOLIDAYS.

The legal holidays have all been observed with appropriate ceremonies, freedom from toil and an abundance of fun. Easter symbols, Thanksgiving dainties and Christmas gifts have come to us in abundance, while Washington's birth day and the Fourth of July brought their usual sports and exercises. Even the birth days of all inmates may be celebrated by gifts from home and friends.

A very pleasing service was held in the Institution chapel on the 18th of June, being the marriage ceremony of Louisa Plymole, a young girl out on ticket-of-leave, to Wm. L. Jones, a worthy young man of Belle Union, performed by Rev. J. A. Rondthaler, of the Tabernacle Presbyterian Church, of this city. Many of our girls had never seen a marriage ceremony before, and to them it was a very pleasant surprise.

Various entertainments have been given us by kind friends from the city, perhaps none more pleasing than a concert given by Mr. Adolph Schellschmidt's juvenile orchestra, also by one given by some kind friends from the Baptist Church under the direction of Mrs. Noe.

To Miss Mary Rariden we are indebted for two pleasant evenings of fun for both children and those older; to Prof. T. J. McAvoy, elocutionist, for a Sunday service and an evening entertainment.

Flower Mission day was observed by cards and flowers from the W. C. T. U. To some good friend at the News office we are indebted for a daily copy of the Evening News; to many friends throughout the city for books, magazines and papers, especially to Mrs. Woodford for many copies of the Graphic with its beautiful engravings, and also Harper's Weekly.

If we fail to mention any who have so kindly remembered us, it is not because their gifts have not been appreciated.

Through the kindness of our many friends giving their little remittances at the door, we have been enabled to add quite a number of new volumes to our library. (For a list of books purchased see Table No. 9.)

The Youth's Companion, Sunday School Advocate and Classmate, as well as the St. Nicholas, comes regularly to the girls' reading room table.

IMPROVEMENTS.

A large dormitory has been converted into prison cells or rooms, thus giving us three large probation rooms, seven sleeping rooms and two large closets. Another sleeping room or solitary has been added by the changing of a store room. Two rooms for officers have been enlarged by removing some wooden partitions and adding plastered ones.

A bright, sunny room for our hospital officer was taken off a dormitory and her former room converted into a surgery.

One hundred and nine wire springs and cotton mattresses have taken the place of the straw beds in the Reformatory Department.

A large and commodious ice chest has been built.

The usual amount of plumbing has been done. Some quite expensive repairs have been made upon driven well pump, water tank, and also upon the engine.

Three new carpets have been purchased, and matting for two bed rooms.

All the expenses of the Institution have been met out of the appropriation, including all improvements, repairs, furnishings, besides the expense of the sewing-rooms and laundries, as in no previous year, and \$13,000 has been advanced for natural gas for the coming year. Every penny earned, the receipts from old iron, bones, rags, old barrels, bread, yeast, etc., etc., has been turned into the State Treasury. The most careful prudence and economy has been used in making purchases, and the State's interests have been guarded at every point. Perhaps we can say what can not always be said of institutions of this kind, that not one stitch of sewing, darning or mending, the knitting of lace, or anything else, has been done by the inmates for any member of the Board of Managers, Superintendent, or any officer, without full value for the same having been paid into the State Treasury, for which each one holds her receipts. No extravagant laundry lists for Superintendent, officers or inmates has been permitted. Lessons in economy have been instilled into the minds of all, and as we close this year it is with the consciousness of having, under all circumstances, done the best we could, and yet we have been brought face to face with the fact that however well we may do our part, or

however capable and conscientious the management of any institution may aim to be, it is always more or less exposed to attacks from the public, and perhaps this is truer of efforts made for women and girls than for any other.

Ignorance of any work has often been a fruitful source of distrust of its value.

CHANGES.

But few changes have been made in our corps of officers.

Mrs. Abigail Broadrup, one well acquainted with the work of the prison, succeeded Miss Bettie Gwin as Prison Matron in the month of March.

Mrs. S. J. Peak, a nurse from the Training School for Nurses, came among us when, on account of ill health, Miss Susie Pray was compelled to resign, but remaining only two months was succeeded by Miss Helen P. Craig, of this city.

Failing health of Miss Alice Barnhart caused her resignation during the winter, but her place was soon filled by Mrs. Alice Pearce, of this city.

Mr. John Madinger succeeded Mr. Robert Gray as engineer, and also added to his duties that of Day Watchman, or man of general work.

In the faithful performance of the many and varied duties assigned them, and in the judicious manner in which they, with perhaps one exception, have dealt with the various dispositions committed to their care, these officers have merited our unqualified commendation.

I can not close the records of this year without expressing my personal sense of obligation to you as a Board of Managers for the confidence and hearty coöperation you have always so cheerfully extended to me.

Respectfully submitted.

SARAH F. KEELY,
Superintendent.

PHYSICIAN'S REPORT.

INDIANAPOLIS, IND.

To the Board of Managers of the Indiana Reformatory Institution for Women and Girls:

LADIES—Following is a report from the Medical Department of the Institution for the year ending October 31, 1888:

My connection with the Institution began March 8, 1888. My report is based upon Hospital records.

In the Penal Department, with the exception of a few cases of dysentery and two of typhoid fever, there were no serious acute cases. A large number suffering from venereal and other chronic diseases have been under medical treatment.

In this department there was one birth, John J. Nett, September 14, 1888; mother admitted June 3, 1888.

In the Reformatory Department no epidemics of diphtheria prevailed during the months of November and December, 1887, and one of tonsillitis during the months of September and October, 1888, both much more extensive because of the impossibility of properly isolating patients with the present hospital accommodations. There were also during the year four cases of chicken-pox, four of erysipelas, two of typhoid fever, and two of abscesses, one of hand and arm and one of knee. The remainder receiving treatment during the year were principally chronic cases.

There were no deaths during the year in either department, and during the months from April to August, inclusive, no serious acute sickness. Both of these gratifying facts were largely due to the excellent sanitary condition of the building, and to the nutritious and well-prepared food provided.

My thanks are due all with whom my work has brought me in contact, for help variously extended.

Respectfully submitted,

MARY SMITH,

Physician.

SECRETARY'S REPORT.

OFFICE OF THE
INDIANA REFORMATORY INSTITUTION,
November 1, 1888. }

To the Board of Managers:

I herewith submit my third annual report, and the seventeenth of the Institution, consisting of a full statement of the financial and statistical operations of this Institution for the fiscal year ending October 31, 1888.

Very respectfully,

MARGARETTA S. ELDER,
Secretary.

FINANCIAL TABLES.

STATISTICAL TABLES.

PENAL DEPARTMENT.

TABLE No. 1.

Showing the Number of Prisoners Received and Discharged
from November 1, 1887, to October 31, 1888.

Number remaining October 31, 1887.....	52
Received in year.....	27

Total.....	<u>79</u>
------------	-----------

Discharged by expiration of sentence.....	22
Granted ticket-of-leave by the Governor	1
Pardoned by the Governor.....	1
Remaining October 31, 1888.....	55

Total.....	<u>27</u>
------------	-----------

Of the 27 received during the year.....	18 were white.
Of the 27 received during the year.....	9 were black.

Total.....	<u>27</u>
------------	-----------

Of the 27 received during the year....	24 were first conviction.
Of the 27 received during the year....	3 were recommitments.

Total.....	<u>27</u>
------------	-----------

Highest number of inmates during year.....	55
Lowest number of inmates during year.....	46
Average number of inmates during year.....	50
Deaths since opening.....	14
Recommitted since opening.....	29
Total number received since opening.....	390
Total number discharged since opening.....	329

TABLE No. 2.

Showing Different Crimes.

<i>Crime.</i>	<i>Received in Year.</i>	<i>Remaining October 31, 1888.</i>
Petit larceny	10	14
Grand larceny.....	8	14
Burglary.....	1	1
Murder.....	2	15
Perjury.....	1	1
Felony.....	1	1
Forgery.....	1	0
Grand and petit larceny	2	2
Receiving stolen goods.....	1	2
Manslaughter.....	0	1
Arson.....	0	1
Robbery and petit larceny	0	2
Assault and battery.....	0	1
Total.....	27	55

TABLE NO. 3.

Showing the Sentences of Prisoners.

<i>Sentence.</i>	<i>Received in Year.</i>	<i>Remaining Oct. 31, 1888.</i>
For three months.....	1	0
For one year.....	11	11
For two years.....	9	16
For three years.....	3	11
For four years.....	1	2
For five years.....	1	1
For six years.....	0	1
For twelve years.....	0	1
For twenty years.....	0	1
For life.....	1	11
Total.....	27	55

TABLE NO. 4.

Showing the Several Years in which the present Inmates were Sentenced.

1868.....	1
1871.....	1
1877.....	1
1878.....	1
1881.....	2
1882.....	2
1883.....	1
1884.....	1
1885.....	2
1886.....	5
1887.....	14
1888.....	24
Total.....	55

TABLE NO. 5.

Showing States and Countries of which Prisoners are Native.

Indiana.....	29
Illinois.....	1
Kentucky.....	9
Ohio.....	1
Pennsylvania.....	2
Florida.....	1
Virginia.....	2
Mississippi.....	2
Missouri.....	1
Louisiana.....	1
Tennessee.....	1
New York.....	1
United States.....	51
Germany.....	4

Total.....	55
Oldest prisoner as to age.....	73 years
Oldest prisoner, time served.....	20 years
Life time prisoners.....	11
Infants.....	4

TABLE NO. 6.

Counties where Convicted and Numbers from each.

Bartholomew	1
Blackford.....	1
Clinton	1
Dearborn	1
Decatur.....	2
Dubois ..	2
Gibson	4
Howard	1
Huntington	1
Jefferson	1
Jennings	1
Marion	9
Morgan.....	1
Pike	1
Switzerland	2
Spencer.....	1
Vanderburg.....	13
Vigo	7
Wabash	1
Warrick.....	1
Washington	1
Wayne	1
Whitley	1
Total.....	55

TABLE NO. 7.

Counties from which Prisoners have been Received since the
Opening of the Institution.

Allen.....	9
Bartholomew	6
Benton.....	2
Blackford	2
Boone	2
Carroll.....	2
Cass.....	6
Clark	5
Clay	5

In Charge of Patch-Room.

BOARD OF CONTROL REPORT.

THE INDIANA REFORM SCHOOL FOR BOYS, }
PLAINFIELD, INDIANA.

ISAAC P. GRAY,

Governor of Indiana :

In compliance with the law, the Board of Control of the Indiana Reform School for Boys, makes this report for the fiscal year ending October 31, 1888, and which is the twenty-second annual report of the institution.

The institution was opened for the reception of inmates January 1, 1868, and until 1883, when the present name was adopted, was known as the House of Refuge.

Since the opening there have been received 2,795 boys, and of this number 462 remained at the close of the fiscal year.

The last report of the Board dwelt at length on the methods adopted for the reformation of the boys, their employments, and also gave other interesting information. The Board deems it unnecessary to repeat this information, but respectfully refers Your Excellency and the Legislature to that report.

OFFICERS.

The experience of another year confirms the opinion expressed in the last report, that "it is only the test of actual work that can determine the fitness of an officer for reform school duties." The Board permits the Superintendent to discharge an incompetent or unworthy officer as soon as the fact is developed. The Board looks to the Superintendent for good work, and it would be unreasonable to expect this if he was required to retain incompetent officers.

Attention is again called to the fact that an efficient reform school is educational in all its departments. The instruction given in the school room is only a part of the work necessary for reformation. That imparted while the boys are in the family relation (the boys being divided into family groups) is as important and necessary as the instruction of the school-room. All the officers must be *teachers* to effectively carry on the work of reformation. They must instruct the boys in the family while at work, in the dining-room, and, in short, wherever they have charge of them. Unless an officer is devoted to the work he will fail to accomplish good results. Then he must understand boy-life and exercise tact and kindness in all his dealings with the boys. The Board claims, and takes great pleasure in informing the people of the State, that the Indiana Reform School for Boys has an efficient corps of officers, from Superintendent down to night-watch, and that the good reputation and work of the school must be attributed to this fact. A number of our officers have been employed for years in reform school work, and the Board retains them for their worth and disregards other considerations.

COMMUTED BOYS.

It affords the Board much pleasure to report that the conduct of nearly all the commuted boys or young men has been good during the year. They have furnished additional evidence of the wisdom of that clause in our law which empowers the Governor to commute the State Prison sentences of young men under twenty-one years to the Reform School. The number of these commutations made by your Excellency is forty, and of these only four have shown themselves unworthy of your executive clemency. It would be unreasonable to hope to save all, and it would be unwise to refuse all applications because of the failure of reformation of only the few. The Board again suggests that a reformatory for young men between the ages of twenty-one and twenty-five should at an early day be established in our State.

WHERE THE BOYS COME FROM.

A table showing the number of boys committed from the several counties is herewith submitted. It will be noticed that the counties having the large cities furnish the highest number of boys. The centers of crime are in the cities. There are found many temptations which do not exist in rural counties. In the country the boys work on the farm with the father. In the cities the father goes to his business or work early in the morning and sees nothing of his children until he returns home at night. From necessity, in many cases, the boys do not receive the necessary care and oversight from parents. They seek the street for amusement and fall into bad company. * Many get beyond parental control before the parents are aware of the fact, and then an application is made to have the boys sent to the Reform School under the incorrigibility clause, or they are sent by the courts for crime. There are other parents in the cities who can not, or will not, try to govern themselves, and are unable, if they were so inclined, to control their children. There is still another class of boys sent from cities—the boys who have no parents alive and who have drifted into the cities. Then there are the boys who have a step-father or step-mother. The word “home” has very little meaning for a large majority of the boys belonging to these classes. What is best to be done with these boys when, by good conduct, they are entitled to a discharge, is always a serious question for the board and Superintendent. There is great risk in sending them back to their former places of abode and old associates, but a refusal to do so is considered by the boys as a great hardship. It is, therefore, thought best to give the city boys a trial upon the same terms accorded boys who have good homes to return to. Although the Superintendent requires them to report often and furnish certificates from their employers or friends, many of them in time fail and have to be returned to the school. The returned boys are nearly all from the cities.

WHAT SHOULD BE DONE WITH THEM?

Machinery has not, and will not be introduced by the present management. It is not best to instruct the boys in trades that must be followed in crowded shops. The Board adheres to the

views expressed on this subject in the last report. The city boys, as well as those from the country, should be instructed in all kinds of garden and farm labor, and every effort made to inculcate a love for it. The Board believes this will be best for the boys, and best for society and the State. It is the experience of the management that released boys who have gone out to live on farms, have almost invariably done well.

MORE LAND REQUIRED.

That all the boys may be instructed in farm labor, more land is required. The State Farm contains 225 acres, but only about 175 acres can be cultivated, as some fifty acres are taken up with the buildings, play grounds, etc. The Board has been offered, at a reasonable price, 160 acres adjoining the farm on the west. The Board earnestly requests an appropriation to purchase this land. It must not be forgotten that the Reform School should do a two-fold work: 1st. Reform the characters of the boys; 2d. Prepare them to support themselves by honest toil. It is a waste of time and money to merely reform the character of a boy and then turn him out ignorant of any kind of steady employment. It will be economy in the end, to send out the Reform School boys so instructed in farm labor that they will have no difficulty in securing work in the country, for then, in all probability, they will cease to be a care and expense to the State. With the addition of the 160 acres, the farm will not be as large as those of many of the States.

IMPROVEMENTS.

For six years past the labor of the boys has been utilized in making extensive and valuable improvements. These have been made at a comparatively small cost to the State. The boys made the brick and laid them, and, in addition, did most all the carpenter work, plastering, painting, glazing, etc. During this time there has been erected four commodious family buildings, a large barn, gas houses, large additions to the boys' kitchen, a laundry and wash-house, and several small buildings. In addition, the chapel has been remodeled, a beautiful greenhouse built, and the buildings put and kept in perfect condition. There is now room for 600 boys. The property has grown to be very valuable.

SHALL IT BE PROTECTED.

Coal fires are used in all the buildings. There are very few public buildings in this country which are not heated by steam. It is much safer and just as economical in large institutions. The Board, therefore, feels that it is warranted in making an earnest appeal for steam heat, and asks an appropriation for that purpose. There is an abundance of water in the lake, not 100 yards from several of the buildings. With steam and force pumps a good fire protection can easily be secured. Steam can also be utilized in cooking the boys' food, and also for washing and laundry purposes. A large kiln of brick was burned last summer, and these can be used in erecting the boiler-house, and all the work can be done by the boys.

FIRE.

A fire in October almost totally destroyed the wash-house and laundry. The Superintendent and Board determined not to rebuild, hoping that the Legislature will give an appropriation for steam. This will necessitate the change of its location. During the past three years there have been several small fires, but fortunately they were discovered in time and the loss was small.

JUVENILE PRISONERS.

The Board calls attention to the practice of keeping juvenile prisoners in the same jail apartments occupied by experienced and hardened criminals. The law of section 6128, Revised Statutes, is not observed in many of the counties. This section should be amended, made imperative, and penalties fixed for failure to observe it. Locking boys up with men has resulted in several cases, which have come to the knowledge of the Board, in the perpetration of horrible practices. The jail system of Indiana is far below the standard suggested by those who have made the subject a study. Some of our jails are schools of vice, maintained at public expense. The general public has very little conception of the effective work done by the hardened, criminal school-teacher. The taxpayer and philanthropist should take hold of this subject and work a reformation in the jail system of the State.

COST OF KEEPING BOYS.

The Board has fixed the cost of keeping a boy for the present fiscal year at \$120. Under the law the counties from which boys are sent pay half of this amount for each boy.

THE RESULTS OF REFORM SCHOOL WORK.

It would be unreasonable to hope to save all the boys committed to the Reform School. The public always hear from the boys who turn out badly. It is not the policy of the management, and it would not be wise in the public, to parade the virtues of the boys who do well after leaving the school. The Superintendent receives hundreds of letters from discharged boys, which he submits to the Board at the monthly meetings. These letters often enclose certificates of good behavior, and that the boys are industrious. In this way, and from personal inquiry, the Superintendent and Board can form some estimate of the good results of the work. It is not unusual to receive letters from former inmates, who are now men with families, containing words of acknowledgment for the benefits the writers derived from the school. As the boys are only discharged when they have their honor, they leave the school with grateful and cheerful hearts. If their conduct continues good it is but natural that they should inform the Superintendent of their continuance in well-doing. The evidences of successful reformation cumulate every year and inspire the management with new zeal to carry on the work.

CONCLUSION.

The Board takes this opportunity to commend the efficient work of the Superintendent, T. J. Charlton, the Physician and the Chaplain, whose reports are filed herewith. All the officers, male and female, have been untiring, faithful and efficient in the duties assigned them, and have contributed largely to make the Indiana Reform School a blessing to the boys, a credit to the State, and they have given it a character for good work which is second to no other reform school in the country.

LEWIS JORDAN, President.
L. A. BARNETT,
HAMET N. HELMS,
Commissioners.

SUPPLEMENTAL SUGGESTIONS BY THE PRESIDENT OF THE BOARD.

Since the foregoing report was signed by my colleagues on the Board I have concluded to add a few suggestions on questions that should be considered by the Legislature, and which Your Excellency may think of sufficient importance to warrant you in calling attention to them in your message.

The number of abandoned, neglected and criminal children is constantly increasing, and with this increase comes additional burden on the tax-payers. It might be well for the Legislature to consider the causes of this increase and enact laws that will, to some extent at least, remedy the evil.

Parents, in many cases, are directly responsible for their boys being inmates of the Reform School. I will not stop to show how, but I state the fact which I know by personal experience. It is now eleven years since I first became a member of the Board, and during that time I have learned much of the family history of the boys, have heard the tale of woe of many of their abandoned mothers, and have looked into some of the homes made wretched by the conduct of fathers. It will be seen by the report that more than one-fifth of the boys committed since the opening of the school were sent from Marion County, or in fact from Indianapolis. This large number is not a pleasing commentary on our civilization. It is an evidence that there is a failure somewhere, and my only object is to start an investigation and discussion which may lead to a discovery of the true cause of the large number of criminal boys. I know it is quite common to attribute all the crime and evils of society to intemperance. This contributes, but is not the sole cause. So far as our records show there are comparatively few boys the sons of foreign-born parents. The Germans, especially, maintain family government and keep the obligation to provide for their children. The abandoned, neglected, and largely as a result of these, the criminal children, are of American parentage. We are developing, especially in our cities and large towns, a peculiarly American type of boys and youths. Several causes contribute to this, but perhaps the

chief cause may be traced to the parents. The obligations to care and provide for their children rest lightly upon many parents, and too often are entirely ignored by others. The act of April 16, 1881, entitled "An act concerning husband and wife," was a step in the right direction. This act compels the husband to contribute to the support of the wife and children. But does this act go far enough in enforcing the obligations of the father? Cruelty to animals is punished by our laws. Is it not the refinement of cruelty to neglect or abandon helpless children, as is quite frequently done by the more than brutal parents? Would it not be well to provide a *criminal* statute that would punish this kind of cruelty?

And this leads me to say that there should be some changes made in our laws relating to marriage that will have a tendency to make those entering into it fully realize the obligations they are assuming. Hasty and inconsiderate marriages are increasing, and the road to divorce is so broad that many walk therein. The children on the road are either crushed or step aside into the arms of the charitable or in time fall into the clutches of the law.

For years I have seen the crushing effect of the "divorce mill" on the children. I can not enlarge, but dismiss the subject with the suggestion that our loose laws on the subject of marriage and divorce might possibly be so amended, as in time, to decrease the number of abandoned, neglected and then criminal children who become a charge on the State.

A PROTEST.

The idea of paternal government is a favorite one with many good people. So far as children are concerned I protest against propositions to save them by gathering them into institutions supported by the taxpayers. No matter how well managed, or how kind and paternal the government may be, it is still a great misfortune for a boy or girl to spend childhood in an institution. It should be the last resort. The mere fact of having been an inmate of a public institution will at least cast a shadow over their lives, and mar their happiness if they ever become worthy of the proud distinction of being good citizens.

All hope is gone when a child becomes thoroughly "institutionized." In the cases of criminal boys and girls their confinement is necessary, but as soon as the restraint can be removed by their good conduct it should be done. The Indiana Reform School for Boys has never gloried in large numbers and the management has ever rejoiced when the good conduct of the boys warrants a decrease of the numbers present. The moral dangers to children in congregating them in institutions are great, and they should never be exposed to them if it can possibly be avoided. In addition, the every-day work, such as children should be required to do about a home, they have no opportunity of doing in an institution where light, heat and food are wholesaled to them, and where individual exertion to supply every-day wants is minimized to the last degree. The best charitable thought of the day suggests that all charitable institutions for children shall be conducted as "clearing houses." The plan is to gather the dependent, homeless and orphan children into the institutions, and then make a *business* of securing homes for them with families. This has been successfully done in some of the Eastern States. A good home in some kind family will often save the boy from going to the Reform School. I make these suggestions because of the increasing efforts being made to add charges for support of children to the overburdened taxpayers, and because I believe the policy is a blighting one for the children.

LEWIS JORDAN,
President Board of Control.

SUPERINTENDENT'S REPORT.

To the Board of Control:

Another year has closed, and I submit to you my Ninth Annual Report.

RETROSPECT.

Nearly nine years ago I became your Superintendent. To me they have been years of labor, but at the same time years of happiness. Although my whole previous life since I reached manhood, had been devoted to the education of the young, and although I greatly enjoyed those years which I gave to my school work, yet I can truly say that never, until I entered this work of saving unfortunate boys, have I been perfectly contented. In this work I have realized that this is the most hopeful work allotted to man. I have been enabled to see results which before I deemed impossible. I can now bear testimony that Reform Schools are a success. I have learned that there is a recuperative power in a boy. No matter how far he has fallen, yet under proper guidance he is able to reach a virtuous manhood. Let skeptical misanthropists croak as they will as to the impossibility of reforming the youthful criminal. I *know* that it can be done, and *is being done* every day in our school. If there was no recuperative power in a boy, where would be the men who now control the destiny of our nation? Where is there a mortal who has not sinned and done wrong? These boys who are sent to the Reform School are like other boys. They have affections, sympathies and reason. The only difference is that their environments were bad—so bad that had we been in their places in all probability we would have been where they now are. Realizing this, let the mantle of charity cover their faults.

WHAT HAS BEEN DONE?

In the years since I became your Superintendent we have added much to the comfort of the boys. In this order we have erected:

1. The present commodious dining-hall.
2. The wash-house and laundry.
3. Four new family buildings.
4. A new boys' kitchen.
5. Coal gas works.
6. A new barn.
7. Three coal houses.
8. Green-house.
9. An addition to the Chapel.
10. Many alterations and improvements in the old buildings.
11. A new bakery.
12. A new ice house.
13. A repair shop.
14. The commodious root cellar.

These buildings and repairs were all made by the boys under the instruction of competent officers. In this way we have been enabled to teach trades. While all these enterprises have been accomplished, every year has added to the home comfort of the boys in other ways. They have been educated mentally and morally.

OUR DAY SCHOOLS.

In this school a boy attends school one-half of the day and works the other half. The schools are in charge of competent teachers, and the results are greater than are seen in any public schools. I attribute this to the superior discipline which we have and to the regularity in attendance. We have *no truancy* and *no absenteeism* except in cases of sickness. The boys are all supplied with school books and every school appliance needed.

OUR SHOPS.

First. Our chair shop teaches our small boys to cane chairs

Second. Our shoe shop teaches first repairing, then the manufacture of shoes.

Third. Our tailor shop teaches them to cut and make all articles worn by the boys. All the clothing worn here is made in our tailor shop.

Fourth. Our carpenter shop teaches most thoroughly the use of tools.

Fifth. Our gas works are constantly sending out boys to fill places in the gas works of the State, some of whom are in charge of gas works elsewhere.

Sixth. Our paint shop has sent out many expert workmen.

Seventh. Boys are taught farming, gardening, floriculture, care of all kinds of live stock, laundry work, cooking, waiting on tables, plumbing, driving teams, milking cows, darning socks, repairing clothes, brick making, bricklaying, plastering, kalsomining, and baking bread, etc. Go where you will during work hours, and all are busy. Thus the habits of industry are taught to all. Every effort is made to make the boys self-supporting when they leave the school.

HEALTH.

The health of the boys during the past year has not been so good as in former years. For some years we were able to report not a single death, but during the past year there have been four cases of death. For a full report of these I refer you to the report of our excellent physician, Dr. Amos Carter.

OUR HOSPITAL.

At considerable expense we have made many improvements in the building erected for that purpose. We have had in charge of the sick a *graduate of the Indianapolis Training School for Nurses*, who is required to give her entire time to the care of the patients. If a boy cuts his finger or has suffered any other injury he goes to her to have his wounds dressed. In addition we have added to the Hospital force another woman,

who has the cleaning of the building and the Hospital cooking in her charge. I cannot conceive of a more complete hospital than we now have. A sick boy has better care than he could possibly receive at home.

SANITARY CONDITIONS.

Our sewerage system is perfect, the natural drainage is good, and the ventilation of all buildings could not be improved. The only defect is in the heating facilities. As yet we heat by stove and furnaces. I trust that the coming Legislature will supply us with steam heating.

BATHING FACILITIES.

In summer our boys are taken to the pond made in the White Lick Creek, where they first wash with soap and water, and follow by an exhilarating swim. In winter they bathe under spray baths. When we get steam I hope to have the present wash-house given up to bathing altogether, and to have large swimming pools.

A NEW LAUNDRY.

During the fall (October 2, 1888), the wash-house and laundry took fire during the noon recess and was almost totally destroyed. The fire originated in the drying department from sparks from the furnace. A temporary roof was placed over the south wing, which enables us to do the washing there. But the time has come for the erection of a steam laundry, which should be large enough to embrace a *tailor shop*, *patching room* and *darning room*. This building, with the labor of our boys, could be completed at a cost of *not over* \$6,000. The steam power needed would (if separate), cost about \$1,100, while a complete set of laundry machinery would cost \$2,200; making the entire cost \$9,300. I most earnestly request that the Legislature be asked to make this appropriation, so that our school in this respect may be placed on an equality with the other State institutions.

STEAM HEATING.

The item \$1,100 for laundry should be merged into the general system for heating all the buildings. The danger of 120 stoves and furnaces is so as to call for the immediate provision of a boiler house, and a general system of steam heating. This is the only State institution that is compelled to heat by stoves. The consequence is that, with all of our vigilance, every year we have had fires. The burning of the wash house and laundry compels us to give up No. 12 family building for the use of the ironing department. Twenty thousand dollars would erect a boiler house and give us steam for heating. The boiler house should be erected at the foot of the bluff where the green house now stands. Thence by a system of tunnels for the main steam pipes the steam could be carried to the buildings. We have 300,000 bricks already made which would erect this boiler house and the tunnels. The labor would all be done by the boys, under the direction of a few experts.

A LIBRARY NEEDED.

While we have supplied the boys on an average with 140 papers daily, that they may inform themselves of the current news of the country; while we have supplied each boy with copies of the History of the United States, and with manual of the Sunday School lessons for the year, yet our library of miscellaneous books is very small. We have long felt the need of a good library of books, suitable for youths. I recommend that an appropriation of \$500 be asked for the purpose, and that with this money suitable book-cases be placed in the chapel and filled with choice books.

MORE LAND NEEDED.

This is a farm school, and yet the entire farm embraces but 225 acres. Much of this is used for lawns and play-grounds, giving us but little pasturage. We need as much more land, and I again recommend the purchase of the farm lying just west of the State farm. It can be bought of the present owner,

John S. Moore, for \$65 per acre, which is very cheap. In its present condition it would not add much to the revenues of the Institution for a couple of years, as it needs much labor to put it in good condition. But it would give us the pasturage requisite for a new dairy which we should maintain in a school of this kind. We should have 50 or 60 milk cows to supply all the milk and butter used. This purchase would have been made by the last Legislature had not the deadlock prevented. Even with this purchase this school would have less land than belongs to most State Reform Schools.

FOOD.

Believing that reformation can not be successfully accomplished on empty stomachs, we have at all times given the boys plenty of good, wholesome food. I believe that this is generally acknowledged. As a consequence our boys look well, and are strong and athletic.

CLOTHING.

Each boy has two suits of indigo blue jeans. Each suit consists of coat, vest and pants. For summer shirting we use what is known in mercantile circles as "Hamilton Stripe." In winter, "Iron Mountain Flannel." For summer socks, cotton yarn, and for winter socks, woolen yarn. For summer hats, malaga straw, and woolen caps for winter, and military caps for Sunday. For the feet, strong stoga shoes.

FLORICULTURE.

Until two years ago this was somewhat neglected in order to give time to the completion of the lawns and other work, but believing that the criminal boy should be surrounded by scenes of beauty, this department was established, and although it requires a competent florist, I believe it has paid for the outlay. We have two neat green houses filled in winter with choice plants. In the summer our lawns and flowers add much to the beauty of the home which the State provides for her erring and unfortunate boys.

DISCIPLINE.

Youth is the period above all others that requires discipline. It is discipline that fits the boy for a life of usefulness. Especially is it indispensable in a reform school; bad habits must be broken up and good habits must be formed. Respectful obedience must be taught, else there can be no reformation. Respect for the rights of others must be inculcated before we can teach honesty. Bad tempers must be suppressed and good tempers must be cultivated. This is but part of the work of discipline. Our discipline here is good, our boys are polite, attentive to instructions and gentle mannered.

HOW IT IS SECURED.

First of all by good treatment. Example must accompany precept, else the preceptor will see no good results. When a boy arrives here he expects harsh treatment. He is surprised to find that he is welcomed as a brother. He is placed in a family with boys near his own age, where he is welcomed. He is placed in a school to make up in his education for the years he has wasted. He is assigned to work at some pleasant labor. He goes to the play-ground, where he enjoys heartily the play. He is encouraged to "*cease to do evil and learn to do good.*" He learns that, as in the natural world, if we violate a law of nature we must in some way suffer the consequences of such violation, so, in the moral world, every violation of the moral law brings its punishment. When he enters the school he is given a standing, which he calls his "badge." This badge is determined by the offense for which he is committed. Good conduct improves it, while bad conduct makes it worse. For this violation of rules he receives a "report." This report he is allowed to explain as best he can; if it indicates a serious defect in his character, his standing for the month is affected by it. It may prevent his promotion or degrade him. If very serious, his officer sends a written application to the Superintendent reciting the offense and asking for permission to punish him to a certain extent. The Superintendent examines the application, and either refuses or grants the application as requested, or in

a modified form. The following is the system followed. Each officer in charge of a family (no others) is provided with a book, the pages of which are perforated and are worded as follows:

APPLICATION FOR CORPORAL PUNISHMENT.

REFORM SCHOOL FOR BOYS,
PLAINFIELD, IND.,
_____, 1888. }

T. J. Charlton, Superintendent:

I desire instructions whether or not to punish _____. No. _____ Offense _____.

My own judgment is that he should receive ____ strokes.

Very respectfully,

Officer.

PERMIT.

REFORM SCHOOL FOR BOYS,
PLAINFIELD, IND.,
_____, 1888. }

You are hereby permitted to punish No. ____ with the strap ____ strokes, but not until you have called him up and kindly shown him the gravity of his offense, and that you are discharging what to you is a painful duty.

T. J. CHARLTON,
Superintendent.

My aim is to reduce corporal punishment to the minimum. I allow each boy to accompany the application to present his cause to me in person. I allow no punishment except when I am satisfied that it is just. I give every boy free access to me to report any wrong doing on the part of his officer. If an officer mistreats a boy he is summarily discharged. Every boy here knows his rights and maintains them.

MORAL AND RELIGIOUS TRAINING.

We teach no sectarianism, but we do teach principles of a broad and liberal Christianity. Our former Chaplain, John G. Blake, left us New Year's day to take charge of the State Institution for the Education of Feeble-Minded Children, at Richmond, Ind. For seven and one-half years he had been the Chaplain of our school. The boys loved him with a love that I never saw equalled. They knew he was their friend. The great good he accomplished here will never be measured until that Great Day, when God will adjudge the world. For a time we felt lost in our efforts to secure his successor. His loss seemed irreparable. But after months of prayerful waiting, Bro. Hilton U. Brown was solicited to take up the work. He accepted, and I am happy to report that he has proven to be the "right man in the right place." He possesses the zeal of "Brother Blake," and the boys love him dearly.

OUR CATHOLIC BOYS.

Believing that proselytism in Reform Schools is wrong, it has ever been our aim to strengthen the religious faith of each boy in the religion of his parents. We have welcomed the kindly visits of Rev. August Bessionies, of Indianapolis, to instruct the Catholic boys. No matter how stormy the weather, this pious prelate has made his regular visits to the Catholic boys here. He assembles them in Chapel, and teaches them the principles of their faith, and his labors here have been greatly blessed. The good results are seen in the daily life of the boys instructed by him. I trust that his life, filled as it is with good works, will be prolonged many a year to help us in the work of reclaiming these wayward boys.

AMUSEMENTS.

Every encouragement is given the boys to enable them to make their stay at the Reform School pleasant. Not believing in "straight jackets" for children, we have participated in their sports. Music is made a prominent feature in the work of reformation. The hours of play are enjoyed by all. Base ball

and foot-ball are the principal games of the out-door sports. In bad weather the Gymnasiums are used one hour each day. The boys out on tickets-of-leave miss the sports they enjoyed while at the School, and they often return to share them for a day.

DO REFORM SCHOOLS REFORM?

Unhesitatingly I answer "Yes." Not a single boy leaves our school but is greatly benefited. He goes out full of hope and resolution. If he returns to a bad home he may, after a time, fail and be recalled to the school, or he may, after the lapse of years, be committed to one of the prisons; but in no case is he injured by the stay at the school. He can never blame the State for not trying to save him. There are very few who can stand against the influences of a vicious home, but in nearly all cases where a boy is sent out to a fairly good home he holds out faithful.

The following report of L. D. Drake, our efficient gardener, combines the report of garden and farm:

INDIANA REFORM SCHOOL, }
PLAINFIELD, IND., Oct. 31, 1888. }

T. J. Charlton, Superintendent:

I submit the following as a correct table of farm and garden products for the year 1888:

GARDEN.

Asparagus	1,972 bunches.
Beans (green).....	120 bushels.
Beets	400 bushels.
Celery	5,000 bunches.
Cabbage.....	20,000 heads.
Sweet corn	3,928 dozen.
Cucumbers	400 dozen.
Kraut.....	15 barrels.
Lettuce	159 bushels.
Melons (musk)	6,749
Melons (water).....	1,335
Mango peppers	500 dozen.
Onions used	3,295 dozen.

Onions matured.....	778 bushels.
Peas.....	183 bushels.
Pickles (cucumbers).....	65 barrels.
Radishes.....	7,801 dozen.
Rhubarb	2,431 bunches.
Sweet potatoes	300 bushels.
Spinach.....	110 bushels.
Turnips.....	300 bushels.
Parsnips	300 bushels.

FARM.

Clover hay	10 tons.
Corn.....	1,100 bushels.
Oats	1,000 bushels.
Potatoes	1,450 bushels.
Apples.....	150 bushels.
Crab apples	200 bushels.
Pears.....	200 bushels.

Respectfully submitted.

L. D. DRAKE.

The above report shows the bountiful yield of farm and garden.

STORAGE FACILITIES.

Our vegetable house, garden house and root cellar have furnished good storage for all we have produced, as well as those purchased. At no time of the year are we without vegetables for table use.

NEED OF MORE LAND.

Two hundred and twenty-five acres are not sufficient for the needs of the school. An additional farm should be purchased to supply the much-needed pasturage, so that our dairy may be enlarged.

The following is the number of boys remaining in the School at the close of each fiscal year :

1st year.....	112
2d year	118
3d year	217
4th year	196
5th year	191
6th year	216
7th year	265
8th year	328
9th year	324
10th year	339
11th year	383
12th year	330
13th year	347
14th year	330
15th year	372
16th year	393
17th year	437
18th year	440
19th year	516
20th year	439
21st year	462

The average number in the School for the first year was 451.

ESTIMATED COST.

The cost per inmate has been but little less than \$120 per year, and I recommend that that be made the estimate for the coming year.

The following table exhibits the number received each year since the School was established, January 1, 1868 :

1868.....	112
1869.....	29
1870.....	142
1871.....	37
1872.....	64
1873.....	95
1874.....	113

1875.....	153
1876.....	129
1877.....	117
1878.....	145
1879.....	107
1880.....	149
1881.....	157
1882.....	177
1883.....	149
1884.....	182
1885.....	179
1886.....	203
1887.....	166
1888.....	190
Total.....	2,795

The above table, after deducting the deaths, show that over 2,200 boys have passed through the School and are out in the various walks of life. Some have fallen and been sent to prison, but most of them have done well.

BOYS ADMITTED.

The following table shows the number of boys admitted during each month of the past year:

November.....	15
December.....	15
January.....	14
February.....	12
March.....	17
April.....	21
May.....	12
June.....	20
July.....	10
August.....	7
September.....	18
October.....	29
Total.....	190

Including the returned boys the total number admitted during the year were 290 ; 247 of these boys were white and 43 were colored ; there remained in the school October 31, 377 white and 85 colored. Most of these were committed for criminal offenses.

“ THE COLOR LINE.”

There is no race distinction here. Colored and white boys constitute each family. I have never discovered any essential difference between the races here, either intellectually or morally.

RELEASES ON TICKET OF LEAVE.

The following table shows the number of boys released each month during the year past:

November, 1887.....	10
December, 1887.....	13
January, 1888.....	14
February, 1888.....	36
March, 1888.....	22
April, 1888.....	28
May, 1888.....	14
June, 1888.....	31
July, 1888.....	5
August, 1888.....	23
September, 1888.....	27
October, 1888.....	13
Total.....	236

Leaving in the Institution October 31, 1888, 462 boys. These boys were *not discharged*, but were simply released on trial. Upon leaving the school a boy is granted a ticket but for 30 days. When this ticket expires the boy must send proof of good conduct, and if these are satisfactory, his leave is extended for 60 or 90 days longer. If unsatisfactory, he is ordered to return to the school. During the year 70 *boys were recalled to the school*, but these were mostly from the boys who had gone out in former years. These were recalled each month, as follows :

The following boys were recalled to the school during the year:

In November, 1887.....	4
December, 1887.....	8
January, 1888	3
February, 1888.....	9
March, 1888	8
April, 1888	8
May, 1888	4
June, 1888	2
July, 1888.....	8
August, 1888	7
September, 1888	2
October, 1888.....	7

Total	70
-------------	----

Some of these boys, not finding employment, returned of their *own* accord. The wholesome effect of returning boys who fail is one of the most gratifying results of this work. These boys seldom fail when given a *second* trial. It has always been my conviction that the State should provide for a *visitor* whose duty it should be to visit every county in the State to aid boys in need, and to return those who were not doing well.

The following is a list of boys admitted during each year since the school was organized.

1868.....	112
1869.....	29
1870.....	142
1871.....	37
1872.....	64
1873.....	95
1874.....	113
1875.....	153
1876.....	129
1877.....	117
1878.....	145
1879.....	107
1880.....	149
1881.....	157
1882.....	177

1883.....	149
1884.....	182
1885.....	179
1886.....	203
1887.....	166
1888.....	190
Total.....	2,795

The following table shows the number of boys remaining in the institution at the close of each fiscal year:

First year.....	112 boys.
Second year.....	118 boys.
Third year.....	217 boys.
Fourth year.....	196 boys.
Fifth year.....	191 boys.
Sixth year.....	216 boys.
Seventh year.....	265 boys.
Eighth year.....	328 boys.
Ninth year.....	324 boys.
Tenth year.....	339 boys.
Eleventh year.....	383 boys.
Twelfth year.....	330 boys.
Thirteenth year.....	347 boys.
Fourteenth year.....	330 boys.
Fifteenth year.....	372 boys.
Sixteenth year.....	393 boys.
Seventeenth year.....	437 boys.
Eighteenth year.....	440 boys.
Nineteenth year.....	516 boys.
Twentieth year.....	439 boys.
Twenty-first year.....	462 boys.

The average number present throughout the year was 451.

Statement showing the monthly expenditures from November 1, 1887, to November 1, 1888.

7. Elkhart.	16. Ohio.	25. Warren.
8. Hancock.	17. Orange.	26. Wells.
9. Harrison.	18. Owen.	27. White.

The counties that have never been represented in the School are :

1. Jay.	3. Scott.
2. Newton.	4. Stark.

CONCLUSION.

"She did what she could," was the simple but expressive tribute paid by our Savior to one who had done her whole duty. What greater tribute was ever paid a mortal? Our school, with all of its failures, has done its work well. The people of the State so recognize it. As its Superintendent, I wish to thank the faithful corps of officers who have borne the

brunt and burden of the day to help these boys. No Superintendent in the land has had better helpers than I have had. Above all, allow me to thank you, the members of the Board of Control, for the steady and strong support you have ever given to me. Your long experience has made you doubly competent to discharge faithfully the trust committed to your hands. Trusting that this work may ever be placed in as trusted hands, I remain gratefully yours,

T. J. CHARLTON,
Superintendent.

PHYSICIAN'S REPORT.

PLAINFIELD, IND., }
November 1, 1888. }

Prof. T. J. Charlton, Superintendent Indiana Reform School :

My seventh annual report must contain the sad mention of five deaths as follows :

Anthony Bellamy.....	Pneumonia.....	December 30, 1887.
Frank Tuttle	Entero-calitis.....	July 11, 1888.
James O. Hoadley.....	Consumption.....	July 25, 1888.
Charles Johnson.....	Consumption.....	August 12, 1888.
William Hill.....	Entero-calitis.....	August 19, 1888.

Anthony Bellamy was sick but a few days, was convalescent, and died very suddenly from heart clot.

James O. Hoadley and Charles Johnson had consumption, by heredity, went down rapidly, dying in less than four months from the date of decline. Neither had relatives living to their knowledge.

Frank Tuttle and William Hill suffered attacks of inflammation of the bowels, which resulted in perforation, and both died from peritonitis.

The above were all remarkably patient during their illness, and, with the exception of Anthony Bellamy, evidenced a wonderful development of Christian character. Anthony's death, being rather unlooked-for, and so very sudden, the case being of mild form, he left no verbal testimony, and yet he sustained rather a good character in most respects as a Reform School boy.

We had but little sickness during the winter and spring. In the summer we had some malarial cases, and several cases of dysentery, enteritis and entero-calitis, but none of them fatal except the two mentioned. Autumn gave us sixteen cases of

typhoid fever, all recovering. The case of John Wilson was of special interest owing to the sequelæ. He came into the hospital about the first of September, going through a lengthy siege of typhoid, but not of a low, malignant form, apparently. So soon as convalescence was well established, the right perotid gland inflamed, pus formed, and the lance was used. Much sloughing occurred, and about the time the healing process began, purpura-hemorrhagica made its appearance and developed into alarming proportions, he having hemorrhage from nose, eyes and bowels. Of course we despaired of his life, but through the patient and untiring efforts of Miss Shear, our nurse, he has about regained his usual health.

I wish to tender my sincere thanks to yourself and the Board of Control for some needed changes and repairs in our hospital building, and to assure you that I think our building is in first-class condition, and that we feel justly proud of it. If the Indiana Reform School had accomplished nothing in the past year but what it did for four of the boys whose lives went out, it would a thousand fold more than compensate the State of Indiana for all it has cost. Each of them gave very bright testimonies and died in full faith in the Lord, Jesus Christ, as their Savior, and that they had learned to love good things since coming to the school.

Boys who have been detailed as nurse-boys have, as a rule, been very faithful and considerate of our patients' wants, and under the charge of Miss A. J. Applegate, the first part, and Miss Clara Shear, the latter part of the year, the sick boys have been well-cared for.

Thanking yourself and the Board of Control, officers and boys for many kindnesses the past year, I respectfully submit our report.

AMOS CARTER, M. D.

THE CHAPLAIN'S REPORT.

To the Superintendent and Board of Control :

Six months ago, without my solicitation or knowledge, you invited me to the chaplaincy made vacant by the resignation of our mutual friend, Brother John G. Blake, who had been made superintendent of another of the State's institutions. I had long known his exceptional abilities for the work he was engaged in here, and the marked success of his efforts. I have deemed it best, therefore, as far as possible, with such exceptions as personality and other circumstances have made necessary, to follow the methods laid down by him.

I have conceived it to be my duty to help the boys gathered by the beneficent laws of the State within this institution; to stimulate them; to remind them that for every American boy there is at least a chance, no matter how unfortunate and unhappy the past may have been; to give to them the Word of God. Having no special training for the pulpit, I have not sought to impress the boys as a "preacher;" but if I have been to them as an elder brother, a friend, a companion, on a common plane of humanity, I have the more nearly given expression to my ideal of our relationship. Public religious exercises have not been neglected, and I hope not undervalued, but I have sought to put into them little abstract theology, and much of the love of God and the spirit of charity.

We have not been strictly Puritanic in our observance of the Lord's Day; we have rather sought to interpret the fourth commandment in the light of this scripture: "The Sabbath was made for man; not man for the Sabbath." A Sunday morning service affords opportunity for Scripture lessons, made pointed and pertinent with incident and remark. Citizens of

the State and friends from every quarter have frequently assisted in these services. Their visits have always been welcomed, and I desire here to testify to the Superintendent's and Matron's generous welcome to all who come with a good word for the boys. I have endeavored to afford variety to the mental and religious exercises, and by object lessons as well as by precept to introduce some new experience which might, in the providence of God, lead to an unfolding of the minds of the boys and become an inspiration to better things.

No one who has ever visited the Indiana Reform School for Boys can forget the singing—in the families and at the various chapel and Sunday-school exercises. The theory common in many communities that boys will not or can not sing is here disproved. I have nowhere heard better singing, in the sense that all sing and sing heartily. Every family is supplied with copies of the "Gospel Hymns," and besides the songs found in these, the boys have numberless other songs committed to memory. I have most heartily fallen in with the Superintendent's requirement that the stock of music be constantly replenished, and if a word from me in this connection be in place, I desire to express a sense of personal obligation to the officers who have made the musical feature a success. We have believed that music and church and home melodies are unfriendly to evil, a ward against temptation, and we have therefore encouraged much singing. In the days that are to come, when manly voices are "turning again to childish treble," the music of these old songs will "vibrate in the memory."

A boy at Sunday School and on the play ground is sometimes a different person. I have deemed it essential to know the boys under as many circumstances as possible. To facilitate this result, and because I think it right, (as the authorities of the institution have long directed) that encouragement should be given in indulgence in manly sports, I have made myself one of the boys on the ball field on Saturday afternoons. I have gone on many long walks with them, and our hearts have all been lightened by these happy experiences.

The hospital has been constantly occupied since May, and of course I have not failed to visit there frequently. Many a boy has there taken to heart his first serious lesson. It has been the will of God that four lives should go out during the year.

All had lingered long in sickness, and their fate was not unknown. Opportunity for religious contemplation thus afforded was accepted, and all professed faith in the Lamb of God "that taketh away the sin of the world." The remains of one of the deceased were taken to the home of his parents. Three we buried in the quiet grave-yard at the School, (and around their graves many a time since have boys stood uncovered singing the songs the departed once loved to hear.)

I would respectfully unite in the Superintendent's suggestion that provision be made for additional library facilities. In response to a request, a large number of Indianapolis friends have sent to me books, pamphlets and papers, for the use of the boys. These, and such other reading matter as has been in the institution and is being provided from time to time, are being used to a good advantage. Permanent facilities, however, and a reading-room are much needed.

I have urged upon boys about to leave the Institution the importance of attaching themselves to some church. Many, however, are without parents or friends to encourage them in this, and it is too frequently the case that the church itself does not find these boys. A State visitor, or county visitors, to look after their religious or moral welfare, would, in my opinion, be an invaluable auxiliary to reformatory influences.

No one connected with the Institution can be under greater obligation to the Board, to the Superintendent, and to all the officers than I am. I came a stranger to your methods, and you have borne with me, aided me, and encouraged my efforts. Mindful of all these kindnesses, and thankful for the cordial relations existing, and for the fraternity of spirit, officers, boys and all,

I am respectfully yours,

HILTON U. BROWN,

Chaplain.

DIRECTORS' REPORT.

INDIANA STATE PRISON SOUTH,
JEFFERSONVILLE, December 1, 1888. }

To His Excellency, ISAAC P. GRAY, Governor of Indiana:

The Directors of the Indiana State Prison South have the honor to present to you their report for the fiscal year ending October 31, 1888, of this State institution.

We are gratified to be able to state that the income from the Prison during the past year has been sufficient to pay all the expenses incident to it, and in addition thereto to pay \$2,531.42 of indebtedness which had accrued previous to March 9, 1887, the date when the present Warden, Hon. J. B. Patten, assumed the duties of his office. There has been drawn from the State Treasury during the past year \$4,638.20 over the earnings of the Prison, of which sum \$838.21 was turned back into the State Treasury, and \$3,799.99 applied to paying off some of the more pressing of the old indebtedness, making a total of old indebtedness paid this year of \$6,331.41. There yet remains a balance of old indebtedness of \$17,825.75, the greater part of which has been examined into by this Board and approved of, and some of which is due to laborers and poor employes, who need the money and who have been waiting for it for from twenty-four to thirty months, and which this Board deems it but just that the Legislature should make a special appropriation to pay. The contraction of this debt might have been avoided, but that we think is no valid reason why the persons furnishing labor or material to the State should do without their pay. The Warden's report filed herewith is referred to for a detailed statement in regard to this indebtedness. It will be observed that the total expenditure of the Prison has been \$77,937.70, or \$2,062.30 less than the annual appropriation of \$80,000 made for it by the State. We

believe this sum should have been paid to the Warden and applied to the old indebtedness, but it was not. On the contrary, \$838.21 was paid into the State Treasury by the Warden.

Now that the Prison has been demonstrated to be capable of sustaining itself, if its system of labor is not interfered with, we heartily concur with the Warden in his suggestions as to further improvements. A commendable State pride dictates that all State institutions should be creditable in appearance to the great State, and certainly the present kitchen shed, cooking apparatus, library hall, and manner of lighting the cells and buildings can not be called creditable by those who have examined similar institutions in other States, and their conveniences.

The present law requires that the cell of each convict should be furnished a light. This has been very unsatisfactorily complied with by furnishing candles to the prisoners and gas light in the corridors and halls. The gas has been obtained from the Jeffersonville Gas Company at a cost of two dollars per 1,000 cubic feet. The cost of gas and candles in the past year has been \$1,650.40, or the interest, at 4 per cent., upon over \$41,000. We believe a proper economy on the part of the State would be observed by putting in a system of electric light. The plant can be put in, except engine and boilers, which are now needed in the day time for other purposes, at a cost of not exceeding \$6,000, and in a few years the first expense would be more than saved to the State in the cost of light.

In view of the above facts we think the coming Legislature should appropriate for this Prison, for new buildings, engine, boilers and electric light plant, such a sum as will be necessary to secure them, probably \$15,000. We are sure that under the careful supervision of Warden Patten, as evidenced in all his financial transactions, the money would be judiciously expended, or, if not found necessary, any surplus would be returned to the State Treasury.

The Warden has made to us a very full and satisfactory report, which relieves us of the necessity of going further into general details, and which report is transmitted herewith and commended to careful consideration.

As will be seen, the number of prisoners (539) at the close of the fiscal year is just equal to the number at our last annual report, showing that notwithstanding the increase of population in the State, crime has not increased. This is certainly gratifying to all lovers of good government. The conduct of the prisoners has been generally good during the past year, there being comparatively few

violations of good conduct, for which the Warden and his subordinate officers all merit congratulation, as on their enforcement of discipline depends the conduct of prisoners in their charge.

The health of the Prison has also been better than ever before with the same number of convicts, which we attribute to the careful attention of Dr. H. S. Wolfe, Prison Physician, whose exhaustive report is forwarded herewith, and to which we refer for information on that topic, and take a pride in feeling that the Prison and its location is rid of the aspersions as to health heretofore indulged in in some quarters against it.

To Mr. R. J. Conner, the Clerk, we are indebted for systematizing the books of the Prison so that all of its operations may be readily ascertained at any time, and also for the statistical tables accompanying this report. He has filled his position and discharged all its duties efficiently and courteously.

We also include herewith the statement of Hon. J. S. Montgomery, the Steward, of the receipts and disbursements of the Guards' dining hall. This is the first full year in which the boarding of the guards has been attempted by the State, and in addition to the convenience to them and to their superior officers of always having them near in case of necessity, it will be seen that the experiment has resulted in a profit to the State of \$257.12.

The Moral Instructor's report is also included herewith. Rev. W. P. Barnhill, we are pleased to bear our testimony, has in the past year worked assiduously and earnestly for the moral and intellectual advancement of the class confined here who so greatly need that work. We refer to his report for a statement in regard to the Sabbath-school, the Christian Association, the night school and the Sunday services which have so fully occupied his attention, and also particularly to his statement in regard to the Prison library. We have not deemed it best to expend any considerable sum for additions to the library until we had a more suitable room to put the books in, that they might be properly taken care of. The Library Fund, derived from visitors' fees, now amounts to \$980.74, and is growing larger monthly. By the time a suitable room can be provided for it, the fund will be sufficient to supply a handsome addition of valuable works and to maintain it. The chapel room, which had remained in an unfinished condition and a disgrace to the State ever since the Prison was built, has been this year completed without calling on the State for an extra appropriation, and is now a chapel room of which none of the citizens need be ashamed.

Probably our report should stop here, but we can not forbear recommending, in view of the number of young men confined in prison for first offenses, and oftentimes while there, contaminated and made life-long violators or disrespectors of law by associating daily with old offenders, that our laws should be changed so that young men convicted of first offenses and of whom a reasonable hope for reformation may be indulged, should be sent to a separate prison from old offenders guilty of more than one offense, and their sentences should be determined by their evidences of reformation, ability to earn an honest living, the character for honesty of their family connections, and such circumstances as would reasonably justify a belief that they would be honorable citizens.

On the other hand, the idea of reformation for a criminal class who have shown by their personal actions, their connections, their habitual tastes and other evidences of depravity, to possess a depraved nature, should be entirely abandoned, or at least should only be permitted inside of prison walls and their sentences should be for life terms, the object sought being to protect society from them. This may seem harsh, but we believe an examination of prison records will justify it, and the expense to the public of numerous trials of the same criminal for continued offenses would be avoided.

We desire here to return our thanks to all officers connected with the Prison for their uniform courtesy and assistance.

With sentiment of highest respect for yourself, and thanks for the interest you have uniformly manifested in the welfare and conduct of this Prison, we have the honor to be,

Most respectfully,

JOHN HORN,

GEO. W. DENBO,

CLEMENT DOANE,

Directors State Prison South.

WARDEN'S REPORT.

WARDEN'S OFFICE, INDIANA STATE PRISON SOUTH, }
JEFFERSONVILLE, December 1, 1888. }

To the Honorable Board of Directors:

GENTLEMEN—I herewith submit to your Honors my Annual Report and that of Mr. R. J. Conner, Clerk, for the fiscal year ending October 31, 1888.

The financial condition of the institution is very satisfactory, and has fully sustained my prediction made in the last Annual Report, that the Prison could be made self-sustaining.

The condition of the Prison during the last year has been greatly improved, and much care and attention paid to the sanitation and health of the inmates.

Under the direction and approval of your Honorable Board I have made the following repairs and improvements: A bath-house with bath-tubs for both cold and hot water and of sufficient capacity to bathe all the convicts once a week, has been put in at a cost of \$2,000; also more than two thousand feet of sewer pipe, with traps and water seals, with water-closets and sinks, with complete traps and dumps for removing from the Prison all waste and garbage, have been constructed and put in; new water tanks and piping have been supplied where needed for the bath-house and to flush out the sewers. Also the drainage has been greatly benefited on the north of the Prison wall by proper sewers, with traps and seals to carry off the waste water from the shops. A new floor has been put in the large dining-room and the walls newly plastered and the entrance enlarged, new windows put in and the entire building repainted, and the room furnished with new stools and tables mounted on iron frames. A new tin roof was put on cell-house "C," and the main building over the offices, also on the south

half of cell-house "B," and all well painted. Also within the year the chapel and hospital building has been greatly improved, and the chapel room completed and very neatly decorated and furnished.

FINANCIAL.

A complete and tabulated statement of the financial transactions of the Prison, made by the Clerk and incorporated in this report, shows the whole amount of receipts from earnings to be \$74,137.71, and disbursements for maintenance, including every expense, \$71,606.29, leaving a net balance of \$2,531.42. This, as far as I am able to ascertain, is the first time in the history of the Prison since the contract system has been in force, that it was self-sustaining. The report further shows that \$4,638.20 was drawn from the State Treasurer, and that sum together with \$1,693.21 was paid out on old debts, and \$838.21 was paid to the State Treasurer at the close of the fiscal year. The actual expenditures for the fiscal year ending October 31, 1888, having been \$71,606.29, and the daily average number of convicts 557, it follows that the cost per man per day, covering all the accounts, was 35.1 cents. The total cost of provisions for the year was \$23,185.66, and the average cost per man per day for provisions was 11 4 cents.

The indebtedness of the institution contracted under the old administration was \$28,989.34. But as the Convict and Library Funds do not belong or enter into the General Fund of the State, amounting to the sum of \$4,832.23, this must be deducted from the indebtedness to the General Fund. For this amount suit is pending in the Clark Circuit Court against A. J. Howard and his sureties.

The total amount drawn and charged against the appropriation for maintenance and the payment of outstanding indebtedness was \$78,775.91, leaving a balance of \$1,224.09 unexpended appropriation.

The amount of the balance of the indebtedness is itemized and given as part of this report, viz:

NEEDS OF THE PRISON.

I would recommend for the benefit of the institution that a new brick building, with stone foundation equal to that of cell-house "A," be constructed between the said cell-house and the main building, with grated doors and windows, for a guards' hall below and a library room overhead. The old wooden trap, which now fills the space, is an exhibition of weakness and a temptation for escapes. The probable outside cost to construct a suitable building, including three steel doors with eighteen-inch wrought iron door frames, would be \$1,000, if the labor was done by convicts.

When the buildings of this institution were constructed kitchen and store-rooms were omitted, and an improvised shed erected against the north wall of a long building which is now used as a dining-room. It has always been a crazy affair, and is insufficient and not fit for the purpose of kitchen and bakery for the Prison. Modern and improved machinery for cooking is badly needed, and a new battery of boilers with twenty-horse power engine should be placed in the new building, which should be constructed on the

north side of the above mentioned building, and proper store-houses, with corn and hominy mill, with elevators and machinery put in for running laundry, sewing machines, forges, lathes, and pumping water. By utilizing convict labor the cost of the whole plant would not exceed, including the new building for guards' hall and library, \$12,000.

LABOR CONTRACTS.

The contracts for hire of labor now in force are as follows:

With George W. Brown, manufacturer of boots and shoes, to expire July 1, 1889, at 52 cents per day.....	75 men.
With Alvin L. Bryan, manufacturer of boots and shoes, to expire April 1, 1889, at 60 cents per day.....	50 men.
With Alvin L. Bryan, manufacturer of boots and shoes, to expire July 1, 1889, at 31 cents per day....	50 men.
With Patton Manufacturing Company, manufacturers of hollow-ware, to expire December 10, 1891, at 60 cents per day.....	100 men.
With Alexander G. Patton, manufacturer of hollow-ware, to expire January 15, 1892, at 55 cents per day.....	100 men.
With William D. Patton, manufacturer of hollow-ware, to expire December 1, 1891, at 40 cents per day.....	50 men.
With R. M. Dennis, manufacturer of saddle-trees, to expire December 1, 1891, at 55 cents per day, 30 men with the privilege of.....	50 men.

In concluding this report I wish to thank the contractors, managers, superintendents, foremen and others connected with the various industries at the Prison for their uniform kindness to the convicts under their employment, and their gentlemanly and courteous conduct towards the officers and guards.

The officers and guards are entitled to the confidence and esteem of the management for their efficient service, each in his department, and it is gratifying to state that the institution has sustained no loss through the fault, carelessness or negligence of any officer, and that all have displayed commendable zeal in the discharge of their various duties, and that neither violence or physical force has been used by them in maintaining the discipline of the Prison.

Again I wish to thank Dr. K. S. Wolfe, the Prison Physician, for his superior management of the hospital department and for the

strict attention given to the sick and for the improved sanitary condition and his aid in assisting me in classification and assignment of convicts to their occupation.

For the efficient manner in which their several duties have been performed, my thanks are tendered W. L. Barnes, Deputy Warden ; R. J. Conner, Clerk ; C. A. Ballou, Deputy Clerk ; J. S. Montgomery, Steward, and Rev. W. P. Barnhill, Moral Instructor.

To you, gentlemen, I wish to again express my sincere thanks for your able support in the management of the affairs of the Prison and for the cheerful co-operation and advice rendered me in the discharge of my duties, also for the pleasant and agreeable manner in which you have discharged your duties ; and it is gratifying to me to say that in the management and control of this institution that no selfish domination, political or personal interests have been permitted to warp your judgment or control your action, and that I have always been promptly sustained and aided in the discharge of my duties.

Very respectfully submitted,

J. B. PATTEN,

Warden.

MORAL INSTRUCTOR'S REPORT.

INDIANA STATE PRISON SOUTH,
JEFFERSONVILLE, December 1, 1888. }

To the Honorable Board of Directors:

GENTLEMEN—In discharge of my official duty, I again have the honor of submitting to you my Annual Report as Moral Instructor of the Indiana State Prison South, for the year just closing. The many decided improvements which have been made in every department of the institution, and the unprecedented good feeling existing between officers and prisoners, has enlarged the possibilities for good results, and greatly encouraged the efforts of him whose duty is to minister to the moral and spiritual wants of the inmates. Whether or not these favorable opportunities have been used to the greatest possible good to the unfortunate prisoner may not appear in this necessarily brief report, or whether large results have been realized through my labors, I shall not insist. Yet certain hopeful conditions exist in this institution, which to be known to your Honorable Board, require no extended mention here, viz.: That a higher type of manhood is recognized and encouraged in the treatment and management, and a greater self respect cultivated among the prisoners than ever before, which is the ground-work of every genuine reformation.

Fresh from a regular pastorate in the church, surrounded by Christian homes, churches, public schools and happy social circles, where additions to the church were almost weekly occurrences, it was a source of great annoyance in my first year's experience that visible results in genuine reformations were not matters of weekly or monthly record. But after larger experience, and a more careful study of the crying needs of my ill-fated field, these glowing anxieties for immediate and sweeping success gradually gave way to

the more serious demand for moral, mental and social sunshine and nourishment, imparted by example, as well as by precept and dogma. The experience of two years' prison work has resulted, to me, in the conviction that in the studious effort to impart the prime qualities of individual character, lies the first duty in the work of reformation. To this end have my past years' labors been directed.

As it is not expected here that I shall enter into an extended discussion of the great problem of crime and criminals, I shall at once proceed to give you, in detail, a report of the condition and workings of the department of which I have charge.

CHAPEL AND CHAPEL SERVICES.

Our hitherto incomplete, cheerless and gloomy chapel, having been, during the summer, thoroughly completed, and the dingy walls and smoky ceiling changed into beautiful and cheerful decorations, this place of worship and of general instruction has become doubly effective for good—an object lesson of order and discipline. Certainly for none of the many improvements wrought in the institution, is your Honorable Board and Warden Patten deserving of more credit than for this much needed one. Our Sunday services and all chapel meetings can now be made attractive with the surroundings in harmony with the purer principles we strive to inculcate. Religious services are held in the chapel every Sunday morning, attended, cheerfully, by all the prisoners, to whom, certainly, credit is due for their respectful deportment and the marked attention paid to every word of instruction. In all these services we urge and practice congregational singing, though the music is led by a choir of fifteen trained voices, together with an orchestra of six instruments, besides the organ.

ORGANIZED CHRISTIAN WORK.

The Sunday afternoon prayer meeting is still continued, but in an organized form. About three months ago we conceived the plan, as certainly the character and needs of a certain class of prisoners demands and justifies, of organizing such men into a society for friendly counsel and mutual assistance.

Accordingly, at the suggestion of Warden Patten, I selected ten trusted men as a nucleus. With these a permanent organization was

effected, known as our Young Men's Christian Association, with constitution, by-laws and regular order of business. To this number many have since been added, but only upon satisfactory evidence of true penitence, honest intentions and proper motives. The object of this society is the intellectual, as well as the moral and spiritual improvement of its members. One to two hours each Sunday afternoon is very profitably spent in prayer and song, bible readings and literary exercises. These meetings are a great source of social enjoyment to men thus shut out from the world, as well as a decided help to those who desire general improvement.

LIBRARY.

This duty of the Moral Instructor of this Prison, which otherwise might be rendered pleasant and more gratifying, has been, during my term of office, a source of much perplexing, unsystematic and ungratifying toil. Not that there are not many valuable books in the library, but because of their old and worn condition, absence of title and title pages, absent and disconnected volumes, and most all of them cloth binding of a very inferior quality. These conditions render a perfect catalogue an impossibility, while it is a great necessity in the proper care and distribution of the books. This applies to those books which have long been in use in this library, some of which, from evidences appearing upon their pages, can claim from twenty-five to thirty-five years residence, and have only escaped the destroying flames because there were not others to take their places. Added to the number given in last year's report, 275 volumes have been purchased during the past year, making in all 2,092 volumes.

It is a fact which can not be ignored, that a choice and wholesome literature has much to do in shaping the quality and aims of youthful character; and that the character of one's intellectual culture plays an important part in dictating the actions of life. If a choice and pure literature is good for our homes, in forming the characters of our families—our boys and girls—it is certainly a safe and profitable agency in the work of reformation. That the heart of man is swayed and governed through the intellect will not be gainsaid. False conceptions of right, perverted and corrupted ideas of the social and moral relations of men, are largely the result of a false and vicious education. Hence the paramount importance, in an institution like this, of an ample library stocked with a variety of books of a highly moral and elevating tone, and the entire absence

of that which only feeds and fires the vicious mind. With the execution of the already expressed desires and plans of your Honorable Board and those of the Warden, we hope to soon be able to make this one of the most potent factors in our reformatory work. The present needs of this department are the construction of a more convenient library room, and an early and well selected purchase of books, for which we hope the accumulated revenues are now sufficient.

The present plan of distribution has, during the year, proven practically satisfactory, giving to each man an ample supply of the best reading the library affords. Besides books from the library, many hundreds of the leading magazines, papers and periodicals have been distributed.

SABBATH-SCHOOL.

Our Sabbath-school, organized nearly two years ago, has been kept up constantly ever since, with the exception of the time during which the chapel was undergoing repairs. This school is held in the chapel every Sunday morning at 10 o'clock, just preceding the chapel service. In this work the International Lesson Series is used, and the undenominational idea maintained. The teachers are men of mature years, invited to this work from the different churches of the city; men of experience in Sunday-school work, and apt to teach. There has been an average attendance this year of 300.

The Sunday-school, properly conducted, is one of our most effective means of imparting general and religious instruction, and hence an important factor in prison work.

EDUCATION—NIGHT SCHOOL.

One of the greatest needs of the prisons of our country, where there is invariably such a large per cent. of illiteracy, is a perfect system of education, whereby prisoners, especially the younger ones, may be regularly and profitably taught in the common branches of an English education, and even in the higher branches, if the length of term and the future outlook of the individual should justify it. It is to me a source of pain and sadness that so many young men, from eighteen to twenty-five years of age, are constantly drifting into prison, and in some cases from prison to prison, who are not able to read or write so much as their own names.

These men seem to think that they were born for the sub-stratum of society. And how are we to convince young men thus falsely educated that the most honorable positions in society are theirs, but only attainable by honesty, industry and true merit. Our religion utterly fails to Christianize when its graces are bestowed upon the avowed and prejudiced enemy of intellectual progress and social culture. The Scriptures say: "Can a man, by *searching*, find out God?" How, then, shall he properly know Him, who is shut up to prejudice and ignorance, and whose mind and acts fail to respond to the better promptings of his soul.

True, under our present laws for prison government, an effectual system of education is rendered impracticable. But much, we believe, might be done by a careful classification or gradation according to age, condition and moral character, whereby good conduct, and honest and studious habits might merit something and receive the reward which they merit. Indeed, in my judgment, we should have a law by which, for good conduct, long term and lifetime men might be promoted from rank to rank, wearing in each its appropriate badge of distinction, resulting, in meritorious cases, in their ultimate release.

For the instruction of the younger men and those having little or no education, I have conducted in the chapel, the only available place for a school-room, a night school, with an enrollment of ninety-six men. These are graded, according to their several degrees of advancement, into classes from one to six, and taught, in their respective grades, by teachers best qualified for such work. This school I superintend personally, and the interest taken and the progress made are gratifying. For the work I am enabled to do in this direction I am indebted to the Warden for the construction of a stairway and an opening connecting the cell-house and chapel, whereby the men are safely and readily brought to the school-room after working hours.

We very much feel the need of a convenient school-room, with desks, blackboards and other necessary conveniences.

MAILS AND CORRESPONDENCE.

The inspection and distribution of the Prison mail, and the charge of all the correspondence, is an additional duty made incumbent upon me for the past year. While this is a very arduous task and requires a great deal of time and care, it affords me great oppor-

tunity for becoming acquainted with the prisoners and their families and friends. The mail received at the Prison every morning is examined during the day and promptly delivered to the men at their cells after the day's work is done. Each prisoner is allowed, under the present rules, to write to friends twice in every month.

CONCLUSION.

To you, gentlemen of the Board, I herewith record my sincere thanks and gratitude for your kind approvals, your encouragements and your pleasant greetings.

To Warden Patten also, for the many liberties given me, and for his co-operation and sympathies in all my work.

To the Physician, Deputy, Steward, Clerks and Guards, for their friendly and gentlemanly bearing toward me.

Very respectfully,

W. P. BARNHILL,

Moral Instructor.

PHYSICIAN'S REPORT.

JEFFERSONVILLE, November 1, 1888.

To the Honorable Board of Directors Indiana State Prison South :

GENTLEMEN—At the expiration of another year, I have the honor to report to you the condition of the Medical Department of the Prison, and to notice such other matters as appear of interest in this connection.

During the year we have had no contagious disease, of a serious nature, in the Prison, nor have any other diseases of an epidemic character prevailed among the convicts, and such diseases as we have had have generally been mild and manageable. By an examination of Statement No. 1, herewith presented, it will be seen that there were 52 different diseases and injuries treated during the year, numbering in all but 774 cases, with 11 deaths. In the year 1887 there were 67 diseases and injuries treated, aggregating 1,191 cases, with 13 deaths, and this latter has been about the average in this Prison for several years past. We are, therefore, able this year to show a decrease of 15 in the number of diseases, a decrease of 474 in the number of cases, and a decrease of 2 in the number of deaths, which we deem the very best possible evidence of improved sanitation in the Prison. At this date there is not a single case under treatment, except two cases of incipient consumption, both of which are able to be about the Prison yard.

The actual number of cases of disease occurring in the Prison during the year, however, probably affords the best single test of the true sanitary condition of the place. Judged by this test, the showing is very gratifying. Of the 774 cases treated, 120 were burns, and 49 were wounds of different kinds, which in no way result from sanitary conditions. If these be eliminated from the whole number of cases occurring in the Prison, it will be found that

only 605 cases of disease proper were treated during the year, and a great many of these were very trifling. The number of cases treated during the year is more than two-fifths less than for the year 1887, and is believed to be much less than for any other year during the present decade, and is probably as good a record as any other prison in the West can show.

All of the 120 burns occurred in the foundry, and many of them were wilfully done to avoid work. Recently the Warden has wisely compelled the convicts to wear boots while pouring out melted metal, and this has already nearly banished burned feet from the list of casualties occurring in the Prison. Another year the number of cases of this kind will doubtless be greatly diminished.

The actual loss of time on account of sickness also affords a good test of the healthfulness of the institution. Statement No. 2, herewith presented, shows the total number of days lost in the Prison, from all causes, whether disease or accident, for the entire year, and for each month, and for the different employments, and for each convict engaged in each employment. There was a daily average of 557 convicts in the Prison during the year, with a total loss of 5,579 days, or an average loss of 10 days to the convict. The 250 convicts employed in the foundry lost about two-thirds of all the time that was lost, while 307 convicts in the other employments lost only one-third. In the foundry there was an average loss of 15 days to the convict so employed; in the shoe shop, $6\frac{1}{2}$ days to the convict; in the saddle-tree shop, $5\frac{1}{2}$ days, and in all other employments, 5 days to the convict. The loss of time in the foundry was over twice as large for each convict employed therein as it was in the shoe shop, and about three times as much as in the other employments, which shows the foundry to be much the worst contract in the Prison, viewed from a sanitary standpoint. Eliminating the time lost by burns from the total time lost, we have but $6\frac{1}{2}$ days as the average loss for each convict on account of disease of all kinds, or only about one-half day per month, during the entire year. This, we think, shows a very satisfactory working capacity of the Prison.

I have been thus particular in setting forth the foregoing facts because the sanitary condition of the Indiana State Prison South has been severely criticised by those in authority, and because this criticism has engendered a wide-spread belief that this Prison is not a fit place in which to confine human beings, thereby causing much uneasiness on the part of those who have friends and relatives con-

fined here. And this justifies us, we think, in making a still further effort to get more of the facts before you. In order to do this, and to throw still further light upon the subject, I herewith submit statement No. 3, in which I have made a comparison between this Prison and two other prisons of acknowledged superiority, as regards the total cost of the hospital, the cost of medical treatment per convict, the number of deaths, and the percentage of deaths to the whole populations of the different prisons. In this comparison I have used the Indiana Prison North and the Illinois Penitentiary at Joliet, basing my comparison on their last reports, because these two institutions are admitted to be the best managed prisons in the United States, in the belief that if this Prison would compare favorably with these two model institutions in the matters of cost of treatment of the sick and percentage of deaths, adverse criticisms would hereafter cease in reference to the fitness of this place for the purposes of a prison.

By the statement referred to it will be seen that the cost of treatment of the sick in the Indiana State Prison South, per each convict in the Prison, is very nearly the same that it is in the prison at Joliet, Ill., and that it is only about half as much as it costs in the Indiana Prison North, while the percentage of deaths in the Indiana Prison South is less than it is in either of these excellent institutions, and very much less than it was in the Joliet prison for the year 1885. The cost of the treatment of the sick, taken in connection with the percentage of deaths, affords a good test of the sanitary condition of the different prisons, and judged by this standard the Indiana Prison South is more than the equal of either of the prisons named and vastly superior to prisons in some of the States adjacent to our own. These facts, it is believed, ought to settle the question of the healthfulness of this institution, and it is hoped will relieve the minds of those who have been unsettled by other reports.

The favorable results shown by the foregoing facts are largely due to the judgment and energy of yourselves and the Warden, in promptly removing every source of disease as soon as it has been brought to notice. I am glad to give expression to this fact, and to say that under the present management much has been done in this way. About 2,000 feet of sewer tile have been laid under ground, through which much of the waste of the Prison is now conducted, which was heretofore permitted to decompose in open unpaved ditches. The mouth of the main sewer leading from the Prison, through which all the waste material is conducted, and which has

heretofore been open, emitting dangerous effluvia, has been closed by suitable traps which entirely prevent the escape of any deleterious substance that may be engendered in it. A very large open privy vault situated in close proximity to some of the shops has also been sealed, thus obliterating a most offensive and dangerous source of disease. Besides all this, the cleaning, painting and whitewashing of the cells and walls of the Prison have, altogether, made the sanitary condition of the institution all that may reasonably be expected or desired, and have enabled us to make as good a showing of results as institutions of its kind usually do, if not better. Thanking you and all the officers and employes of the Prison for all needed aid in the discharge of my duty to the sick, and for many courtesies, I have the honor to remain,

Very truly yours,

H. S. WOLFE,

Prison Physician.

ANNUAL REPORT

OF THE

DIRECTORS AND OFFICERS

OF THE

Indiana State Prison North,

FOR THE

Year Ending October 31, 1888.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. E. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1889.

THE STATE OF INDIANA, }
EXECUTIVE DEPARTMENT, }
December 28, 1888. }

Received, examined by the Governor and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE, }
INDIANAPOLIS, January 8, 1889. }

The amounts drawn from the State Treasury and the amounts paid into the Treasury during the fiscal year ending October 31, 1888, are \$85,000.

BRUCE CARR,
Auditor of State.

January 8, 1889.

Returned by the Auditor of State with above certificate, and transmitted to the Secretary of State for publication upon the order of the Board of Commissioners of Public Printing and Binding.

PIERRE GRAY,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana January 8, 1889.

CHARLES F. GRIFFIN,
Secretary of State.

DIRECTORS' REPORT.

*To His Excellency, ISAAC P. GRAY,
Governor of Indiana :*

The directors of the State Prison North have the honor to submit their annual report for the fiscal year ending October 31, 1888, with such other information and recommendations as the board deem it proper to suggest, and therewith the reports of the warden, clerk, physician and moral instructor, which severally are herewith respectfully submitted for more detailed and specific information.

The receipts and earnings for the year have been...	\$105,718 76
On hand October 31, 1887.....	10,107 59

\$115,826 35

The expenditures, including officers' salaries together with expenditures for ordinary repairs and improvements, have been.....	\$99,417 36
---	-------------

For rebuilding boot and shoe manufacturing building, and the erection of new school house and furnishing same.....	7,363 35
--	----------

\$106,783 71

Leaving balance on public account of.....	\$9,042 64
Additional amount due prisoners.....	3,063 29

Total on hand..... \$12,105 93

The number of prisoners has increased from 634 at date of last report to 702.

The convicts are all employed at remunerative rates.

For full details in relation thereto reference is made to the report of the warden.

Daily average number of convicts confined, 681.

Cost of feeding prisoners per day $12\frac{1}{2}$ cents.

Average cost of clothing per man per year, \$5.87 $\frac{1}{2}$.

Average cost of fuel per man per year, \$7.17 $\frac{2}{5}$.

Average cost of each prisoner per day, including officers' and guards' salaries, provisions, clothing, fuel, lights, drugs, medicines and all other expenses, 38 $\frac{1}{2}$ cents.

The excess of receipts over expenditures for main-

tenance was.....	\$6,301 40
Provisions on hand per inventory.....	\$3,090 15

Net earnings..... \$9,391 55

The high price of pork and potatoes, articles of large consumption, costing nearly one-third more than the average during recent years, largely increased the cost of living, swelling the net cost of provisions for the year to \$31,077.74, as against \$27,913.38 last year.

For a more full and complete itemized statement of the receipts and expenditures; also, the number of prisoners received and discharged during the year, the number committed from each county in the State, in what State born, the nationalities of the convicts, the cost of feeding and clothing each convict per day (in separate items), and for a general fund of information, detailed and general, with reference to the practical working of the Prison, reference is made to the very full and comprehensive report of the Warden.

At the time the present Board came in charge of the Prison there were but three industrial employments conducted therein, viz: The manufacture of furniture and chairs, boots and shoes, and cooperage.

Conditions seemed to advise an increase in the number and variety of employments, and acting thereon, the Board set about the introduction and establishment of a fourth industry.

This was successfully accomplished through the erection of a new three-story brick factory building adapted to the manufacture of woollens. The substantial and practical benefits resulting therefrom have fully met our expectations. On completion of the building, it was at once occupied by the Amazon Hosiery Company, and has been successfully operated by them continuously since.

Among the benefits arising from an addition in number and variety of employments may be mentioned the increased facilities afforded for adjusting the labor of convicts to employments best suited to their respective conditions.

The chances of combinations among contractors to put down the prices of labor are also lessened.

It may be added further that chief among the objections to the employment of convicts in productive labor arises from the concentration of this labor into a few industries of limited volume to an extent to sensibly affect the conditions of free labor engaged therein.

Manifestly, the greater the diversity of the employments of prison labor the less its effects will be felt by free labor.

It is conceded by all that convicts should be employed; that it is in all regards best for them, and that it is right that they should pay, or at least contribute to, the expense of their prison confinement.

How to provide this employment best adapted to the conditions of the various convicts, and at the same time so selected and adjusted as least to affect the wages of free labor and the price and quantity of the articles produced, has been one of the important practical problems of prison management seeking solution.

It is, of course, mathematically certain that no plan can be adopted involving the economic employment of convicts which can remove all competition. This fact has been well illustrated by the suggestion that a nail can not be driven by a convict, or by any man in any place or under any circumstances, without competition with another man who desires to drive the same nail.

The best that can be done is to reduce competition to a minimum.

In our opinion this can not be better done than by a wide diffusion of well selected employments.

In this connection we would renew a former suggestion that additional lands near the prison are greatly needed. Their use would prove a saving to the State, lessen the manufactured products in competition with free labor and furnish fitting employments to a class of convicts adapted thereto, and at the

same time enlarging the facilities for increasing in number the class of convicts commonly known as trustees. This would alone constitute an incalculable good.

The farm and garden products grown the past season—consisting mainly of 700 bushels of potatoes; 1,000 bushels of ripe, perfected onions; 16,000 large, fine heads of cabbage; twelve barrels of cucumber pickles, together with onions in a young growing state; tomatoes, lettuce, and other small vegetables enough to supply the prisoners liberally during the entire season—had they been purchased in the markets would have added largely to our provision bill.

The expense of these articles, provided as they were, was small—indeed, scarcely perceptible.

The quite extensive experiment made in raising celery is assuring that this popular vegetable luxury may be raised near the prison with the trusty element of prison labor very profitably.

We feel entirely clear that in all regards it would be wise to add to the present lands of the prison sufficient suitable acreage to insure a production by prison labor at least an ample supply of all farm and garden products needed in the conduct of the prison.

On Christmas Eve of 1887 (cause of fire unknown) the three-story brick building known as the boot and shoe factory, occupied by G. E. P. Dodge & Co., was destroyed by fire, leaving 130 men out of employment for nearly two months, reducing thereby the annual receipts over \$3,000, and involving a net cash expenditure in rebuilding, in excess of the labor of convicts, the sum of \$5,426.19.

Immediately after the fire the Warden summoned the Board to meet at the prison to consider the situation.

At such meeting, on being fully advised in the premises, only one course seemed open to us, which was clearly in the interest of general good, viz: to rebuild at once, although it was in the midst of winter.

This was resolved upon, and as soon as the heat resulting from the fire was sufficiently cooled the work of rebuilding was begun, and vigorously prosecuted to completion.

The new building is of more value than the one destroyed, and better adapted to the use designed.

The entire work of construction, as also the building of a new school house for the use of convicts, was under the immediate supervision of Warden Murdock, who kindly volunteered to take charge of the very undesirable job; and we can not too warmly express our thanks and appreciation of the valuable services performed by our worthy Warden therein.

For a fuller statement of details in the premises reference is made to the special report of the Warden in relation thereto, which is herewith presented, and made part of this report. In passing it may not be amiss to suggest that our entire action herein was probably outside of authority of law.

So far as we are advised, there was no authority therefor, other than the law of great need—the law of great practical necessity.

Had the Board not have had the requisite funds in hand, of the prison's own earnings, and assumed the responsibility it did, the ruins would have remained as left by the fire, and 130 men been locked up for an indefinite period awaiting legislation, as no money could have been obtained from the State Treasury without appropriation and legislative direction as to use.

Such conditions are surely not the best, and we respectfully recommend such legislation as will make legal provision for like contingencies in the future.

Better provision for the care and treatment of insane prisoners than formerly existed has been provided; about as good, we venture to say, as conditions incident to a prison will admit.

We are of opinion, however, that irresponsible persons are not in their proper or most fitting place in a penitentiary.

Penitentiaries are built and officered with special reference to sane criminals.

Their appointments are not adapted to the proper care of irresponsible beings.

Officers of a prison can not rationally be expected to have proper care taken of this class of unfortunates.

There are a number of persons confined in this prison whom it is a great sin to keep there.

Wrong with reference to the unfortunate creatures themselves, a wrong upon sane convicts, and a blur upon humanity generally.

We recommend that provision be made for due investigation of such cases, and the assignment of all such irresponsible persons to such institution and treatment as respective conditions and common humanity require.

A number of our sister states have so provided, and their experience furnishes ample proof of the virtue of the advance.

We recommend that provision be made by law requiring an allowance to the prisoner for over-work; i. e., work performed beyond the allotted task.

In our opinion such provision carried into practice will bring into the life of many prisoners an element of encouragement and aspiration which, without injury to any, will be reasonably sure to result in much good.

Such provision opened to all will be availed of by many to create for themselves, by the time of their discharge, a degree of independence and self-sustaining power that will enable them to contemplate their future with a more cheerful feeling—enable them to go out into the world again with a greater measure of hope and prospect than they otherwise would; there being now no law upon the subject.

The practice is that some contractors provide for and allow for over-work, while others do not; and those who do so provide often restrict it to certain departments; the tendency of the actual practice being to create an element of discontent and just complaint.

All should have chances alike. The \$3,063.29 belonging to convicts, now in the Warden's hands, is an indication of what would result were the facilities for earning afforded to all.

The aggregate amount of over-work made by the convicts in the Eastern Penitentiary of Pennsylvania last year was \$11,081.52.

Truly a marvelous contrast to the general prison system of the world—especially a few years back.

We would recommend an appropriation of \$1,000 for the purchase of additional books for the library.

It would be difficult indeed to overestimate the measure of good resulting from an adequate, well-selected volume of good reading for the use of prisoners.

The importance of this matter has impressed itself upon us to such an extent that we beg leave to urge its favorable consideration with all the force and earnestness at our command.

The building up and maintenance of an adequate prison library is a beneficence and moral force in aid of good conduct and discipline really incalculable.

Employment during the working hours of the six working days of the week, obviously tends to a state of health in both the mental and physical faculties.

The mind constantly active in guiding the physical forces incident to work, the time passes rapidly and with a tendency to develop a cheery feeling.

In fact, during the working hours the inclination of the whole man is insensibly toward unity and harmony of all that is best in his nature—toward an upward development—in a work he is apt to be on the march in the right direction during this time.

The largest part of the Sabbath and the time between the evening meal and bed-time (three to four hours) are the prisoner's periods of greatest danger.

Locked up in separate cells, without means of employment or entertaining himself, the tendency is naturally and inevitably the very opposite of during the working hours—is likely to be either in the direction of a blighting, morbid state, or aggressive, dangerous mischief.

It is as an antidote, a preventive during this period of hazard, that books are needed, and are such a great beneficence and help to good.

There is a general disposition among prisoners to read while thus confined in the cells (and there is no person in this prison long until he can read.)

Obviously judicious reading is a great saving force from evil, furnishing the best available companionship and keeping the mind healthfully employed during the very time of the prisoner's life when there is the strongest tendency to restlessness and the bad generally, and is with all of permanent benefit.

The good effects of what is known as the good time law, the justice and wisdom of which was only so recently doubted by many well-meaning people, has *now* become so universally conceded that further commendation of that beneficent measure is not called for, and is mentioned in this connection simply as a helping factor in presenting and illustrating the steady, rapid march of public opinion away from the older and lower views of the objects of punishment for crime.

Perhaps in the entire domain of the marvelous development of our day there is no one feature more convincing that this development is (in the main) in the right direction than the changed feeling towards those in prison.

Less of the retributive—less of punishment for punishment's sake—and more of the spirit of the Master, is obviously now the controlling force in the public mind upon this subject.

The old policy of everything for penalty and nothing for preventive and reformation has passed away, it may be added, almost with a single bound, and in its place has come an overpowering sentiment in favor of the undeveloped power for good in kind and humane treatment.

While this upward development is most advanced in our own country, it is gratifying and assuring to know that it is also rapidly extending with more or less force throughout the entire realm of Christian civilization.

Over the new prison in Rome the Pope has caused to be inscribed the words, "It is idle to coerce the bad by punishment without making them better by instruction."

It has been well observed that there are times and conditions of society in which thought is comparatively stagnant—where it travels nowhere or when its travels are so slow and gradual as to be imperceptible. But, on the other hand, there are times when mind is on the march, and then it travels fast and far.

Nowhere in the whole domain of thought has this law of progress proven more true than concerning the best methods of dealing with offenders against the laws.

The penitentiary (meaning a place for penitence) as we have it in our day had its origin in the purest Christian benevolence.

And, it is not too much to add, that therefrom has been developed about every valuable improvement which has since been introduced into prison systems, germed in the law of love as developed through William Penn. The penitentiary was instituted by the Friends of Pennsylvania more than a century ago (in 1786), where they influenced the legislature of that State to abolish the punishment of death, mutilation, and the whip, and substitute solitary confinement as a reformatory process.

At the time many crimes were capital—high treason, petit treason, murder, robbery, burglary, rape, sodomy, malicious maiming, manslaughter, *witchcraft*, arson, and a second conviction of

any crime except larceny, counterfeiting, or passing counterfeit money, or bills of credit, current gold or silver coin, were all punishable with death.

Nor was the code more severe in its penalties than in its definition of offenses.

For instance, if the birth of an illegitimate child was concealed by the mother, the presumption of the law was declared to be that it was born alive and that she murdered it.

Out of this old condition has come to us the penitentiary, with which we now have to deal.

Apparently, it is a somewhat singular phenomena of mind movement that the beneficent conception which inspired the creation of this prison was almost barren of results for more than three-fourths of a century.

Not until within the last few years did the buds of the germ begin actively to unfold into the great awakening upon the subject which now possesses the public mind. We venture the belief that it may be set down as a fact generally realized that the public mind, in relation to crime and its treatment in its various phases, is far in advance of our laws.

This agreed, the adjustment of the laws into harmony with this awakened, enlightened condition of the public mind would seem the reasonable demand of the occasion, which we can not doubt will be wisely met by our Legislature soon to assemble.

Aiming to be guided by experience and practical knowledge, we beg leave to venture upon a few suggestions in relation thereto, and can, perhaps, begin no better than by saying that our most recent movements—that is, commutation of sentence for good behavior, providing a library, and like beneficencies—were steps in the right direction, and a good portion of what is now required is simply a further advance practically along the same line.

The spirit of the laws and their administration should be such as, without any compromise of firmness and duty, to develop and encourage hope rather than despair—put love in place of hate. In short, throughout in accord with the best human experience tempered with hope and mercy. To this end, we invite favorable consideration of the method of indeterminate sentences.

We believe the abolition of time sentences, at least for certain classes of offenders, would promote the perfection of prison

discipline; the reformation of the prisoner, and a decrease of crime and criminals. In other words, the treatment of convicts, as near as can be, according to individual conditions and dispositions.

The nearer the approach can be made to adjusting methods of punishment and general treatment to the individual convict, the better.

We have long "time;" among them life convicts that ought to be out. Others under the shortest sentences that never ought to go out.

In the first instance there has been a cure, a thorough penitence, an unmistakable determination to lead, in future, a correct life.

It is, therefore, a folly, and wickedness, to keep such a person in prison. Such convicts should not be required to complete a long sentence. It is not in accord with the revised statutes of the Ruler of all, and surely we make closest approximation to the right, rise highest in the scale of our being, when we assimilate our laws to those of the great Master.

Of the latter class there are many instances of being on their second, third, fourth and fifth terms, several upon sixth and seventh, and one, at least, on an eighth term, and there is no contrition; on the contrary, evidence of continued crime. Why should such men be discharged when it is known with almost mathematical certainty that they will resume their prey upon society and become additional infecting and corrupting factors; leading by contact and companionship the hitherto innocent into like paths as their own.

It is no benefit to such man himself to be discharged; he should be saved from adding fresh crimes to his record, and the community the expense of re-arrest, trial and re-commitment.

If what is known as the real criminal class, the incorrigibles, are retained in confinement as caught and committed, there will doubtless follow a decrease in the growth of such class, as also of offenders generally. The educators and factors, which create and develop crime, being reduced, in the nature of things it could not be otherwise than that the crime class would also be reduced.

We would repeat with indorsement the well considered judgment of a committee of the best penalogists in the land, which states with emphasis "That all who have studied the question

are satisfied that professional crime and the class that habitually live by violation of law might be well nigh exterminated by the perpetual exclusion of what is known as the incorrigible, who should always be separated from all convicts having within them any of the elements of reformation."

A number of our sister States have legislated in the direction indicated, among them our nearest east and west neighbors (Ohio and Illinois), neither of which now discharge habitual criminals.

Obviously if our laws remain unchanged in this respect, Indiana is likely to become the favorite field of operations of this bad, dangerous element of society.

Habitual criminals are wise in their way, and will measurably, at least, avoid States which, as they term it, legislate in relation to them in an unfriendly spirit.

Indeed, our recent increase in number of commitments is probably due, in some measure at least, to that cause.

This legislation was enacted in Ohio in 1885, and in Illinois since.

The meat of the Ohio law in relation thereto, and also in relation to parole for good conduct, is as follows:

"Every person who, after having been twice convicted, sentenced and imprisoned in some penal institution for felony, whether committed heretofore or hereafter, and whether committed in this State or elsewhere within the limits of the United States of America, shall be convicted, sentenced and imprisoned in the Ohio Penitentiary for felony hereafter committed, shall be deemed and taken to be an habitual criminal, and on the expiration of the term for which he shall be so sentenced he shall not be discharged from imprisonment in the penitentiary, but shall be detained therein for and during his natural life, unless pardoned by the Governor, and the liability to be so detained shall be and constitute a part of every sentence to imprisonment in the penitentiary: *Provided, however,* That after the expiration of the term for which he was so sentenced he may, in the discretion of the Board of Managers, be allowed to go upon parole outside of the buildings and inclosures, but to remain while on parole in the legal custody and under the control of said board, and subject at any time to be taken back within the inclosure of said institution; and power is hereby conferred upon said board to establish rules and

regulations under which such habitual criminals who are prisoners may go out upon parole, and full power to enforce such rules and regulations, and to retake and re-imprison any such convict so going out on parole, is hereby conferred upon said board.

SEC. 8. That said Board of Managers shall have power to establish rules and regulations under which any prisoner who is now or hereafter may be imprisoned under a sentence other than for murder in the first or second degree, who may have served the minimum term provided by law for the crime for which he was convicted, and who has not previously been convicted of a felony, and served a term in a penal institution, may be allowed to go upon parole outside of the buildings and enclosures, but to remain, while on parole, in the legal custody and under the control of the Board, and subject at any time to be taken back within the enclosure of said institution; and full power to enforce such rules and regulations, and to retake and re-imprison any convict so upon parole, is hereby conferred upon said Board; whose written order, certified by its secretary, shall be a sufficient warrant for all officers named therein, to authorize such officers to return to actual custody any conditionally released or paroled prisoner; and it is hereby made the duty of all officers to execute said order the same as ordinary criminal process.

The judgment of the best thought upon penalogy, enlightened by experience and practical knowledge, is that the pith of the truest and best plan is to say to the convict: You are in till you are fit to come out.

That society is best protected by allowing the reformed another trial, and holding the unreformed as long as the unreformed condition exists—until there is undoubted evidence that it is safe to discharge.

We are not unmindful that there is involved a large measure of responsibility in dealing practically with the subject.

Care must be taken that it does not mean hasty and injudicious discharges—all of which we claim for the fertility of the period is attainable.

The supply will come according to the demand.

If the principle be good, means need not be wanting for its execution.

Individual fitness for needed work of any kind is as certain as the need.

Finally, experience elsewhere is favorable to success. Here again Ohio seems in the lead. We have been much interested, and feel instructed through visiting and carefully examining into the system as she has it—seeing for ourselves its practical working and effects in all its details.

Those in best position to know pronounce it a success. As evidence bearing thereon we quote from last report of Board of Managers :

Total number of prisoners paroled from November 1, 1886, to November 31, 1887	114	
Number of prisoners paroled since the passage of the act, May 4, 1885	283	
Number discharged by expiration of sentence...	109	
Number discharged by Board of Managers (general sentence)	9	
Number revoked by Board of Managers.....	4	
Number pardoned by the Governor.....	4	
Number died.....	5	
Number refused to accept parole.....	1	
Number returned for violation of parole.....	16	
Number who have violated their parole not returned—most of them ceased reporting by a mistaken idea that they were to report for six months only.....	24	
Number reporting regularly	111	
		283
Of the number of prisoners paroled there were who had served more than three-fourths of their sentence.....	132	
There were who had served more than one-half their sentence... ..	85	
There were who had served more than one-fourth their sentence.....	40	
There were who had served less than one-fourth their sentence	15	
There were who had served general sentence ...	11	
		283

The report goes on to say :

The Board has used great care in considering applications for parole, depending chiefly on the convict's prison record and the statements of court officials who have heard the testimony,

and knew something of the previous record of the criminal; and while they have, in a few cases, been deceived and made some mistakes, yet on the whole number paroled the result of the system has been eminently encouraging.

While a number of convicts have been returned to the prison for violating their paroles, many of them of a trifling character, yet a violation; nearly the whole number have become industrious and honest citizens, providing for their families and living commendable lives.

The reports for the month of October show that with very few exceptions every prisoner paroled, who has unexpired time, has sent in his monthly report, and all showing their receipts and expenditures, many of them having made quite a saving over the cost of maintaining themselves and their families.

The parole law has, so far as paroled prisoners are interested, made a prison aid society unnecessary, by requiring all applicants for parole to secure an employer, whose character as a reputable citizen, engaged in honorable business, is certified by the County Auditor, thus placing them in charge of a guardian, both in the person of their employer and the prison authorities, who carefully watch their conduct, aiding and encouraging their efforts to maintain an industrious and honorable life.

The contrast in the prospects and hopes of an outgoing prisoner on parole, with employment and wages secured, many of them accompanied by their employer, to the prisoner whose time has expired turned out of the prison gate without employment, without means, afraid to apply anywhere for work, friendless and without a welcome place to lay his head, is pitiful indeed.

The Board are of the opinion that it would be a wise, benevolent and practical measure, having a tendency to reduce the number who are tempted to return to crime upon their release from prison, if an act was passed allowing prisoners serving a second term on a definite sentence to serve the *last year or two* of their sentence under the rules of employment and restraining influence of the "parole law."

The sum of the foregoing seems to present the solid ground of fact in favor of the stream of tendency which we would respectfully present.

It does not, as it seems to us, admit of doubt that judicious legislations addressed to such, or kindred ends, could be other than a beneficial accomplishment of great practical value.

Highly as we regard the Ohio system (pioneer as it is), it is not at all likely that it could be improved upon. Indeed, it is by no means all that we would recommend. There is good ground for saying, however, that it puts us well on the way to finding the best attainable.

We incline to the opinion that any system contemplating parole should require that before the parole is granted it should receive the approval of the Governor.

We would by no means exclude from the scope of the law what is now the life convict.

Of course the spirit of the principle we have been trying to present does not do this, and we are moved to call the more particular attention thereto from the fact that the recently enacted Ohio system, in which we find so much to approve, makes no provision for what is now the life convict.

From every point of view we think this an error.

First, in support of this view we would refer with approval to the presentation of the subject by our excellent, thoughtful Warden, who has so fully and forcibly covered the ground as to leave us little to add.

We may, perhaps, contribute somewhat through the mere suggestion of the fact that of the whole number now committed for life the percentage is small of those who deliberately commit murder from motives of gain or malice.

For this class there is indeed but little hope, and concerning which little need be said.

But of this much larger class of life convicts, who are not at heart real criminals, but who, as the Warden well puts it, "in a moment of frenzied passion; some by drink, and aggravated by studied abuse on the part of the victim, or from motives of self-defense, or even by accident, struck the fatal blow, and have been consigned for life;" in such cases, where remorse has done its work and there is thorough penitence, we would open the way to hope; would plead that after a reasonable length of time such might again go their way under like or kindred provisions as is made applicable to other offenders.

A large percent of the best element in this and other prisons of its class is found among what are now life men. The trustees, so called, are largely drawn from this class.

The same number of men taken at random from the whole body, or, indeed, from any other class, would not equal them in moral status—in the aggregate of good and hopeful elements which go to make for better life.

The subject has already grown upon us beyond our usual span, and what was contemplated in the beginning. We can not cease, however, with a due sense of duty without repeating and emphasizing what we have heretofore said in relation to the monstrous evil of the whole congregate prison system.

It is without question the greatest bar to the reformation of prisoners, and beg leave to submit whether the time has not come when the law of an enlightened Christian people should interpose for the protection of the comparatively innocent in the interest alike of economy and humanity.

Few things are more cruel and abominable than the herding together of confirmed old offenders—thieves, robbers and murderers, debauched and debauching villains—with the comparatively innocent, who are sent for a slight and often first offense.

For the first class to have an opportunity to contaminate the latter renders our prisons little better than seminaries of crime, the effect being to increase the number of real criminals and to develop and intensify their criminality.

We can never expect to make much change in the character of our young men confined in our prisons (and fully two-thirds are under the age of thirty) so long as we continue the existing system of promiscuous intermingling of convicts.

Perhaps the next greatest hindrance to reform is the after treatment received by discharged convicts.

This, again, has also been well treated by the Warden. Reinforcing somewhat we would suggest that the widespread sympathy which exists in active force for the poor as yet extends, practically, in a very weak degree to the inmates of prisons.

Christian charity as to them is far and away below the quality taught and practiced by the Master, and greatly beneath the needs of existing conditions.

We join the Warden in earnestly recommending that provisions be made for the appointment of an agent, whose duty it shall be to become advised as to character and general conditions of prisoners in advance of discharge, and to provide places and work for all such as desire, and concerning which there is reasonable hope of good results therefrom.

The trials to which the discharged convict who comes out with good purposes is subjected, are not comprehended by many persons.

Where the prisoner has no home to go to, and is without friends or relatives who will receive, if not welcome him, with every man's hand seemingly against him, his case is hard indeed—is truly pitiable.

From every right-pointed view such conditions surely call for remedy.

Our painful observations in relation hereto incites us to make special plea for such practical remedy as will take by the hand the released prisoner and start him again toward honest support and good citizenship.

Taking no higher view of the matter than mere dollars, if only one in twenty can be saved from a life of continued crime and converted into good producing citizens, it will more than repay the State for all necessary outlay.

If the prison system of the State is to continue in conformity to existing law (which we trust, however, will not be the case), with a single exception, no occasion exists here for additional improvements.

We are of opinion that, with the one exception, hereafter more fully referred to, the institution in its appointments, and its conduct and management as well, now fills all the conditions of a State Prison, as contemplated by existing laws. The cell-houses, cells, dining-room, hospital, bath-rooms and grounds will be found scrupulously cleanly; ventilation and sanitary conditions generally good. Convicts are comfortably clad and abundantly fed on plain, wholesome food, and made reasonably comfortable in their sleeping apartments, and, when sick, placed in conditions of entire comfort and well cared for.

The exception noted relates to artificial light. Our expenditures for gas light, obtained from the Michigan City Gas Co., as will be seen by the Clerk's report, are large, and yet does not afford light for the cells sufficient for the inmates to read by, necessitating the use of candles in the cells for reading and other purposes.

We did not think this as it should be, or that it should be longer tolerated, and had taken steps to put in an electric light plant of sufficient capacity to light the entire prison property within the walls, outside grounds, buildings, including the cells.

The burning of the boot and shoe building, elsewhere noted, necessitated the postponement of this, we think, judicious improvement.

The aggregate find, summing up of our stewardship, viewed from the dollar standpoint, may be stated as follows:

Cash paid into State Treasury	\$8,000 00
Cash expended during last December and January in rebuilding the boot and shoe factory, and in erecting new school house and furnishing same	7,366 35
It is quite safe to say that the State has an in- creased actual value in her prison property here, through the erection of the new woolen mill and other permanent improvements, library, etc., made previous to the present year, and paid for out of earnings, of at least	
	40,000 00
Cash now in hand.....	9,042 64
Total aggregate earnings	\$64,408 99

It is gratifying to be able to exhibit in this, our final report, about as satisfactory a condition of the prison and its inmates as under our system, we think, can reasonably be expected; and therewith announce that financially the prison has been something more than self-sustaining. This, however, is, in our opinion, of minor importance, is; indeed, far and away to the rear of the gain and good which will come of pushing our whole prison system up to a higher plane of conduct, a conduct better in accord with the advanced thought and experience of our day.

Should we be convicted of being involved in a conspiracy to aid and abet a revolution of this character such conviction would be far more gratifying to your Board than being able to exhibit the gain of a few dollars to the State treasury through the labor of prison convicts.

To gather up into shortest space the meat of the whole matter: The best laws and system can only be built upon the solid rock of study and enlightenment in the very science of human nature, the general facts of human society duly considered, the great objective points being the reformation of the prisoner and the protection of society, all the time keeping well in mind the idea of human brotherhood. The rights of

the person which belong to every created being need to be considered and respected in the treatment of crime as elsewhere in the domain of affairs.

Undue punishments, duties unperformed, or indifference to the claims of common humanity, through the forces of society is mathematically certain of being visited back in due measure of evil upon general society.

Inasmuch, then, as there is an inherent force in things which decrees this return of evil for evil with unerring certainty, we can not be too careful and painstaking even in our dealings with those in prison.

It is a pleasure to record our esteem and high appreciation of Warden James Murdock. To his superior management is largely due whatever of satisfactory condition herein may be found to exist.

Our thanks are also due to Deputy Thomas E. Donnelly and his assistants for the high order of discipline which has been so smoothly and humanely maintained.

The continued excellent sanitary condition of the prison is a gratifying tribute of merit to the physician, Dr. R. H. Calvert.

Rev. J. J. Faude, our moral instructor, has done his work well, and has our approval and thanks. We would mention with special commendation his valuable services in connection with our school and library.

The responsible duties of Clerk could not have been better performed than they have been by Mr. Charles Murdock, who has our best thanks and highest measure of approval.

HENRY MANNING,
JNO. C. SHOEMAKER,
GEORGE MAJOR.

WARDEN'S REPORT.

INDIANA STATE PRISON NORTH,
MICHIGAN CITY, November 1, 1888. }

*Messrs. John C. Shoemaker, Henry Manning
and George Major, Directors :*

I have the honor to submit this my annual report of the management of this prison for the fiscal year ending October 31, 1888, as follows :

There were in prison November 1, 1887.....	634
Received during the year ending October 31, 1888.....	364

Total.....	998
Discharged by expiration of sentence.....	270
Paroled by Governor.....	9
Pardoned by President.....	1
Escaped and not recaptured.....	1
Died.....	11
Remanded to House of Correction.....	2
Remanded for new trial.....	2 296

Number remaining in prison October 31, 1888.....	702
--	-----

I have paid the Treasurer of State from receipts and earnings of prison, and received quietuses for same from Auditor of State :

February 14, 1888, quietus No. 1,055, for months of November and December, 1887, and January, 1888	\$31,683 03
May 22, 1888, quietus No. 1,315, for months of February, March and April, 1888.....	23,697 33
September 1, 1888, quietus No. 1,260 for months of May, June and July, 1888.....	21,341 67
November 15, 1888, quietus No. 1,623 for months of August, September and October, 1888.....	30,061 68
Total.....	\$106,783 71

The receipts and earnings for the year ending October 31, 1888, amount to \$105,718.76. The balance of cash on hand November 1, 1887, was \$10,107.59. Total, \$115,826.35. Of this sum I have paid for maintenance \$99,417.36, and for rebuilding of shoe shop and improvements the sum of \$7,366.35, leaving a balance on hand November 1, 1888, of \$9,042.64. The amount due prisoners is \$3,063.29. Total amount due, \$12,105 93.

To deduct from provision account,
which is \$41,144.39, the sales to
prisoners and others, and receipts
from State boarding house during
the year.....

\$6,976 50

And value of provisions on hand
November 1, 1888, as per inven-
tory

\$3,090 15 \$10,066 65

Net provision account..... .. \$31,077 74

The daily average number of men being 681, makes the cost of feeding each prisoner per day twelve and one-half ($12\frac{1}{2}$) cents, or four and one-sixth (4.1-6) cents per meal.

The average cost of clothing each convict for a year is five dollars and eighty-seven and one-half (\$5.87 $\frac{1}{2}$.)

The average cost of fuel per year per man is seven dollars and seventeen and two-fifths cents (\$7.17 2-5).

To deduct from maintenance account the inventory of stock on hand, \$3,090.15, would make the average cost of each prisoner per day, including officers' and guards' salaries, provisions, clothing, fuel, lights, drugs and medicines, gateage and all other expenses, thirty-eight and nineteen twenty-fifths (38 19-25) cents.

The excess of receipts over expenditures for main-

tenance is..... .. \$6,301 40

The provisions on hand, as per inventory..... .. 3,090 15

Net earnings..... .. \$9,391 55

Pork and potatoes, which are used in large quantities, cost at least one-third more than that of previous years, greatly increasing the cost of living.

We have raised on the farm connected with the prison seven hundred (700) bushels of potatoes, one thousand (1,000) bushels

of onions, two thousand (2,000) pounds of lettuce, sixteen thousand (16,000) heads of cabbage, twelve (12) barrels cucumber pickles, besides celery and other small vegetables.

On the evening of December 24, 1887, the three-story brick building occupied by George E. P. Dodge & Co. was destroyed by fire, leaving one hundred and thirty (130) men out of employment for nearly two months, reducing the annual receipts over three thousand dollars (\$3,000).

The following is the present condition of contract labor :

J. R. & J. Winterbotham, cooperage—

25 men at 57 cents a day, expiring.....June 17, 1889.

25 men at 52 cents a day, expiring.....August 16, 1890.

100 men at 60 cents a day, expiring.....December 16, 1892

Ford, Johnson & Co., chairs, chair frames, furniture and cradles—

30 men at 70 cents a day, expiring.....February 15, 1889

45 men at 55 cents a day, expiring.....June 17, 1889.

25 men at 55 cents a day, expiring.....August 16, 1889.

100 men at 60 cents a day, expiring.....December 16, 1892

George E. P. Dodge and Co., boots and shoes :

115 men at 55 cents a day, expiring.....February 15, 1889

15 men at 67 cents a day, expiring.....February 15, 1889

Amazon Hosiery Co., woolen and cotton yarns, knitted and woven fabrics :

50 men at 40 cents a day, expiring.....September 1, 1890

50 men at 45 cents a day, expiring.....September 1, 1890

100 men at 50 cents a day, expiring.....September 1, 1890

Your attention is called to the continuous complaints of the citizens living along the line of Fish Lake Creek, on account of the Prison sewerage emptying into said creek.

There is no doubt but they have just cause for complaint, and some provision should be made as soon as possible to remedy the evil.

We would again call your attention to the necessity of a radical change in the management of our penal institutions. The old belief that prisons were established for the purpose of punishment alone, and not reformation, is fast giving away to a better and more humane sentiment, and we are heartily in sympathy with it.

Society is better protected against crime when the criminal himself ceases to be such—when, through reformatory influences, he is converted into a good citizen, rather than an enemy to society. And every thing that will bring about this result should receive our hearty co-operation.

One of the greatest hindrances to the work of reformation in this institution is the pernicious system of huddling the old and hardened criminal with the younger in age and crime.

Such associations are, of necessity, demoralizing, and tend to make our Prison a school of vice and crime, and will break down and destroy all the better traits of character of the younger criminal and place him beyond all hope of reform.

If we ever expect a diminution of crime in this State we must have some legislation that will enable us to grade and classify the inmates of our prisons.

One of the pressing needs in the work of criminal reformation, and should not be overlooked, is the appointment of an agent by the State whose duty it should be to provide employment for discharged convicts.

How many there are who leave our prison gates who have been led by temptation or associations to commit their first crime who are thoroughly repentant and anxious and willing to lead a new life, that are helpless without some outside aid. They are turned out with the brand of the prison upon them, and are thus prevented from appealing to friends or seeking a shelter of a home if they have one.

This is the critical period in the lives of these unfortunates; this is the hour of their greatest need, with no one to recommend and almost every avenue of work closed to them, it is not strange that a large majority drift back again into crime.

To remedy this state of affairs we recommend this guardianship. As everything nowadays is gauged by its cost, some might object to this measure as being extravagant, but when we take into consideration the vast sums spent in the conviction and punishment of criminals, and realize that through these methods we may restore to good citizenship scores of men who would otherwise become confirmed criminals. On the ground of economy alone we recommend these reforms.

In agitating the question of criminal reformation and the best methods on that line, there is one class that is left entirely out of the discussion. We refer to the life prisoner. While

we have but little hopes of reforming the criminal that deliberately takes the life of his fellow for gain, and would be loath to let him loose upon society. There are a number of life prisoners in every penitentiary who, in a moment of frenzied passion—some by drink, and aggravated by studied abuse on the part of their victim, or from motives of self-defense, or even by accident—have struck the fatal blow, and have been consigned to prison for life.

But a short time elapses till every experienced officer of the prison sees that remorse has taken hold of them, and they have thoroughly repented, and would give their all to restore their victim to life again, should they not, after a reasonable length of time and the proper authorities, have become convinced of their thorough reformation be restored to liberty again under a proper system of parole.

All criminals have certainly the right of reformation and should be given the benefits that accrue from it. Time should not be an element of punishment. The prisoner should be restored whenever the proper authorities are convinced by his conduct that he is worthy of citizenship.

After two years' experience in the management of this prison since we abolished corporal punishment we are more strengthened in our convictions, and that it is useless and demoralizing, and kindles resentments, and provokes retaliation, and better discipline and more cheerful work can be obtained by a system of kindness that appeals to the better nature of the prisoner.

Since our last report we have added a new school building, with all the modern improvements, to the institution, giving all inmates who, from neglect or other causes, have been prevented from obtaining an education in the common branches to improve in this respect, and we are glad to learn that the privilege is highly appreciated by the inmates, and under the able supervision of the Chaplain those in attendance are showing a marked degree of improvement.

The discipline of the prison is all that could be desired.

For a detailed statement of the financial, statistical, sanitary, moral and educational condition of the prison I refer you to the reports of the different officials of this institution.

For the efficient manner in which their several duties have been performed my thanks are tendered to my assistants.

And for courtesies and encouraging support received from you, gentlemen of the Board, my sincere thanks are returned.

Respectfully,

JAMES MURDOCK,
Warden.

WARDEN'S SPECIAL REPORT ON IMPROVEMENTS AND REBUILDING OF SHOE SHOP.

INDIANA STATE PRISON NORTH,
MICHIGAN CITY, November 1, 1888. }

Messrs. Henry Manning, George Majors

and John C. Shoemaker, Directors :

I herewith submit my report of rebuilding of shoe shop destroyed by fire on evening of December 24, 1887. Also, the building of school house and furnishing of same, and additional room for Amazon Hosiery Company, and the purchase of 500 feet of new hose for the fire department :

For shoe shop the sum of.....	\$5,426 19
For school house the sum of.....	750 00
For school supplies the sum of.....	190 16
For additional room for Amazon Hosiery Co. the sum of.....	600 00
Hose for fire department.....	400 00

Total expenditures..... \$7,366 35

For all said amounts expended I have presented vouchers and bills receipted for your approval. The same have been examined, found correct and ordered that warrants be drawn on Auditor of State for same.

The balance on hand as per annual report was \$16,408 99, from which amount I have paid \$7,366.35 for above mentioned improvements, leaving \$9,042.64 as a balance of cash on hand for maintenance.

Very respectfully,

JAMES MURDOCK,
Warden.

PHYSICIAN'S REPORT.

INDIANA STATE PRISON NORTH. }
MICHIGAN CITY, Oct. 31, 1888. }

To the Honorable Board of Directors,

Indiana State Prison North:

GENTLEMEN—I herewith submit my report of the medical department for the year ending October 31, 1888.

The health of the inmates has been good considering the class of persons, their previous habits, etc., usually sent to prison.

Ten deaths have occurred during the year, six of which were from typhylitic tuberculosus, two from consumption, one from teirrhus of stomach, resulting from excessive use of alcohol and opium prior to his admission to this prison, and one from injury received at the hands of a fellow convict. The sanitary condition of the prison is good, the inmates furnished with plenty of good, wholesome, well-cooked food, warm clothing, etc.

Thanking you, gentlemen of the Board, officers and guards, for courtesies extended in the performance of my duties,

Very respectfully submitted,

R. H. CALVERT,
Prison Physician.

MORAL INSTRUCTOR'S REPORT.

To the Board of Directors of the Indiana State Prison North:

GENTLEMEN—In presenting this, my sixth annual report of my work as Chaplain of this prison, I take pleasure in acknowledging my personal indebtedness to you for your enabling my department of this great work to take its longest steps forward since I have had charge.

1. The schoolhouse erected during the past year has put it within our power to give the rudiments of learning to a considerable portion of those who could do but little, if anything, in reading, writing and numbers. The eagerness with which this opportunity has been seized by the prisoners, and the perseverance they have shown in the prosecution of their simple studies would be considered quite enough to justify the outlay, even if the real benefits were left out of consideration. Of these benefits it certainly is not necessary to speak to you. Besides the knowledge of the branches pursued mention may be made, however, of the habits of method, order and system, and the application to mental pursuits which these men incidentally acquire through the school. We are fortunate in having, in the person of Mr. P. W. Driscoll, a teacher admirably qualified as an instructor, and with an excellent spirit of patience and sympathy with the prisoners.

It is to be hoped that this first educational venture in the prison, worthy of the name, will be followed soon by several others very necessary.

2. The increased facilities in the distribution of the library books have resulted in a great increase in the number of books read, and in the interest of nearly all our prisoners in reading of a higher order. We are now able to reach each one, not with unfailing, but with improved regularity, with the book of

his choice. As might be supposed, works of fiction are most numerous drawn, but a gratifying number of the best biographies and of histories are also read.

3. Through the appropriation—not large, but very helpful and timely—for the sacred music at our chapel services, there has come a great change in these services and in the interest in them. The choir leader and organist are both enthusiastic musicians, and have imparted their enthusiasm to the choir and the other prisoners. I believe the time has come when congregational singing might safely be permitted at the services. That it would be appreciated by many of the prisoners is evident from their inquiries with reference to it, while the grateful appreciation by the prisoners of the addition of privileges extended by the Warden within the last two years, and of the growing disposition you yourselves have shown to trust these men more, make it almost certain that no abuse would follow this new venture in the same direction. I am informed that for a number of years no case of discipline has arisen out of any misdemeanor occurring in the chapel, which, to my mind, suggests that the purpose of meeting there is fully appreciated by the prisoners, and that the spirit of worship would not be violated.

During the past few months I have been able to do more for the prisoners at their discharge by way of finding places to work, or putting them into communication with those who would be interested in them and help them to situations. Quite a number of them have found temporary shelter, and through that employment, in the Chicago Home of Industry. Such an institution we ought to have in Indiana, and in addition to it, what I have before called attention to, an agent, whose sole work it should be to seek employment for such of our discharged prisoners as “have a mind to work.” The letters I have received from men assisted to situations show that men may be saved, and saved by work.

This leads me to the expression of some thoughts on the subject of convict labor. With all the evils of contract labor freely admitted, the system is still infinitely superior to anything as yet proposed. It seems to me that I have the right to speak upon this subject, because the *moral effect* of enforced idleness in our prisons would be disastrous, to say nothing of

the *inhumanity* of it. Any change in our present system, without full and adequate provision for something to occupy the time and thoughts of our prisoners, ought to be frowned down. That our present system of prison management, under the laws of Indiana, as of other States, is a failure as to all which it ought to produce by way of reformation, is not, I think, an open question. But until our legislators see fit to make the financial outlay involved in converting our penitentiaries into educational institutions, physically, mentally and spiritually, as they should be, hard labor, the best feature now connected with these institutions, ought not in any way to be disturbed, not even by such legislation as might possibly strain the relations between the contractors and the directors. The number of free laborers whom any legislation on the subject of prison labor could benefit would always be less than the number of prisoners injuriously affected thereby. On the ground of "the greatest good to the greatest number," legislation should be in favor of the prisoners, as against any other class. Imprisonment is punishment enough without legislation unfavorably affecting the imprisoned.

Acknowledging my courteous and helpful treatment at the hands of yourselves and the Warden, I am,

Respectfully yours,

J. J. FAUDE,

Chaplain.

MICHIGAN CITY, IND., November 15, 1888.

CLERK'S REPORT.

INDIANA STATE PRISON,
MICHIGAN CITY, Oct. 31, 1888. }

*Messrs. Henry Manning, George Major
and John C. Shoemaker, Directors:*

I have the honor to submit to you a statement of the financial and statistical operations of the Indiana State Prison North for the year ending October 31, 1888.

I remain yours, respectfully,

CHAS. M. MURDOCK,
Clerk.
